Indian Road logistics sector is expected to clock 9-11% revenue growth in FY2026 driven by likely stability in economic activities and improvement in consumer demand in H2 FY2026. Improved disposable income on the back of tax cuts, interest rate cuts, and GST rationalisation would support consumer demand and enhance logistical activities.

Pricing environment remains competitive; however, organised players are likely to command some premium thus aiding the margins.

- **ICRA's sample set for the logistics industry clocked a revenue growth of 9.5% in FY2025.** Following some disruption in business activities during Q1 amid the General Elections, the sector's revenues were supported by recovery in second half of the year on the back of favourable monsoons aiding rural demand, a strong festive season, and the Government's thrust on capital formation.

- **Industry is expected to clock 9-11% growth in FY2026** driven by stable economic activities, expected rise in consumer spending on the back of tax cuts, interest rate cuts, and GST rationalisation announced by the Government. The sector's performance, however, will be vulnerable to the changing global trade environment, especially amid high US tariffs, given the likely impact on certain industries like apparels, seafoods, cut and polished diamonds, chemicals, etc.

- **ICRA expects the sector's aggregate operating profit margins-to remain range-bound at 10-12% in FY2026 (11.3% in FY2025).** Moderation in fuel prices in the past few months remains a positive; although the benefit could be passed on to customers. Operators' ability to effect equivalent rate hikes and consistently improve operational efficiency amid stiff competition, remains a key monitorable.

- **Debt coverage metrics remained stable in FY2025 on the back of range-bound margins.** Debt levels are expected to remain stable, going forward, despite moderate capex plans towards expanding branch network and warehousing and technology investment (along with rising lease liabilities), aided by improved earnings and equity raise by a few entities in the sample set, which was utilised for prudent funding mix towards fleet expansion.

- **The outlook on the Indian road logistics sector remains Stable,** driven by demand from varied sectors like e-commerce, FMCG, retail, chemicals, pharmaceuticals and industrial goods coupled with various Government measures to boost consumer demand and its robust infrastructure spending, which is likely to aid construction activity.
