## Singer India Limited

### Summary of rated instruments

| Instrument*                 | Rated Amount<br>(Rs. crore)    | Rating Action                           |
|-----------------------------|--------------------------------|-----------------------------------------|
| Fund-based – Cash<br>Credit | 13.00<br>(enhanced from 7.00)  | [ICRA]BBB (Stable) assigned/outstanding |
| Non Fund-based              | 17.00<br>(enhanced from 13.00) | [ICRA]A3+ assigned/outstanding          |
| <b>Total</b>                | <b>30.00</b>                   |                                         |

\*Instrument details are provided in Annexure-1

### Rating action

ICRA has assigned a long-term rating of [ICRA]BBB (pronounced as ICRA triple B) to the Rs. 13-crore (enhanced from Rs. 7.00-crore) long-term fund-based bank lines of Singer India Limited (SIL). The outlook on the long term rating is Stable. ICRA has also assigned a short-term rating of [ICRA]A3+ (pronounced as ICRA A three plus) to the Rs. 17-crore (enhanced from Rs. 13.00-crore) short-term non fund-based bank lines of SIL.

### Rationale

ICRA's ratings continue to take into account the sustained improvement in SIL's scale of operations with operating income registering a 17% yoy growth at Rs 281.34 crore in 9M FY2017 vis a vis Rs 239.73 crore in 9M FY2016. Also, the Company's OI grew by 2% in Q1FY2018 to Rs. 98.16 crore compared to Rs. 95.82 crore in the corresponding period of previous year aided by expansion in product portfolio. Further, the ratings takes into account its established market position in the Indian sewing machine market as well as growing home appliances segment albeit on a small base. On the basis of its brand recall, the volumes in the home appliances segment is growing wherein the company is following the asset light model through outsourced contract manufacturing with back to back warranty with the vendors for major defects.

The ratings continue to factor in SIL's established brand name in the sewing machine industry, the company's widespread distribution base and operational as well as technical support from the parent company, Singer Asia Limited. Also, SIL has a comfortable financial risk profile evident due to limited debt levels resulting in healthy debt coverage indicators despite low margins. The debt levels are likely to increase going forward on account of higher working capital requirements in the home appliances segment. The ratings, however, are constrained by the low profitability margins and intense competition especially in the home appliances segment. ICRA also takes into account the vulnerability of SIL's profitability to any adverse variations in raw material/traded goods prices. The ability of the company, to register a sustained improvement in scale, along with improved profitability while efficiently manage its working capital requirements, will be the key rating sensitivities.

## Key rating drivers

### Credit strengths

- **Decades of experience in the sewing machine industry in India with an established brand name, market share and widespread distribution network** –The company is engaged in the business from 1977 years and is a part of the Singer group which has been in the industry for more than 100 years and has a strong market share. With the parent company being an established brand in the global market boosts the company's bargaining power over its suppliers and its overall distribution network.
- **Technical and operational support from Singer group** - Singer maintains international level of quality by standardizing certain specifications across countries. All machines and machine spares and parts are imported from approved vendors at group level. The holding company provides technical and operational support in terms of the product development.
- **Healthy financial risk profile as characterised by favourable capital structure and strong coverage indicators**- SIL's capital structure remained healthy as on March 31, 2017 with overall gearing level at 0.07 times. Owing to the healthy capital structure the coverage indicators are strong as reflected by interest coverage of 150.37 times as on FY2017 end vis-à-vis 40.46 times as on FY2016 end

### Credit weaknesses

- **Significant product concentration from sewing machines** - Majority of the revenues of the company continue to be driven by the sewing machines segment (79% of the total revenues in FY2017). High dependence on single product line increases the vulnerability the company to risk of product obsolescence/substitutes
- **Working capital requirements of the company likely to increase with increased share of home appliances**- As the company's focus is on the home appliances segment, increasing the warehousing requirements for the company in the near future .Since company needs to stock the finished goods, the peak working capital requirements has increased and is likely to increase in the future as well.
- **High competition in the sewing machine as well as home appliances business limiting the margins**- With the presence of large number of players the company faces competition for specific products / categories from the established player especially in the home appliances segment where it is small player. The high competition in the sewing machine as well as home appliances business keeps the margins in check.

**Analytical approach:** For arriving at the ratings, ICRA has applied its rating methodologies as indicated below.
