## Clix Capital Services Private Limited: Provisional [ICRA]A+(SO) rating assigned to Series A PTC backed by merchant loan receivables issued by ML Elixir Oct 2022

### Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
ML Elixir Oct 2022	Series A PTC	68.94	Provisional [ICRA]A+(SO); assigned

\*Instrument details are provided in Annexure I

Rating in the absence of pending actions/documents	No rating would have been assigned as it would not be meaningful
--	--

### Rationale

ICRA has assigned a provisional [ICRA]A+(SO) rating to the pass-through certificates (PTCs) issued under a securitisation transaction originated by Clix Capital Services Private Limited (Clix). The PTCs are backed by a pool of Rs. 89.33-crore merchant loan receivables (underlying pool principal of Rs. 75.76 crore).

The provisional rating is based on the strength of the cash flows from the selected pool of contracts and the credit enhancement (CE) available in the form of (i) a cash collateral (CC) of 8.0% of the initial pool principal to be provided by the originator, (ii) over-collateralisation of 9.0% of the pool principal for Series A PTC, and (iii) the entire excess interest spread (EIS) of 14.18% in the structure, as well as the integrity of the legal structure. The rating is subject to the fulfilment of all the conditions under the structure and the review of the documentation pertaining to the transaction by ICRA.

### Key rating drivers

#### Credit strengths

- Availability of CE in the form of over-collateralisation, EIS and CC
- Absence of overdue contracts as on cut-off date
- All the contracts in the pool have a credit bureau score of 700 and above at the time of onboarding

#### Credit challenges

- High delinquencies seen in the portfolio in the past; limited vintages, post underwriting revision undertaken after Covid-19 pandemic
- Exposed to inherent credit risk associated with the unsecured nature of the asset class; performance of the pool could remain exposed to macro-economic shocks/business disruptions

### Description of key rating drivers highlighted above

As per the transaction structure, the monthly cash flow schedule (for the PTC investors) comprises the promised interest payment to Series A PTC at the predetermined interest rate on the principal outstanding and the scheduled principal payment (to the extent of 91% of pool billing amount). The balance 9% principal is expected to be paid monthly but is not promised. During the tenure of Series A PTC, the collections from the pool, after making the promised payouts to Series A PTC, will be used to make the expected principal payouts to Series A PTC, though a portion of the monthly principal payout (9%) is not promised. All the collections from the pool, after making the promised payouts to Series A PTC, will be used for the prepayment of the principal to Series A PTC. Hence, any excess amount shall be utilised to prepay the principal amounts due on Series A PTC.

The first line of support for Series A PTC in the transaction is in the form of a subordination of 9.00% of the pool principal. The Originator will provide a CC of 8.00% of the total pool principal (amounting to Rs. 6.06 crore). In the event of a shortfall in meeting the promised PTC payouts during any month, the CC will be used to meet such shortfall. Further, in case of excess collections in a month – after meeting the promised PTC payouts – the same would first be used to top up the CC to the extent of past utilisation.

The current pool consists of receivables from Clix's merchant loan under its lending programme with the partner. There were no overdues in the pool as on the cut-off date. The pool has low obligor concentration with the top 10 borrowers having a share of 0.61%. The contracts in the pool have a weighted average seasoning of 4.9 months. The company had reported high delinquencies for this asset class during the early stages of the product, though there was an improvement in the second half of the previous fiscal under the tighter lending regime. The seasoning of the post-Covid portfolio, however, remains limited. The pool's performance is expected to remain exposed to the underlying credit risks inherent in the asset class and macro-economic shocks/business disruptions.

**Past rated pools' performance:** ICRA has ratings outstanding on five PTC transactions of Clix's merchant loan portfolio, including a pool with a replenishment structure and the amortisation period yet to start (as of September 2022 payout). The performance of the remaining four pools has been satisfactory with a cumulative collection efficiency of ~97% and above with nil CC utilisation and nil 180+ days past due (dpd).

### Key rating assumptions

ICRA's cash flow modelling for rating asset-backed securitisation (ABS) transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The mean and the coefficient of variation (CoV) are calibrated based on the values observed in the analysis of the past performance of Clix's merchant loan portfolio. ICRA has also considered the credit quality experience of Clix and ICRA's expectation of the credit quality for merchant loan portfolios. Overall, Clix's merchant loan target borrower segment could be financially vulnerable as well as subject to various seasonality factors.

The resulting collections from the pool – after incorporating the impact of losses and prepayments – are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction. Various possible scenarios are simulated and the incidences of default to the investor as well as the extent of losses are measured. These are then compared with ICRA's internal benchmarks for the target rating. For the transaction, after adjusting for key features like seasoning and risk decile separately in the pool, ICRA estimates the shortfall in the pool principal collection within the pool's tenure at 5.0-6.0%, with certain variability around it. The prepayment rate for the underlying pool is estimated at 1.5-4.5% per annum.

### Liquidity position: Strong

The liquidity of the rated transaction is expected to be strong, supported by the healthy collections expected from the pool of contracts and the presence of a CC amounting to 8.00% of the pool principal amount.

### Rating sensitivities

**Positive factors** – The rating could be upgraded based on the sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and on an increase in the cover available for future PTC payouts from the CE.

**Negative factors** – The rating could be downgraded on the sustained weak collection performance of the underlying pool (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and CE utilisation levels.

## Analytical approach

The rating action is based on the analysis of the performance of Clix's merchant loan portfolio till August 2022, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the CE cover available in the transaction.

Analytical Approach	Comments
Applicable rating methodologies	<a href="#">Rating Methodology for Securitisation Transactions</a>
Parent/Group support	Not Applicable
Consolidation/Standalone	Not Applicable

## Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned rating is provisional and would be converted into a final rating upon the execution of:

1. Trust deed
2. Assignment agreement
3. Legal opinion
4. Trustee letter
5. Chartered Accountant's know your customer (KYC) certificate
6. Any other documents executed for the transaction

## Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

## Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA's Policy on Provisional Ratings available at [www.icra.in](http://www.icra.in).

## About the company

Clix Capital Services Private Limited (Clix) is a non-banking financial company (NBFC) registered with the Reserve Bank of India (RBI). It provides retail financing products (personal loans, business loans, micro, small and medium enterprise (MSME), housing finance, etc). The company, which was incorporated as GE Money Financial Services Pvt Ltd (GE Money) in 1994, formed the non-banking business of the General Electric (GE) Group along with its Group company – GE Capital Services India (GE Capital). In September 2016, this business was acquired by a consortium, comprising AION Capital Partners, Mr. Pramod Bhasin and Mr. Anil Chawla, and rebranded as Clix<sup>1</sup>. In April 2022, Clix Finance India Private Limited (CFIPL; erstwhile GE Capital) was merged with Clix. Following the merger, Clix's portfolio comprises MSME and consumer lending along with healthcare and equipment finance and digital lending (onboarded from CFIPL). Additionally, Clix Housing Finance Private Limited, a wholly-owned subsidiary of Clix, primarily provides housing/mortgage finance products.

<sup>1</sup> GE Money was rechristened Clix Capital Services Private Limited while GE Capital was rechristened Clix Finance India Private Limited

## Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A PTC	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
