# **Tata Consultancy Services Limited: Ratings reaffirmed**

#### Summary of rating action

Instrument*	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action
Long-term/Short-term, fund based Limits	200.0	20.0	[ICRA]AAA(Stable)/[ICRA]A1+ reaffirmed
Long-term/Short-term, Non- fund based Limits	5,000.0	6,464.0	[ICRA]AAA(Stable)/[ICRA]A1+ reaffirmed
Long-term/short-term Fund- based/Non-fund based	1,800.0	443.0	[ICRA]AAA(Stable)/[ICRA]A1+ reaffirmed
Long-term/short-term unallocated	-	73.0	[ICRA]AAA(Stable)/[ICRA]A1+ reaffirmed
Total	7,000.0	7,000.0	

\*Instrument details are provided in Annexure-1

## Rationale

The ratings favourably factor in Tata Consultancy Services Limited's (TCS) leading position among Indian players in the global information technology (IT) and IT enabled services (ITeS) outsourcing segment, its diversified and growing client base, wide range of services offered, scale of operations and strong financial profile characterised by healthy revenue growth and recurring cash accruals and strong liquidity in the form of free cash reserves. While the company's YoY growth in constant currency terms had been negative in the first two quarters of FY2021 due to the adverse impact of the Covid-19 pandemic across majority of its verticals, it recovered sequentially to a positive 0.4% growth during Q3 FY2021, driven by accelerated spends on migration to cloud, digital initiatives to bring business models online and faster conversion of earlier signed deals. The INR growth stood at 3% for 9M FY2021 supported by INR depreciation. The ratings continue to draw comfort from the company's presence in diversified verticals and solid execution track record, which has helped it build scale.

ICRA notes that the growth of traditional services and Indian IT services sector companies had been constrained by disruption due to cloud adoption, a sharp shift towards digital services and intense competition from local as well as international players. However, with its early organic investments in digital services, TCS has been able to capture higher spends on digital technologies. Further, the company's integrated service offerings, backed by its own intellectual property rights (IPRs), strong domain expertise and contextual knowledge, have helped it differentiate itself in the market place, thus enabling it to withstand competitive pressure and win large deals. The above factors combined with the continued cost benefit through the outsourcing model have resulted in market share gains for the company. Moreover, after migration of significant infrastructure and enterprise workload to cloud, overall industry prospects will remain bright in the medium term—this is expected to be driven by the customer's need to derive business value from cloud native capabilities leading to higher technological spends. With its capabilities, TCS is well positioned to exploit such growth opportunities and drive growth.

The Indian IT services industry continues to face geopolitical uncertainties such as legislations on restricting outsourcing or immigration in its key markets, which may have an adverse impact on the current business model of the industry. The demand for IT services remains exposed to macro-economic uncertainties such as a sustained growth slowdown in key markets in the US and Europe, which may pose a challenge to the Indian IT services industry. The company has a high concentration of revenues, primarily in the BFSI (almost 38-39%) segment, although the same is mitigated by its established relationship with clients as well as its deep domain knowledge.

The margins for the Indian IT services companies will continue to reflect the challenging operating environment characterised by pressure on commoditised IT services, wage inflation, and higher onsite costs necessitated by visa curbs leading to increased local hiring as well as lower discretionary spend by corporate firms. These risks are, however, mitigated by TCS' large scale of

operations, diversified customer base across geographies and its ability to generate operational efficiencies to counter such pressures. Further, the company's liquidity profile remains robust, given the cash and equivalents balance of Rs. 65,377.0 crore as on December 31, 2020, and the low capital expenditure requirements, which provide a buffer against any short-term fluctuations. However, its liquid reserves will remain sensitive to the level of dividend pay-outs and future buybacks, if any.

# Key rating drivers and their description

#### **Credit strengths**

Largest Indian company in global IT services outsourcing segment; remains competitive given its access to large technical talent pool and cost advantages in India – With a scale of Rs. 1,56,949 crore in FY2020 (\$22.0 billion), TCS is the largest Indian company in the global IT services outsourcing industry lending scale efficiencies. Indian IT services companies, including TCS, continue to benefit from India's massive educated workforce that provides a large technical talent pool resulting in global competitiveness.

**Full-service capability with increasing share of digital business; proven ability to win and handle large-scale projects globally** – The company's ability to offer full-service capability has helped it win deals across a wide spectrum of verticals. The company has strong domain expertise and contextual knowledge and has demonstrated its ability to structure and execute large-scale projects globally. This has differentiated it in the market place, enabling it to continually gain market share over its competitors. TCS' significant organic investments in manpower training and developing capabilities have also given it a competitive edge and helped it capture many transformational digital deals.

**Diversified client base with high repeat business** – The company has a large, diversified and growing client base with meaningful incremental addition of clients in the above \$20-million, \$50-million and \$100-million buckets across fiscals till FY2020. Its superior execution ability has resulted in high repeat business, thus providing stability to the revenue stream.

**Robust financial profile, given healthy profitability, cash accruals and healthy liquidity position** – The company's financial profile remains robust as reflected in its high operating profitability, strong capital structure, recurring operating cash flows and robust liquidity position in the form of a strong cash and equivalents balance of Rs. 65,377 crore as on December 31, 2020.

## Credit challenges

Slowing revenue growth from traditional outsourcing business; continued ability to win fresh digital business at scale would be critical for future growth – The IT services industry had been facing headwinds in the form of slowing demand for traditional services such as application development and maintenance as well as infrastructure management services (IMS), which have been negatively impacted by Social, Mobility, Analytics and Cloud computing (SMAC) and artificial intelligence (AI), commonly referred to as digital technologies. In the past few years, companies had been spending more on initiatives built around digital technologies to drive business outcomes, which has seen significant acceleration post the pandemic impact. Against this backdrop, TCS' continued ability to win a higher share of digital business at scale would be critical for driving future growth. Nevertheless, ICRA takes significant comfort from TCS' capabilities to exploit growth opportunities in digital tech and drive growth.

Legislation to restrict outsourcing or restriction on immigration could be detrimental for current business model, leading to revenue and margin pressures – In the past four years, there has been uncertainty regarding the US Government's visa policies towards its non-immigrant and temporary visa programmes, such as the H-1B and L1 visas. Any adverse development may prove to be detrimental to TCS' current business model and will lead to pressure on its revenues and margins. ICRA, nevertheless, notes the company's increased local hiring across countries, particularly in the US, to mitigate the above risks.

**High concentration in BFSI vertical mitigated by track record of consistent performance** – The company has a high concentration of revenues, primarily in the BFSI (almost 38-39%) segment, although the same is mitigated by its established relationship with clients as well as deep domain knowledge. Demand for the sector in the past has been adversely impacted by the macro-economic conditions affecting the industry, including sustained low interest rates, continued focus on cost optimisation and management of discretionary spends as well as in-sourcing by a few clients for greater operational control.

The business is supported by digitisation efforts, cost optimisation, regulatory, compliance and security-driven initiatives. In FY2020, the vertical faced headwinds in the form of lower spending by large banks in North America and the UK and deflationary pressure due to automation and machine learning. This resulted in a deceleration in the growth of the vertical to 5.2% in FY2020 from 7.7% in FY2019. Though the BFSI sector was impacted by pandemic related softness in Q1 FY2021, it has recovered well during Q2 FY2021 and Q3 FY2021 (YoY CC growth of 2.4% in Q3 FY2021) as there was significant support to the sector from the governments of such key markets. Further, while there is growing acceptance of public cloud in the BFSI space, it still lags in large scale adoption, which could be a key long-term trigger for spends in the sector, supporting growth.

## Liquidity position: Superior

TCS has consistently generated strong cash flow from operations, supported by its healthy operating profitability and low working capital intensity. The company had a robust liquidity position with cash and equivalents of Rs. 65,377.0 crore as on December 31, 2020. Despite the high dividend pay-outs and buybacks, the company's liquidity is expected to remain healthy, given the high recurring operating cash flows. However, ICRA has not factored in any large inorganic expansion plan by the company.

#### **Rating sensitivities**

#### Positive factors – Not applicable

**Negative factors** – Pressure could arise in case of a material deterioration in the company's credit profile because of a sharp decline in its operating performance and/or a large debt-funded acquisition and/or higher than expected shareholder payouts.

#### Analytical approach

Analytical Approach	Comments
Applicable Rating Methodologies	<u>Corporate Credit Rating Methodology</u> <u>Rating Methodology for Entities in the Information Technology (Services) Industry</u>
Parent/Group Support	Not applicable
Consolidation/Standalone	The ratings are based on the consolidated financial profile of the company. As on December 31, 2020, TCS had 49 subsidiaries that are listed in Annexure-2.

## About the company

Established in 1968 as a division of Tata Sons, Tata Consultancy Services Limited is currently the largest Indian IT services company. The company pioneered the concept of offshore IT services in 1974 and emerged as an integrated full-service provider with a global footprint. It was listed on the National Stock Exchange (NSE) and the Bombay Stock Exchange (BSE) in August 2004. TCS is a part of the Tata Group, with Tata Sons (rated [ICRA]AAA(Stable)/[ICRA]A1+) holding a 72.02% equity share (as on December 31, 2020) in the company.

TCS offers a rich portfolio of services, which includes consulting and service integration, digital transformation services and cognitive business operations. Based on industry classification, the company has five key verticals: 1) banking, financial services and insurance (BFSI), 2) retail and consumer business, 3) communication, media and technology, 4) manufacturing, and 5) others. The last category includes life sciences and healthcare, technology and services, energy, resources and utilities, and others. TCS has a widespread geographical presence across North America, Latin America, continental Europe, the UK, India, Asia Pacific, West Asia and Africa.
