IIFL Finance Limited: Rating reaffirmed at [ICRA]AAA(SO) for PTCs issued under a gold loan securitisation transaction

Summary of rating action

Trust Name	Instrument*	Initial Amount (Rs. crore)	Amount after Previous Rating Exercise (Rs. crore)	Amount after 21-Jul-2022 payout (Rs. crore)	Rating Action
Shining Metal Trust June 2021	PTC Series A	375.00	NA	6.42	[ICRA]AAA(SO); Reaffirmed

*Instrument details are provided in Annexure-1

Rationale

ICRA has reaffirmed the rating for the pass-through certificates (PTCs) issued under a gold loan securitisation transaction backed by a pool originated by IIFL Finance Limited [IIFL rated; [ICRA]AA(Stable)]. The rating reaffirmation factors in the high amortisation of the PTCs, which has led to the build-up of the credit enhancement (CE) cover over the future PTC payouts. The cash collateral (CC) available in the transaction fully covers the future PTC payouts.

Pool performance summary

A summary of the pool's performance till the 21-Jul-2022 payout has been tabulated below.

Parameter	Shining Metal Trust June 2021
Pool amortisation	82.23%
PTC amortisation	98.29%
Cumulative collection efficiency	102.95%
Cumulative prepayment rate ¹	78.84%
Loss-cum-30+ (% of initial pool principal) ²	0.00%
Loss-cum-90+ (% of initial pool principal) ³	0.00%
Cumulative Cash Collateral (CC) utilisation (% of initial CC)	0.00%
CC available (as % of balance pool principal)	35.17%
Breakeven collection efficiency ⁴ (%)	0.00%
Subordination available (as % of balance pool principal)	90.93%

Key rating drivers

Credit strengths

- Significant amortization of the pool resulting in CC fully covering the future PTC payouts

¹ Principal outstanding at the time of prepayment of contracts prepaid till date divided by initial pool principal

² POS on contracts aged 30+ dpd / Initial POS on the pool

³ POS on contracts aged 90+ dpd / Initial POS on the pool

⁴ It is the minimum collection efficiency required over the balance tenure to ensure all investor payouts are met: (Balance cash flows payable to investor – Cash collateral available) / Balance pool cash flows

Credit challenges

- Not Applicable

Description of key rating drivers highlighted above

The transaction has a turbo PAR structure weekly interest payout at predetermined yield while the entire principal on the PTCs is promised only on the legal final maturity date. The pool has exhibited healthy performance with a cumulative collection efficiency around 103% as of the 21-Jul-2022 weekly payout. The loss-cum-90+ days past due (dpd) have been nil for the pool. The pool has also not seen any loss cum 90+ dpd while the peak loss cum 0+ dpd has been low at 1.77%. Prepayments for the pool have been high at with cumulative prepayments seen at ~79% of the pool as on 21-Jul-2022 weekly payout. There has been no instance of CC utilisation till 21-Jul-2022 weekly payout. As the pool is highly amortised, the credit enhancement (CE) has significantly built up in the transaction. As on 21-Jul-2022 weekly payout the available CC fully covers the entire future PTC payouts.

Performance of past rated pools: ICRA has rated 35 PTC gold loan transactions of IIFL till date. The delinquencies in all the matured pools were low while the prepayments were high. The live pools have shown healthy collections and low delinquencies in the harder buckets with nil 90+ dpd and nil CC utilisation till June 2022 payout.

Key rating assumptions

ICRA's cash flow modelling for rating asset-backed securitisation (ABS) transactions involves the simulation of potential delinquencies (shortfall in principal collection during the tenor of the pool) and prepayments in the pool. The assumptions for the shortfall in collections are arrived at after taking into account the past performance of the originator's portfolio and the rated pools as well as the characteristics of the current pool being evaluated. Additionally, the assumptions may be adjusted to account for the current macroeconomic situation as well as any industry-specific factors that ICRA believes could impact the performance of the underlying pool contracts.

Liquidity position: Superior

The liquidity of the rated transaction is expected to be superior as the CC covers the future payouts entirely.

Rating sensitivities

Positive factors – Not Applicable

Negative factors – Rating is unlikely to be downgraded for the transaction as the CC is fully covering the future PTC payouts.

Analytical approach

The rating action is based on the pool's performance till 21 July 2022 payout, the present delinquency profile of the pool, the CE available in the pool, and the performance expected over the balance tenure of the pool.

Complexity level of the rated instrument

Trust Name	Instrument	Complexity Indicator
Shining Metal Trust June 2021	PTC Series A	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional, or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: www.icra.in
