## Namra Finance Limited: Provisional [ICRA]A+(SO) assigned to PTC Series A1 and Provisional [ICRA]A-(SO) assigned to PTC Series A2 issued by KiPlatform M22 - 009, backed by a pool of microloan receivables

### Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
KiPlatform M22 - 009	PTC Series A1	22.35	Provisional [ICRA]A+(SO); Assigned
	PTC Series A2	1.02	Provisional [ICRA]A-(SO); Assigned

\*Instrument details are provided in Annexure-1

Rating in the absence of the pending actions/documents	No ratings would have been assigned as it would not be meaningful
--	---

### Rationale

ICRA has assigned a Provisional [ICRA]A+(SO) rating to PTC Series A1 and a Provisional [ICRA]A-(SO) rating to PTC Series A2 under a securitisation transaction backed by microloan receivables originated by Namra Finance Limited (NFL). The pass-through certificates (PTCs) are backed by a pool of Rs. 29.18-crore microloan receivables (underlying pool principal of Rs. 25.40 crore).

The provisional ratings are based on the strength of the cash flows from the selected pool of contracts and the credit enhancement available in the form of (i) a cash collateral (CC) of 7.18% of the pool principal to be provided by the originator, (ii) subordination of 12.00% of the pool principal for PTC Series A1 and 8.00% for PTC Series A2, and (iii) subordination of the entire excess interest spread (EIS) in the structure. The provisional ratings are also based on the integrity of the legal structure. The ratings are subject to the fulfilment of all the conditions under the structure and the review of documentation pertaining to the transaction by ICRA.

### Key rating drivers

#### Credit strengths

- Availability of credit enhancement in the form of EIS, subordination and CC
- Absence of overdue contracts as on pool cut-off date

#### Credit challenges

- Geographically concentrated pool at state level with the top three states having ~85% share of pool
- Performance of pool would also remain exposed to natural calamities that may impact the income generating capability of the borrower, given the marginal borrower profile; further, pool performance would also be exposed to political and communal risks.
- Pool performance will remain exposed to any fresh disruptions that may arise from the Covid-19 pandemic.

## Description of key rating drivers highlighted above

The first line of support for PTC Series A1 in the transaction is in the form of a subordination of 12.00% of the pool principal (includes principal payable to PTC Series A2). After PTC Series A1 has been fully paid, subordination of 8.00% of the pool principal will be available for PTC Series A2. Further credit support is available in the form of an EIS of 11.18% for PTC Series A1 and 10.64% for PTC Series A2. A CC of 7.18% of the initial pool principal, to be provided by NFL, would act as further credit enhancement in the transaction. In the event of a shortfall in meeting the promised PTC payouts during any month, the Trustee will utilise the CC to meet the shortfall.

As per the transaction structure, PTC Series A2 payouts are completely subordinated to PTC Series A1. The collections from the pool, after making the promised interest payouts to PTC Series A1, will be used to make the expected principal payouts to PTC Series A1, followed by the expected interest payouts to PTC Series A2. The entire principal repayment to PTC Series A1 is promised on the scheduled maturity date. Post the maturity of PTC Series A1, interest payouts will be promised to PTC Series A2 and all excess cash flows, after meeting the promised PTC Series A2 interest payouts, will be passed on for the expected PTC Series A2 principal payouts. The entire principal repayment to PTC Series A2 is promised on the scheduled maturity date. The EIS available after meeting the expected and promised PTC payments will be used for the accelerated amortisation of PTC Series A1 and PTC Series A2 (on maturity of PTC Series A1). Hence, there shall be no leakage of the EIS during the tenure of the PTCs to the originator.

There are no overdues in the pool as on the cut-off date. The pool consists of loans that have high seasoning with a weighted average seasoning of ~11 months and high pre-securitisation amortisation of ~47% as on the pool cut-off date. The geographical concentration of the loan contracts in the current pool is high with the top 3 states and the top 5 districts constituting ~85% and ~31%, respectively, of the pool principal.

The performance of the pool would remain exposed to any fresh disruptions that may arise on account of the pandemic. Given the marginal borrower profile, the pool's performance would also be exposed to natural calamities and political and communal risks.

**Past rated pools performance:** ICRA has rated five standalone PTC transactions of NFL till date. The live pools have shown a high cumulative collection efficiency of more than 100% (including advances) and low delinquencies with the loss-cum-0+ days past due (dpd) in the range of 0.3% to 1.3% with nil CC utilisation as of the May 2022 payout.

## Key rating assumptions

ICRA's cash flow modelling for rating asset-backed securitisation (ABS) transactions involves the simulation of potential delinquencies, losses (shortfall in principal collection during the tenor of the pool) and prepayments in the pool. The assumptions for the loss and coefficient of variation (CoV) are arrived at after taking into account the performance of the originator's portfolio as well as the characteristics of the specific pool being evaluated. Additionally, the assumptions may be adjusted to factor in the current operating environment and any industry-specific factors that ICRA believes could impact the performance of the underlying pool of contracts.

After making these adjustments, the expected mean shortfall in principal collection during the tenure of the pool is estimated at 4.0-5.0% of the initial pool principal, with certain variability around it. The prepayment rate for the underlying pool is estimated in the range of 6.0-9.0% per annum.

## Liquidity position: Strong

As per the transaction structure, only the interest amount is promised to the PTC holders on a monthly basis while the principal amount is promised on the scheduled maturity date of the transaction. The collections from the pool and the available credit enhancement are expected to be comfortable to meet the promised payouts to the PTC investors. The available CC would meet the promised interest payouts for the entire tenure of PTC Series A1.

After PTC Series A1 is fully paid, the interest amount is promised to the PTC Series A2 holders on a monthly basis and the principal amount is promised on the scheduled maturity date of the transaction. The collections from the pool and the available credit enhancement are expected to be adequate to meet the promised payouts to the PTC Series A2 investors.

## Rating sensitivities

**Positive factors** – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

**Negative factors** – The sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade.

## Analytical approach

The rating action is based on the analysis of the performance of NFL's portfolio till March 2022, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the credit enhancement cover available in the transaction.

Analytical Approach	Comments
Applicable Rating Methodologies	<a href="#">Rating Methodology for Securitisation Transactions</a>
Parent/Group Support	Not Applicable
Consolidation/Standalone	Not Applicable

## Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned ratings are provisional and would be converted into final upon the execution of:

1. Trust deed
2. Assignment agreement
3. Legal opinion
4. Trustee letter
5. Power of Attorney
6. Chartered Accountant's (CA) certificate
7. Any other documents executed for the transaction including for the CC

## Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

## Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the ratings, the provisional rating will be withdrawn in accordance with ICRA's Policy on Provisional Ratings available at [www.icra.in](http://www.icra.in).

## About the company

Namra Finance Limited (NFL) is a wholly-owned subsidiary of Arman Financial Services Limited. Microfinance is regulated by the Reserve Bank of India (RBI), which allows only non-banking financial companies-microfinance institutions (NBFC-MFIs) to conduct microfinance operations. Hence, a wholly-owned structure was set up for NFL. NFL's operations are spread across central and western India in the states of Gujarat, Madhya Pradesh, Uttar Pradesh, Uttarakhand, Maharashtra, Rajasthan, Haryana and Bihar. Lending is done with a ticket size of Rs. 35,000 through cashless transfers into the borrower's bank account. The company mainly lends to women borrowers through joint liability groups (JLGs). As of March 31, 2022, the microfinance operations of the Group had 236 branches spread over 107 districts in eight states. The company had 4.0 lakh+ active customers.

## Complexity level of the rated instruments

Instrument	Complexity Indicator
PTC Series A1	Moderately Complex
PTC Series A2	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [www.icra.in](http://www.icra.in)

## Annexure-1: Instrument details

Trust Name	Instrument	Date of Issuance / Sanction	Coupon Rate	Maturity Date*	Amount Rated (Rs. crore)	Current Rating
