Total	3,300.00	3,600.00	

*Instrument details are provided in Annexure-1

Rationale

While ICRA used to take a consolidated view of IIFL Holdings Limited, following the scheme of demerger (effective May 2019), there has been a restructuring, thereby creating three separate entities – India Infoline Finance Limited (lending operations), IIFL Wealth Management Limited (wealth and asset management) and IIFL Securities Limited (capital markets and broking business). The ratings for IIFL Wealth Finance are based on a consolidated view of IIFL Wealth Management Limited and its subsidiaries (referred to as IIFL Wealth/the Group/company), given their common senior management team and strong financial and operational synergies.

The ratings factor in IIFL Wealth's leading market position, as reflected in the assets under advice, management and distribution of Rs. 1,58,273 crore as on June 30, 2020. The company's senior management team has significant experience and expertise in the wealth management business, which has helped it grow into a leading player in the wealth management industry. The franchisee built over the years has helped ensure low client attrition (less than 2.5% p.a.) as well as low employee attrition (team leader attrition rate of sub-4% p.a.). ICRA also takes into account the comfortable capitalisation with demonstrated ability to raise equity. The ratings consider the reduction in the Group's profitability on account of a change in the revenue recognition model to trail basis and the mark-to-market (MTM) losses on its alternate investment funds (AIFs), with profit after tax/average total assets (PAT/ATA) of 1.8% and return on equity (RoE) of ~7% in FY2020. ICRA draws comfort from the management's strategy of focusing on increasing the share of annual recurring revenues (58% in FY2020; 43% in FY2019) as opposed to transaction/brokerage revenues, which could help reduce the volatility in income.

ICRA considers the modest lending operations with a loan book of Rs. 2,855 crore as on June 30, 2020 and the top 20 exposures forming 48% of the total loans and 46% of the consolidated net worth. The loans are largely to the clients of IIFL Wealth. The ratings also factor in the concentration of the funding sources, which is largely through its own client base in the form of principal protected market linked debentures (PP-MLDs). The outlook is Stable as the company is expected to maintain its strong position in wealth management with the gearing likely to remain under 3.5x.

Key rating drivers and their description

Credit strengths

Strong market position in wealth management – IIFL Wealth offers advisory, asset management, broking and distribution services to high net worth individuals (HNIs) and ultra HNIs. Its leading market position is reflected in the assets under advice, management and distribution of Rs. 1,58,273 crore as on June 30, 2020. It is also one of the largest managers of AIFs with assets under management (AUM) of Rs. 17,608 crore. It has a subsidiary, IIFL Wealth Finance Limited (IIFLWF), which is a non-banking financial company (NBFC) that provides loans against securities to the clients of the wealth management business with a loan book of Rs. 2,855 crore as on June 30, 2020. The company has a presence in wealth management across nine geographies with 26 offices and 274 relationship managers as on March 31, 2020.

Experienced and stable management team – The company's senior management team has significant experience and expertise in the wealth management business, which has helped it grow into a leading player in the wealth management industry. Apart from the senior management, the bankers have average experience of over five years in IIFL Wealth and overall experience of more than 10 years with a sub-4% attrition rate p.a.

Comfortable capitalisation; demonstrated ability to raise equity – The consolidated net worth stood at Rs. 3,089 crore as on June 30, 2020 with a reported gearing of 2.66x. On a standalone basis, the company reported a CRAR of 27.6% with a Tier I capital of 24.6% as of March 31, 2020 (32.8% and 28.7%, respectively, as on March 31, 2019). ICRA takes note of the one-time special interim dividend of ~Rs. 300 crore paid by the company. The gearing is expected to remain comfortable even after the dividend payout. While the gearing remains comfortable, ICRA takes note of the likely increase in the same for ~one to two weeks when the company would utilise commercial paper for IPO financing. The capitalisation has been supported by a regular equity infusion of Rs. 904 crore in FY2016 by General Atlantic and an equity infusion of Rs. 745.71 crore in Q1 FY2019. The infused capital was utilised for the acquisition of Chennai-based wealth management company, Wealth Advisors India Pvt. Ltd, for Rs. 253.6 crore in cash. Further, the company purchased the wealth business of L&T Finance for Rs. 230 crore. With not much of additional sponsor investments in AIFs, a low capital-intensive business and moderate growth plans for the loan book, IIFL Wealth is currently comfortably capitalised. ICRA derives comfort from the Group's demonstrated ability to raise equity.

Comfortable asset quality – IIFL Wealth Finance Limited (IIFLWF), a 100% subsidiary of IIFL Wealth, provides loans against securities and had a loan book of Rs. 2,855 crore as on June 30, 2020 (Rs. 4,798 crore as on March 31, 2019). These loans are largely to the clients of the wealth management business and are sourced by the wealth relationship managers. The loan book stood at ~2.5% of the wealth management AUM and is expected to remain at ~3-4% of the AUM. The reported asset quality indicators remain comfortable with gross and net NPAs of 0% and zero credit losses since inception. While the asset quality remains comfortable, the loan book, which is backed by financial assets, is susceptible to a decline in prices that may result in a decline in the loan-to-value (LTV) ratios. ICRA derives comfort from the fact that the portfolio largely comprises the clients of the wealth management business and the company does not have any aggressive plans to grow the portfolio.

Credit challenges

Funding profile remains concentrated – The funding profile remains concentrated with the company's borrowings largely being from its own client base through PP-MLDs. IIFL Wealth has significantly reduced its reliance on commercial papers (less than 1% as on June 30, 2020 from 63% as on March 31, 2018), which has helped increase the duration of its liability base, albeit with an increase in the cost of funds. ICRA draws comfort from the limited funding requirements, given the limited expected growth in the loan book.

Earnings remain exposed to capital market movements and regulatory uncertainties – With the change in the revenue recognition model, whereby the revenues on distribution are now on a trail basis even for the portfolio management services (PMS) and AIFs, the company's overall revenues declined in FY2020 to Rs. 851 crore from Rs. 1,067 crore in FY2019. The revenues were further impacted in Q4 FY2020 on account of the MTM loss on the sponsor and non-sponsor AIFs of Rs. 79 crore incurred in Q4 FY2020. The profit before tax (PBT) was lower at Rs. 286 crore in FY2020 compared to Rs. 537 crore in FY2019 due to lower revenues and partly due to higher employee expenses. PAT stood lower at Rs. 206 crore in FY2020 (PAT/ATA of 1.8% and RoE of 7%) compared to Rs. 384 crore in FY2019 (PAT/ATA of 4.0% and RoE of 16.1%). For Q1 FY2021, the company reported a PAT of Rs. 83 crore (PAT/ATA of 2.6% and RoE of 11%). While the change is expected to impact the profitability in the short to medium term, it reduces the volatility associated with transactional income. Further, the company is looking to shift to the advisor-driven model from the current broker-driven model, which would help reduce the regulatory uncertainties associated with the distribution fees from the manufacturer.

The company's net inflows are exposed to fluctuations in the capital markets. While the currently high AUM of Rs. 1,58,273 crore as on June 30, 2020 is expected to support revenues, lower net inflows could impact revenue growth. ICRA draws comfort from the management's strategy of focusing on increasing the company's share of annual recurring revenues (58% in FY2020; 43% in FY2019) as opposed to transaction/brokerage revenues, which could help reduce the volatility in income. The revenues are also susceptible to regulatory changes such as the regulations for the total expense ratio (TER). The company's strategy of moving to an advisory model from the broker model would help reduce the impact of regulatory changes.

Franchisee risks – The company relies on the brand and franchisee developed over a period for the retention and acquisition of clients. Any reputational damage could affect the business. A risk mitigant would be the seasoned relationship manager base with low attrition rates.

Modest scale of lending operations with concentration of top 20 exposures – IIFL Wealth's lending operations remain modest with a loan book of Rs. 2,855 crore as on June 30, 2020. Further, the portfolio is entirely concentrated on a single product i.e. loans against securities to HNI clients. ICRA also notes that the top 20 exposures formed 48% of the total loans and 46% of the consolidated net worth as of June 30, 2020.

Liquidity position: Adequate

IIFLWF had positive cumulative mismatches in the less-than-1-year bucket as on September 30, 2020. On a consolidated basis, it had cash and liquid investments of Rs. 4,277 crore and unutilised bank lines of Rs. 100 crore as on October 16, 2020, which is comfortable against debt repayments of Rs. 2,920 crore till March 2021.

Rating sensitivities

Positive triggers – ICRA will upgrade the ratings/change the outlook to Positive if the company is able to increase the annual recurring assets to 75% of the AUM on a sustained basis while growing the AUM and increasing the profitability with an RoE of >16%.

Negative triggers – ICRA will downgrade the ratings/change the outlook to Negative if there is a material and prolonged erosion in the company's AUM with high client and advisor attrition. Increase in the consolidated gearing beyond 3.5x on a sustainable basis remains a rating trigger.
