## NeoGrowth Credit Private Limited: Rating reaffirmed for PTCs issued under a MSME business loan securitisation transaction

### Summary of rating action

Trust Name	Instrument*	Initial Rated Amount (Rs. crore)	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action
Scorpio Trust April 2025	PTC Series A1	48.09	48.09	17.60	[ICRA]A(SO); reaffirmed

\*Instrument details are provided in Annexure II

### Rationale

The pass-through certificates (PTCs) are backed by pools of micro, small and medium enterprise (MSME) business loan receivables originated by NeoGrowth Credit Private Limited {NCPL/Originator; rated [ICRA]BBB (Negative) }/[ICRA]A3+}. NCPL also acts as the servicer for the transaction.

The rating reaffirmation factors in a buildup in credit enhancement cover over the future PTC payouts on account of healthy amortisation of pool and PTCs. Although the pool has reported moderate collection efficiency in recent months, the rating draws comfort from the fact that the breakeven collection efficiency is lower compared to the actual collection level observed in the pool till the April 2026 payout month.

### Pool performance summary

Parameter	Scorpio Trust April 2025
Payout month	April 2026
Months post securitisation	11
Pool amortisation (as % of initial pool principal)	54.7%
PTC Amortization - PTC Series A1	63.4%
Cumulative collection efficiency <sup>1</sup>	91.8%
Loss-cum-0+ (% of initial pool principal) <sup>2</sup>	5.2%
Loss-cum-30+ (% of initial pool principal) <sup>3</sup>	4.5%
Loss-cum-90+ (% of initial pool principal) <sup>4</sup>	3.2%
Cumulative cash collateral (CC) utilisation	0.0%
Cumulative prepayment rate	14.5%
Breakeven collection efficiency <sup>5</sup> for PTC Series A1	58.2%
CC (% of balance pool)	8.8%
Principal subordination (% of balance pool) PTC Series A1	29.7%
Excess interest spread (EIS; % of balance pool) for PTC Series A1	8.2%

<sup>1</sup> (Cumulative current and overdue collections till date)/(Cumulative billing till date + Opening overdues at the start of the transaction)

<sup>2</sup> POS on contracts aged 0+ dpd / POS on the pool at the time of securitization

<sup>3</sup> POS on contracts aged 30+ dpd / POS on the pool at the time of securitization

<sup>4</sup> POS on contracts aged 90+ dpd / POS on the pool at the time of securitization

<sup>5</sup> (Balance cash flows payable to investor – CC available)/Balance pool cash flows

## Transaction structure

As per the structure for the transaction, the monthly cash flow schedule comprises the promised interest payout. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will flow back to the Originator on a monthly basis. Any prepayment in the pool would be used for the prepayment of the PTC Series A1 principal.

## Key rating drivers and their description

### Credit strengths

**Substantial credit enhancement available in the structure** – The rating action factors in the significant build-up in the credit enhancement with cash collateral increasing to ~8.83% of the balance pool compared to 4% at the time of initial rating exercise. Further internal credit support is also available through principal subordination and excess interest spread (EIS). Additionally, there has been nil CC utilization in the pool in any of the payouts.

**Servicing capability of the originator** – The company has adequate processes for servicing the loan accounts in the securitised pool. It has demonstrated a considerable track record of regular collections and recovery across a wide geography and multiple economic cycles.

### Credit challenges

**Moderate Collections with delinquencies yet to stabilise** – The pool has seen a moderate collections with average collections ~90% with cumulative collection efficiency as on April payout as on 90.62%. The delinquencies are on increasing trend with 90+ dpd as on April 2026 payout stands at 3.20%. Limited recoveries are expected from harder buckets given the unsecured nature of the pool. Nonetheless, the breakeven collection efficiency is still higher than the actual collections seen in the pool

**Risks associated with lending business** – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The pool is exposed to the inherent credit risk associated with the unsecured nature of the asset class and that recovery from delinquent contracts tends to be lower.

## Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

ICRA has estimated the shortfall in the pool principal collection during its tenure at 5.25% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 4.8% to 18.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

## Details of key counterparties

The key counterparties in the rated transaction are as follows:

Transaction Name	Scorpio Trust April 2025
Originator	NeoGrowth Credit Private Limited
Servicer	NeoGrowth Credit Private Limited
Trustee	Catalyst Trusteeship Limited
CC Bank	DCB Bank
Collection and payout account bank	ICICI Bank Limited

## Liquidity position: Strong

The liquidity for Series A1 PTC is strong after factoring in the credit enhancement available to meet the promised payouts to the investor. The total credit enhancement would be ~3.50 times the estimated loss in the pool.

## Rating sensitivities

**Positive Factors** – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

**Negative Factors** - The sustained weak collection performance of the underlying pool (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer could also exert pressure on the rating.

## Analytical approach

The rating actions are based on the performance of the pool till April 2026 (payout month), the present delinquency levels and the credit enhancement available in the pool, and the performance expected over the balance tenure of the pool.
