Total	-	-	

*Instrument details are provided in Annexure-1

Rationale and Key Rating Drivers

ICRA has assigned the credit risk rating of [ICRA]AAAmfs (pronounced ICRA triple A m f s) to Canara Robeco Short Duration Fund of Canara Robeco Asset Management Company Limited. Schemes with [ICRA]AAAmfs rating are considered to have the highest degree of safety regarding timely receipt of payments from the investments that they have made. The rating has been assigned basis the credit risk profile of the portfolio of the scheme with the credit risk score being comfortable within the benchmark limits at the rating level of [ICRA]AAAmfs.

The ratings indicate ICRA's opinion on the credit quality of the portfolios held by the schemes. They do not indicate the AMC's willingness or ability to make timely payments to the scheme's investors. The ratings should not be construed as an indication of expected returns, prospective performance of the mutual fund schemes, net asset value (NAV) or volatility in its returns.

ICRA's mutual fund rating methodology is based on evaluating the inherent credit quality of the scheme's portfolio. As a measure of the credit quality of a debt scheme's assets, ICRA uses the concept of "credit scores". These scores are based on ICRA's estimates of the credit risk associated with each exposure of the portfolio taking into account its maturity. To quantify the credit risk scores, ICRA uses its database of historical default rates for various rating categories and maturity buckets. The credit risk ratings incorporate ICRA's assessment of a debt fund's published investment objectives and policies, its management characteristics, and the creditworthiness of its investment portfolio. ICRA reviews relevant fund information on an ongoing basis to support its published rating opinions. If the portfolio credit score meets the benchmark of the assigned rating during the review, the rating is retained. In an event that the benchmark credit score is breached, ICRA gives a month's time to the debt fund manager to bring the portfolio credit score within the benchmark credit score. If the debt fund manager is able to reduce the portfolio credit score within the benchmark credit score, the rating is retained. If the portfolio still continues to breach the benchmark credit score, the rating is revised to reflect the change in credit quality.

Liquidity position – Not applicable

Rating Sensitivities

Positive triggers – Not applicable

Negative triggers - ICRA could downgrade the rating of the scheme if the credit quality of the underlying investment deteriorates or the size of assets under management (AUM) declines, which may result in an increase in the share of lower rated investments leading to a breach in the threshold for the rating level.
