&: The symbol implies that the ratings are under watch with developing implications

¹ 100 lakh = 1 crore = 10 million

Rationale

ICRA has downgraded ratings for PTCs issued under eleven mortgage loan securitisation transactions originated by Reliance Home Finance Limited (RHFL), as tabulated above. The ratings, after downgrade, continue to be on 'Watch with Developing Implications' for these transactions.

ICRA also has ratings outstanding on PTCs issued under one other mortgage loan securitisation transaction originated by RHFL, as mentioned in the table above. The rating for this transaction also continues to be on 'Watch with Developing Implications'

The rating downgrade of the PTCs in the eleven transactions follows the recent rating action taken by ICRA on the Servicer in these transactions, namely RHFL. ICRA has revised the rating on the commercial paper programme of RHFL from [ICRA]A2 'Watch with Negative Implications' to [ICRA]A4 'Watch with Negative Implications' (Click [here](#) to view the rationale). In the transaction – Indian Receivable Trust 5 – the cash collateral available in the transaction fully covers the balance PTC payouts.

ICRA notes that performance of the rated pools has been strong evidenced by healthy collection efficiency and low delinquency levels. The pools comprise of receivables from housing loans (HL) and loan against property (LAP) contracts. The receivables have been assigned to the respective trusts at par and each trust has issued one series of PTCs backed by the same.

While the pool receivables are 'bankruptcy remote' from the Originator post assignment to the Trust, RHFL continues to be the servicer in these transactions with no back-up servicing arrangement being in place. A sustained deterioration in the credit profile of the servicer could have an impact on its operations and thus its servicing ability. This in turn could adversely impact the collection performance of the underlying pools, which has remained strong thus far.

Key rating drivers

Credit strengths

- Strong collection performance seen in all the pools till March 2019 (payout month);
- High amortisation of one of the pools leading to PTC payouts being fully covered by the outstanding cash collateral
- No cash collateral utilization in any of the pools till date owing to strong collection efficiency and availability of Excess Interest Spread in these transactions.

Credit challenges

- Weakened credit profile of the servicer.

Description of key rating drivers highlighted above:

The performance of all the pools has been strong with cumulative collection efficiency of more than 99% after meeting March 2019 payouts. Any shortfall in the collections has been absorbed by the EIS in the structure and there has not been Cash Collateral (CC) utilisation in any of the transactions till date. The five pools that have amortised by more than 35% have seen some build-up in credit enhancement cover over the balance life of these transactions. However, the remaining seven pools were rated in H2 FY2019 and have seen limited performance till date.

Despite the strong collection performance of the pools, the ratings for PTCs issued eleven transactions have been downgraded and ratings for all PTCs continue on 'Watch with Developing implications' due to the deterioration in the credit profile of the Servicer, a proxy for its operational strength.

Servicer is the most important counterparty in any securitisation transaction. A significant deterioration in the credit profile of the Servicer could adversely impact its operations. In the absence of an alternate servicer, such an impact on the servicer's operational capability could translate into weakened collection performance of the pools. Given the importance of the Servicer's role in any securitisation transaction, the servicer's credit rating—as a proxy indicator of its operational strength—is an important input for ICRA's rating for securitisation transactions. Thus, notwithstanding the bankruptcy-remote nature of such transactions, ICRA ratings for PTCs are not entirely delinked from the Servicer's stand-alone rating.

ICRA will continue to monitor the performance of these transactions closely. Any further rating action will be based on the performance of the pools, servicer's credit profile and the availability of credit enhancement relative to ICRA's expectations.

Key rating assumptions

N.A.

Liquidity Position

Liquidity is available in all the securitisation transactions due to the presence of cash collateral (fixed deposit lien marked in favour of the trustee with a bank acceptable to ICRA).

Analytical approach:

The rating actions are based on the performance of the pools till March 2019 (the payout month), the present delinquency profile of the pool contracts, performance expected over the balance pool tenure, credit profile of the servicer, and the credit enhancement available in these transactions.

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website www.icra.in or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it.
