Axis Bank Limited – Update on Entity

Summary of rating outstanding

Instrument*	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Outstanding
Infrastructure Bonds/Debentures	29,705.00	29,705.00	[ICRA]AAA (Stable)
Basel III Compliant Tier II Bonds	16,350.00	16,350.00	[ICRA]AAA (Stable)
Lower Tier II Bonds	4,425.00	4,425.00	[ICRA]AAA (Stable)
Basel III Compliant Tier I Bonds	9,500.00	9,500.00	[ICRA]AA+ (Stable)
Certificates of Deposit	60,000.00	60,000.00	[ICRA]A1+
Fixed Deposit	-	-	MAAA (Stable)
Total	1,19,980.00	1,19,980.00	

*Instrument details are provided in Annexure-1

Rationale

In a meeting held on March 30, 2022, Axis Bank Limited's board of directors considered and approved the purchase of Citibank's Indian consumer business from Citibank N.A. (Indian branches of Citibank) and Citicorp Finance (India) Limited (CFIL – [ICRA]AAA (Stable)/[ICRA]A1+). Subject to regulatory approvals, the acquisition is expected to be concluded in the next 9-12 months.

Axis Bank plans to acquire ~Rs. 50,200-crore assets (including advances of Rs. 27,400 crore) and deposits of an equivalent amount for a total consideration of Rs. 12,325 crore. The advances and deposits to be acquired are equivalent to ~4% of Axis Bank's net advances and ~7% of the total deposits outstanding as on December 31, 2021, while the purchase consideration amounts to ~12% of the core capital of Axis Bank as on December 31, 2021. As per the terms of the agreement, Axis Bank is contractually protected, by way of a downward revision in the consideration, if customer attrition (till the closure of the deal) is higher than the levels already factored into the price at which the assets have been agreed to be acquired. In such a scenario, the final deal value as well as the assets/liabilities taken over by Axis Bank may differ from the aforementioned values.

ICRA takes note of the acquisition approved by Axis Bank and the ratings remain unchanged.

Capitalisation levels to moderate from current levels but remain better than the negative rating triggers: Axis Bank is likely to recognise the consideration paid as goodwill and write off the same when the acquisition is completed. This is expected to lead to a moderation in the capitalisation levels by ~180 bps¹. In addition, there will be a ~50-bps capital charge representing the risk-adjusted value of the assets acquired by the bank. In ICRA's view, despite the one-time impact on account of the acquisition, the overall capital cushions above the regulatory levels are expected to remain better than our negative rating trigger of 4%. Moreover, given the expectation of a steady improvement in profitability with an improvement in the operating environment, we expect the bank's internal capital generation to support the near-to-medium-term growth. This will be key for preventing any material consumption of capital.

However, Axis Bank may consider raising growth capital over the medium term. Additionally, the bank continues to hold large prudent/floating provisions (~Rs. 5,012 crore (0.7% of RWA) as on December 31, 2021), which remains a source of comfort. With the write-off of goodwill, the return on assets (RoA) may moderate to a level below our negative trigger (RoA <1%). Excluding this extraordinary item, the bank's core RoA is expected to be strong. Axis Bank's solvency (net non-performing advances/core capital) profile is also likely to remain better than the negative trigger of 15%.

¹ Based on Axis Bank's risk-weighted assets (RWA) and capital position as on December 31, 2021

Ability to retain and expand incoming customer franchise will be key to success of the transaction: Axis Bank plans to acquire consumer/retail advances of Rs. 27,400 crore, comprising credit cards (~Rs. 8,900 crore), mortgages (~Rs. 10,000 crore), the asset-backed financing portfolio (~Rs. 5,200 crore) and small business and personal loans (~Rs. 3,300 crore). Similarly, it has identified deposits totalling ~Rs. 50,200 crore, mainly comprising current and savings account (CASA) deposits (~81% as on June 30, 2021), which, on a combined basis, is expected to lead to an improvement in its overall CASA ratio by up to 200 bps from the current level to ~47%. Additionally, the bank will be adding customers from the private and wealth banking segments of Citibank to its own captive wealth management segment 'Burgundy', which will help grow its fees over time. In ICRA's view, the acquisition will help grow Axis Bank's granular asset and liabilities, while also offering cross-selling opportunities over time. However, the bank's ability to retain and expand the incoming employee and customer base will be important to achieve meaningful synergy following the conclusion of the acquisition.

Analytical approach

Analytical Approach	Comments
Applicable Rating Methodologies	ICRA's Rating Methodology for Banks
Parent/Group Support	Not applicable
Consolidation/Standalone	For arriving at the ratings, ICRA has considered the standalone financials of Axis Bank. However, in line with ICRA's limited consolidation approach, the capital requirement of the key subsidiaries of the Group, going forward, has been factored in. In ICRA's view, Axis Bank's subsidiaries will largely remain self-sufficient in meeting their capital requirements in the near to medium term and the bank will continue to comfortably meet the regulatory capital requirements at the consolidated level

About the company

Incorporated in December 1993, Axis Bank Limited is a private sector bank. Its promoter group includes Life Insurance Corporation of India (LIC) and Specified Undertaking of the Unit Trust of India (SUUTI), which collectively held 9.5% of the shares as on December 31, 2021. As on December 31, 2021, Axis Bank had the third largest network of branches among private sector banks with 4,700 branches and an international presence through branches in DIFC (Dubai) and Singapore and representative offices in Abu Dhabi, Sharjah, Dhaka and Dubai and an offshore banking unit in GIFT City.

Complexity level of the rated instrument

Instrument	Complexity Indicator
Infrastructure Bond/Debenture Programme	Very Simple
Basel II Lower Tier II Bond Programme	Simple
Basel III Tier II Bond Programme	Highly Complex
Basel III Additional Tier I Bond Programme	Highly Complex
Certificates of Deposit	Very Simple
Fixed Deposits	Very Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional, or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: www.icra.in

Key features of the rated instruments

The servicing of the Basel II Lower Tier II Bonds and infrastructure bonds is not subject to any capital ratios and profitability. However, the Basel III Tier II Bonds are expected to absorb losses once the point of non-viability (PONV) trigger is breached in the Reserve Bank of India's (RBI) opinion. The rated Basel III Tier I (AT-I) and Basel III Tier II instruments are hybrid subordinated debt instruments with equity-like loss-absorption features. Such features may translate into higher loss severity vis-à-vis conventional debt instruments.

The rating for the Basel III Compliant Additional Tier-I Bonds is one notch lower than the rating for the Basel III Compliant Tier II Bonds as these instruments have the following loss-absorption features that make them riskier.

- The coupon payments are non-cumulative and discretionary, and the bank has full discretion at all times to cancel the same. The cancellation of discretionary payments shall not be an event of default.
- Coupons can be paid out of the current year's profits. However, if the current year's profit is not sufficient or if the payment of the coupon is likely to result in a loss, the coupon payment can be made through the reserves and surpluses created through the appropriation of profits (including statutory reserves). However, the coupon payment is subject to the bank meeting the minimum regulatory requirements for the CET-I, Tier I and total capital ratios (including capital conservation buffer, CCB) at all times, as prescribed by the RBI under Basel III regulations.

These Tier I bonds are expected to absorb losses through the write-down mechanism at the objective prespecified trigger point fixed at the bank's (CET-I) ratio as prescribed by the RBI, i.e. 6.125% of the total RWAs (w.e.f. October 1, 2021) of the bank or when the PONV trigger is breached in the RBI's opinion.

The distributable reserves² that can be used for servicing the coupon in a situation of inadequate profits or a loss during the year, stood at a comfortable 8.3% of RWAs as on September 30, 2021. The rating on the Tier I bonds continues to be supported by the bank's sound capitalisation profile and expectations of improved profitability going forward.
