JM Financial Institutional Securities Limited: Rating reaffirmed; rated amount enhanced

Summary of rating action

Instrument*	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action
Long-term Bank Lines – Unallocated	125.00	150.00	[ICRA]AA (Stable); reaffirmed/assigned
Total	125.00	150.00	

*Instrument details are provided in Annexure-1

Rationale

The rating reaffirmation factors in the demonstrated track record and established franchise of the JM Financial Group (the Group) in the domestic financial services industry, its diversified revenue stream and healthy financial profile with steady profitability and an adequate capitalisation level. While assigning the rating, ICRA has taken a consolidated view of the Group (i.e. JM Financial Limited (JMFL) on a consolidated basis) due to the close linkages between the Group entities, given the common promoters and senior management team, shared brand name, and strong financial and operational synergies. Moreover, ICRA expects the financial, managerial and operational support from the Group to continue to be available to all key Group companies.

The strengths are partially offset by the exposure to the volatility in capital markets and the portfolio concentration and inherent risk profile of the key segments (like real estate and promoter funding) in the wholesale lending segment (~85% of the total book as on March 31, 2021). The real estate sector has been facing a prolonged slowdown due to subdued sales and lack of funding access. The spread of the Covid-19 pandemic and the resulting nationwide lockdown further impacted the sector. ICRA notes that while regulatory and government interventions eased some pressure on the developers, a sustained pickup in sales across geographies is key for the developers over the medium term. Although a pickup in residential sales and collections was witnessed in H2 FY2021, the second wave of the pandemic impeded the sales momentum.

JMFL's asset quality, though healthy, moderated in recent quarters with the gross non-performing assets (GNPAs) increasing to 3.50% of the loan book as on March 31, 2021 from 1.79% as on December 31, 2020¹ and 1.65% as on March 31, 2020 (partly due to the base effect of a declining loan book). The special mention accounts-2 (SMA 2) stood at 2.94% of the loan book as on March 31, 2021 compared to 6.19%¹ as on December 31, 2020 and 2.64% as on March 31, 2020. Additionally, ~19% of the loan book had been restructured under the Covid-19-related regulatory package/extension of date of commencement of commercial operations (DCCO). While the asset quality remains a key monitorable, the presence of adequate collateral and the Group's conservative underwriting norms, adequate risk management systems and proactive monitoring and resolution process provide comfort.

The Group's capitalisation profile is healthy, with the leverage being lower than that of its peers, which provides it with financial flexibility as well as the ability to absorb losses, if needed. JMFL's consolidated net worth was Rs. 9,552.3 crore as on March 31, 2021, with a capital adequacy ratio (CRAR) of 40.2%. The company raised equity capital of Rs. 770 crore in June 2020 to shield itself from the uncertainties surrounding the pandemic and its impact on the economy. Supported by the capital raise, the Group's net gearing improved to 0.7 times as on March 31, 2021 from 1.0 times as on March 31, 2020. It made additional provisions (including a fair value loss) of Rs. 175.2 crore in Q4 FY2020 and Rs. 207.5 crore in FY2021 (1.7% of average total assets) towards the potential impact of the pandemic, as assessed by the management, on the business. Going forward, the Group's ability to manage its asset quality over the near-to-medium-term would remain critical. The rating also considers the

¹ GNPAs would have been 3.57% of the loan book and SMA 2 would have been 4.41% of the loan book as on December 31, 2020 without considering the Supreme Court's stay order on the NPA classification of assets post the end of the moratorium on August 31, 2020

risks associated with the distressed assets business, given the nature of the underlying assets, the focus on large-ticket exposures, the protracted resolution process and the uncertainty associated with the same.

While assigning the rating, ICRA has noted the continued challenges in resource mobilisation stemming from the current operating environment and the risk-averse sentiment of investors towards non-banks, particularly wholesale-oriented entities. Given the prominence of the lending business in the Group's revenue profile, its ability to manage its asset and liability profile, particularly considering the current operating environment, would remain critical. However, ICRA notes that the Group raised ~Rs. 1,000 crore of term loans and Rs. 2,122 crore of NCDs in FY2021, and that the cost of incremental borrowings has been declining. Following the onset of the liquidity crisis for non-banking financial companies (NBFCs), there has been a change in the Group's debt maturity profile with the share of short-term debt declining to ~9% as on March 31, 2020 from ~27% as on March 31, 2019. The share of short-term debt has since increased to ~22% as on March 31, 2021, largely in line with the increase in short-term assets.

Going forward, the Group's ability to generate adequate fee income and scale up its lending operations, while controlling the asset quality and maintaining a healthy profitability, capitalisation and asset liability profile, would remain critical from a credit perspective.

Key rating drivers and their description

Credit strengths

Established position of the Group in financial services industry – The Group is a diversified financial services entity with a presence in investment banking, retail and institutional equity broking, wealth management, investment advisory services, portfolio management, asset management, commodity broking, securities-based lending, corporate lending, real estate lending, private equity, and asset reconstruction. It is one of the leading entities in capital markets and related businesses with a key focus on investment banking and merchant banking operations and has been a part of many marquee deals. On a consolidated basis, the Group's revenue stream remains well diversified with the investment banking, wealth management & securities (IWS) business, mortgage lending, distressed credit and asset management businesses contributing 49%, 38%, 12% and 1%, respectively, in FY2021.

Diversification in business profile – The Group, which forayed into the non-capital market lending business in 2008, subsequently diversified its lending portfolio to wholesale mortgage, retail mortgage, and corporate lending. It forayed into the small and medium enterprises (SME) segment in FY2017 and housing finance in FY2018. Currently, the lending business has emerged as a key contributor to revenues. On an overall basis, the Group's loan book contracted by ~6% to Rs. 10,854 crore as on March 31, 2021 from Rs. 11,531 crore as on March 31, 2020 (peak level of Rs. 17,108 crore as on September 30, 2018).

While the granular loan book (capital markets and retail mortgage) posted growth in FY2021, the wholesale loan book declined, given the strong collections witnessed in H2 FY2021. The share of wholesale loans in the total portfolio thus declined to ~85% as on March 31, 2021 from ~90% as on March 31, 2020. As on March 31, 2021, wholesale mortgage, corporate lending, capital markets lending, retail mortgage and wealth loan against property (LAP) accounted for 66%, 19%, 7%, 7% and 1%, respectively, of the loan book. The retail mortgage book, one of the focus areas for the Group, grew by ~30% YoY to Rs. 744 crore as on March 31, 2021. While lending has emerged as the largest business activity for the Group, the fee-based businesses continue to account for a sizeable share of the net operating income² (~45% in FY2021).

Adequate capitalisation and low leverage at Group level – The Group's capitalisation remains adequate with a consolidated net worth (including non-controlling interest of the Group and net of goodwill on consolidation) of Rs. 9,552.3 crore and a CRAR of 40.2% as on March 31, 2021 (Rs. 7,993 crore and 38.7%, respectively, as of March 31, 2020). The total borrowings at the consolidated level increased to Rs. 12,369 crore as on March 31, 2021 from Rs. 11,756 crore as on March 31, 2020 (peak debt of Rs. 17,794 crore as on September 30, 2018).

² Net operating income = Revenue from operations (excludes net gain on derecognition of financial assets and investments carried at fair value) less finance cost and sub-brokerage, fee and commission expense

The Group had raised equity capital of Rs. 1,380 crore from external investors during FY2018-FY2019, thereby supporting the overall capitalisation levels and helping it maintain a low leverage. JMFL raised Rs. 770-crore equity through the qualified institutional placement (QIP) route in Q1 FY2021, which further enhanced the Group's capitalisation profile. The consolidated gearing was low at 1.29 times as on March 31, 2021 (1.47 times as on March 31, 2020) compared to 1.11 times as on December 31, 2020. The Group's capitalisation profile remains healthy, with lower leverage compared to peers, and provides adequate cushion against losses, if required. With the Group adopting a conservative approach towards wholesale lending and planning to increase its focus on retail lending, the leverage is expected to remain low over the near term. Over the medium term, the management intends to maintain the gearing under 3 times for the real estate lending business and 2 times for the distressed credit business.

Adequate profitability indicators – The Group's total income declined marginally to Rs. 3,227 crore in FY2021 from Rs. 3,454 crore in FY2020 owing to a moderation in the performance of the asset management business and the distressed assets business. JMFL reported a consolidated net profit (net of non-controlling interest) of Rs. 590 crore in FY2021 with adequate return on assets (RoA)³ of 3.7% (3.6% in FY2020). The return on equity (RoE)³ moderated to 9.2% in FY2021 from 10.2% in FY2020. The net interest margins (NIMs), which remained stable at 6.6% in FY2020 with the transmission of the increase in the cost of funds to the borrowers, improved to 7.5% in FY2021 as the average cost of borrowings moderated to 10.0% in Q4 FY2021 from 10.2% in Q4 FY2020. While the declining loan book and higher provision expenses (including the provisions for the estimated Covid-19 impact on the business) constrained the profitability of the lending business, robust fee and brokerage income and higher gains from fair value changes supported the Group's profitability in FY2021.

Credit challenges

Fund-raising challenges for non-bank financiers impacting business; ability to maintain asset and liability profile remains critical – The operating environment for NBFCs and housing finance companies (HFCs), especially entities with sizeable real estate exposure, has remained challenging since September 2018. The risk-averse sentiment of lenders/investors towards real estate lenders has constrained the ability of NBFCs and HFCs, including JMFL, to mobilise long-term resources from diversified sources. Though the cost of funds moderated in FY2021, the same remains high. This, coupled with the subdued macro-economic and operating environment, has impacted JMFL's ability to grow the lending business and the margins (even for the non-real estate lending businesses). While the Group raised long-term funds of ~Rs. 3,123 crore in FY2021, the same was largely used for meeting debt repayment obligations and reducing commercial paper (CP) borrowings. The Group raised ~Rs. 1,000 crore of term loans and Rs. 2,122 crore of NCDs in FY2021. ICRA notes that the Group has tied up sizeable 10-year money during the current quarter and has also raised term money from a mutual fund.

JMFL's debt maturity profile has changed following the onset of the liquidity crisis for NBFCs. As on March 31, 2020, the share of short-term debt in the total borrowings was ~9% compared to ~27% as on March 31, 2019. The same, however, increased to ~22% as on March 31, 2021. ICRA notes that these short-term liabilities, predominantly in the form of CP and short-term loans, are largely matched by assets with similar maturity such as capital market and trading assets. Given the rising prominence of the lending business, the Group's ability to manage its asset and liability profile would remain critical. ICRA takes comfort from the Group's adequate liquid assets (cash and liquid investments) of Rs. 5,351 crore and undrawn bank lines of Rs. 659 crore as on March 31, 2021, and its ability to raise funds from the market when required, as demonstrated in the past.

High concentration and inherent credit risk in wholesale segment; moderation in asset quality in current fiscal – The Group's loan portfolio largely comprises wholesale lending (~85% of the total book as on March 31, 2021), which includes real estate, promoter funding and corporate loans. The concentration in the wholesale segment could result in a sharp deterioration in the asset quality in case of slippages. The risks are further aggravated by the pandemic-induced stress on the operating environment, which was already facing challenges due to the continued slowdown in the real estate sector and the liquidity squeeze faced by developers and financiers. While residential real estate sales picked up in H2 FY2021, the momentum was impeded by the second wave of the pandemic. A sustained pickup in sales across geographies is key for the sector over the medium term.

³ RoA and RoE are as per ICRA's calculations

The Group's asset quality, though healthy, moderated in recent quarters with the GNPA's increasing to 3.50% of the loan book as on March 31, 2021 from 1.79% as on December 31, 2020 and 1.65% as on March 31, 2020 (partly due to the base effect of a declining loan book). SMA 2 was 2.94% of the loan book as on March 31, 2021 compared to 6.19% as on December 31, 2020 and 2.64% as on March 31, 2020. Additionally, ~19% of the loan book was restructured under the Covid-19-related regulatory package/extension of the DCCO.

In ICRA's view, the Group's asset quality indicators remain comfortable despite the moderation in recent quarters. The Group's ability to maintain a healthy asset quality in the near term, with the pandemic-linked regulatory forbearance having ended, will be critical from a credit perspective. The presence of adequate collateral and the Group's conservative underwriting norms, adequate risk management systems, and proactive monitoring and resolution process provide comfort. ICRA also draws comfort from the Group's leverage being lower than that of its peers, which provides it with the ability to absorb losses if needed.

Risks associated with distressed assets business given the nature of underlying assets, uncertainty associated with resolution process and large-ticket exposures – The Group, through JM Financial Asset Reconstruction Company Limited (JMFARC), is one of the prominent players in the asset reconstruction business, with distressed credit assets under management (AUM) of Rs. 11,060 crore as on March 31, 2021. JMFARC focusses on the large single borrower corporate segment, which is riskier than the retail segment on account of the larger ticket size, higher complexity involved in the transactions and the resolution process, and the high degree of engagement required with promoters. This, along with the inherent risks in the industry, given the nature of the underlying asset class and the company's strategy of focussing on resolution through the revival of operations and debt restrictions, can result in a protracted process. The presence in the corporate and SME portfolios consisting of multiple borrowers provides some diversification to the AUM.

Liquidity position: Adequate

As on March 31, 2021, JMFL had cash and cash equivalents of Rs. 5,351 crore and unutilised bank lines of Rs. 659 crore. The Group's liquidity profile is adequate for to its near-term maturities. The Group used the liquidity buffer to buy back its bonds from the secondary market. As per the asset-liability statements for the key lending entities in the Group as on March 31, 2021, the cumulative cashflow position remains comfortable for the near term.

Rating sensitivities

Positive factors – ICRA could upgrade the rating if the Group posts a substantial and sustained improvement in its business performance, characterised by well-diversified growth in the lending portfolio with an increase in granularity, healthy growth in fee-based income and improvement in profitability while maintaining the current capital structure and asset quality.

Negative factors – The rating or the outlook could be revised if the asset quality deteriorates significantly with the reported GNPA's increasing above 5% on a sustained basis or if there is an increase in the vulnerability of the wholesale loan book/asset reconstruction business. Pressure on the rating could also emerge if the challenges in funding access for NBFCs continue for a prolonged period with the Group not being able to maintain its current scale of lending operations. A significant deterioration in the profitability, a reduction in the fee-based income and weakening of the capitalisation profile would also be credit negatives.

Analytical approach

Analytical Approach	Comments
Applicable Rating Methodologies	Rating Methodology for Entities in the Brokerage Industry ICRA's Credit Rating Methodology for Non-Banking Finance Companies Consolidation and Rating Approach
Parent/Group Support	Not applicable; while assigning the rating, ICRA has taken a consolidated view of the Group (JMFL - Consolidated), given the high operational and managerial linkages between the Group companies and the shared brand name.
Consolidation/Standalone	To arrive at the rating, ICRA has considered the consolidated financial profile of JMFL. As on March 31, 2021, JMFL had nine subsidiaries, six stepdown subsidiaries, one partnership firm (with two of JMFL's subsidiaries as partners) and one associate company. Details of these companies are provided in Annexure-2.

About the company

Incorporated in 2017, JM Financial Institutional Securities Limited (JMFISL) offers institutional equity broking and research services to domestic and offshore clients of the Group. In FY2021, JMFISL reported a profit after tax (PAT) of Rs. 24.57 crore on a total operating income⁴ of Rs. 109.23 crore compared to a PAT of Rs. 18.98 crore on a total operating income of Rs. 97.92 crore in FY2020.

Key financial indicators of JMFISL

Instrument	Complexity Indicator
Bank Lines (Unallocated)	Not Applicable

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional, or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: www.icra.in
