### Rationale

In compliance with the circular [SEBI/HO/MIRSD/MIRSD\_CRADT/P/CIR/2021/594] issued by the Securities and Exchange Board of India (SEBI) on July 16, 2021 and the subsequent circular (SEBI/HO/MIRSD/MIRSD\_CRADT/P/CIR/2022/43) of April 1, 2022, for standardising the rating scales used by credit rating agencies, ICRA has discontinued the medium-term rating scale which was being used to assign ratings to the fixed deposit programmes of entities.

Accordingly, ICRA has migrated the rating currently outstanding for the fixed deposits programme of Axis Bank Limited (Axis Bank) from the medium-term rating scale to the long-term rating scale. The medium-term rating scale of ICRA was a 14-point scale, while the long-term rating scale is a 20-point scale. The migration of the rating has resulted in a change in the rating symbol; however, this is to be construed only as a recalibration of the rating from one scale to another and not as a reflection of a change in the credit risk of the fixed deposit programme.

Please refer to the following link for the previous detailed rationale that captures the key rating drivers and their description, liquidity position, rating sensitivities and key financial indicators: [Click here](#)

### Analytical approach

Analytical Approach	Comments
Applicable Rating Methodologies	<a href="#">ICRA's Rating Methodology for Banks</a>
Parent/Group Support	Not applicable
Consolidation/Standalone	For arriving at the ratings, ICRA has considered the standalone financials of Axis Bank. However, in line with ICRA's limited consolidation approach, the capital requirement of the key subsidiaries of the Group, going forward, has been factored in. In ICRA's view, Axis Bank's subsidiaries will largely remain self-sufficient in meeting their capital requirements in the near to medium term and the bank will continue to comfortably meet the regulatory capital requirements at the consolidated level.

## About the company

Incorporated in December 1993, Axis Bank Limited is a private sector bank. The bank's promoter group includes Life Insurance Corporation of India (LIC) and Specified Undertaking of the Unit Trust of India (SUUTI), which collectively held 9.70% of the shares as on March 31, 2022 compared to 11.64% as on March 31, 2021 and 13.88% as on March 31, 2020. As on March 31, 2022, Axis Bank had the third-largest network of branches among private sector banks with 4,758 branches and an international presence through branches in DIFC (Dubai) and Singapore along with representative offices in Abu Dhabi, Sharjah, Dhaka and Dubai and an offshore banking unit in GIFT City.

## Complexity level of the rated instrument

Instrument	Complexity Indicator
Fixed Deposit	Very Simple
Infrastructure Bonds/Debentures	Very Simple
Basel III Tier II Bonds	Highly Complex
Lower Tier II Bonds	Simple
Basel III Tier I Bonds	Highly Complex
Certificates of Deposit	Very Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or

complexity related to the structural, transactional, or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [www.icra.in](http://www.icra.in)

### Key features of the rated instruments

The servicing of the Basel II Lower Tier II Bonds and the infrastructure bonds is not subject to any capital ratios and profitability. However, the Basel III Tier II Bonds are expected to absorb losses once the point of non-viability (PONV) trigger is breached in the Reserve Bank of India's (RBI) opinion. The rated Basel III Tier I (AT-I) and Basel III Tier II instruments are hybrid subordinated debt instruments with equity-like loss-absorption features. Such features may translate into higher loss severity vis-à-vis conventional debt instruments.

The rating for the Basel III Tier I Bonds is one notch lower than the rating for the Basel III Tier II Bonds as these instruments have the following loss-absorption features that make them riskier.

- The coupon payments are non-cumulative and discretionary, and the bank has full discretion at all times to cancel the same. The cancellation of discretionary payments shall not be an event of default.
- Coupons can be paid out of the current year's profits. However, if the current year's profit is not sufficient or if the payment of the coupon is likely to result in a loss, the coupon payment can be made through the reserves and surpluses created through the appropriation of profits (including statutory reserves). However, the coupon payment is subject to the bank meeting the minimum regulatory requirements for the CET-I, Tier I and total capital ratios (including capital conservation buffer, CCB) at all times, as prescribed by the RBI under Basel III regulations.

These Tier I bonds are expected to absorb losses through the write-down mechanism at the objective prespecified trigger point fixed at the bank's (CET-I) ratio as prescribed by the RBI, i.e. 6.125% of the total risk-weighted assets (RWAs; w.e.f. October 1, 2021) of the bank or when the PONV trigger is breached in the RBI's opinion.

The distributable reserves<sup>1</sup> that can be used for servicing the coupon, in case of inadequate profits or a loss during the year, stood at a comfortable 8.3% of RWAs as on September 30, 2021. The rating on the Tier I bonds continues to be supported by the bank's sound capitalisation profile and the expectation of improved profitability going forward.
