Rationale and key rating drivers

ICRA has upgraded the rating of Aditya Birla Sun Life Short Term Fund (ABSLSTF) to [ICRA]AAmfs from [ICRA]AA-mfs as the credit quality of the portfolio has improved. The rating of ABSLSTF had earlier been downgraded on account of exposure to IL&FS special purpose vehicle (SPV) namely Jharkhand Road Projects Implementation Company Limited (JRPICL). With a large portion of the exposure being redeemed in July 2020, the scheme was comfortably within the benchmark limit for [ICRA]AAmfs rating level.

Mutual fund ratings incorporate ICRA's assessment of the creditworthiness of a debt mutual fund scheme's investment portfolio. These ratings are a symbolic representation of the credit risk in the underlying investments or the degree of safety regarding the timely receipt of payments from the investments that have been made by the mutual fund schemes. The ratings do not indicate the asset management company's (AMC) and/or any of its scheme's willingness and/or ability to make timely redemptions to its investors. The ratings do not address the market risks and hence should not be construed as an indication of the expected returns, the prospective performance of the mutual fund scheme, and the ability to redeem the investments at the reported net asset value (NAV) or the volatility in its past returns as all these are influenced by market risks

ICRA's assessment of debt mutual fund schemes is guided by the credit ratings of the individual investments, the relative share of the investments in the overall assets under management (AUM) of the scheme and the maturity schedule of such investments. The credit matrix is a tool used by ICRA for analysing the investment portfolio of the debt mutual fund schemes by assessing the portfolio's aggregate credit quality while reviewing the credit quality of each underlying debt security. The portfolio's weighted average credit quality is then measured against the appropriate benchmark credit score in the credit matrix. Once a mutual fund scheme is rated and the rating is accepted, ICRA reviews the underlying investment portfolios for the credit scores on an ongoing basis. If the portfolio credit score meets the benchmark of the existing rating, the rating is retained. If the portfolio credit score breaches the benchmark credit matrix score for the current rating, ICRA communicates the same to the fund manager/product manager or other officials of the concerned

AMC and may provide a month's time to bring the portfolio credit score within the benchmark credit score for the current rating level. If the investment composition of the fund is realigned to bring the portfolio credit score within the benchmark credit score, the rating is retained. However, if the portfolio continues to breach the benchmark credit score for the existing rating level, the rating is revised to reflect the change in the portfolio's credit quality. In case of sharp breaches of the benchmark credit score (for instance due to a multi-notch downgrade in the underlying investment) and/or if ICRA believes that the breach may not get rectified within a month of the ongoing review, the rating is generally corrected immediately without giving a month's time for rebalancing the portfolio.

Rating Sensitivities

Positive triggers – ICRA could upgrade the ratings of the schemes if the credit quality of the underlying investment improves or the size of the AUM increases significantly, resulting in a decrease in the share of lower rated investments and leading to an enhanced credit quality of the portfolio

Negative triggers – ICRA could downgrade the ratings of the schemes if the credit quality of the underlying investment deteriorates or the size of the AUM declines, which may result in an increase in the share of lower rated investments and lead to a breach in the threshold for the rating level.
