## Lendingkart Finance Limited: Rating confirmed as final for SNs backed by unsecured small business loan receivables issued by SBL Sparklers 2022

### Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
SBL Sparklers 2022	SN Series A1	49.94	[ICRA]A+(SO); provisional rating confirmed as final

\*Instrument details are provided in Annexure-I

### Rationale

In October 2022, ICRA had assigned a Provisional [ICRA]A+(SO) rating to securitisation notes (SNs) Series A1 issued by SBL Sparklers 2022. The SNs are backed by a pool of Rs. 68.24-crore unsecured small business loan receivables (underlying pool principal of Rs.51.57 crore) originated by Lendingkart Finance Limited (Lendingkart/Originator; rated [ICRA]BBB+(Stable)). Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

A summary of the performance of the pool after the November 2022 payout month has been provided below.

Parameter	SBL Sparklers 2022
Months post securitisation	1
Pool amortisation	5.09%
SN Series A1 amortisation	6.83%
Cumulative collection efficiency	98.10%
Loss-cum-0+ dpd	1.96%
Loss cum 30+ dpd	0.00%
Loss cum 90+ dpd	0.00%
Average monthly prepayment rate	1.93%
Cumulative cash collateral (CC) utilisation	0.00%

### Key rating drivers

#### Credit strengths

- Availability of credit enhancement in the form of EIS, subordination and CC
- Absence of overdue contracts as on pool cut-off date
- Moderate average seasoning and pre-securitisation of the pool as on the pool cut-off date

#### Credit challenges

- Stress in asset quality amid Covid-19 pandemic as reflected in the high restructuring and write-offs
- Exposed to inherent credit risk associated with the unsecured nature of the asset class; performance of the pool would remain exposed to macro-economic shocks / business disruptions, if any

### Description of key rating drivers highlighted above

According to the transaction structure, the loan pool receivables will be assigned at par to the SN investors. As per the waterfall mechanism for the transaction, the monthly pool collections shall be used for meeting the promised payouts (defined as

interest at predetermined yield and 92.00% of billed principal) to SN Series A1, followed by balance expected principal payouts to SN Series A1 (8.00% of billed principal) and the expected interest payouts to SN Series A2.

The first line of support for SN Series A1 in the transaction is in the form of a subordination of 8.00% of the pool principal. Additionally, the EIS available in the structure will provide credit enhancement support to the transaction. The EIS (~16.1% of the pool principal initially, based on the indicated SN yield, for SN Series A1) will not flow back to the originator and will instead be utilised towards accelerated principal amortisation after the promised and scheduled payouts to the SNs. All prepayment amounts would be passed on to SN Series A1 (till SN Series A1 principal is not fully amortised) every month and future payouts will be revised accordingly. The CC of 8.00% of the initial pool principal, to be provided by Lendingkart, would act as further credit enhancement in the transaction. In the event of a shortfall in meeting the promised SN payouts during any month, the Trustee will utilise the CC to meet the shortfall.

There were no overdues in the pool as on the cut-off date. The geographical concentration of the loan contracts in the current pool is moderate with the top 3 states constituting ~34% of the pool principal. The pool consists of monthly paying loan contracts, with moderate weighted average seasoning (9.67 months) and pre-securitisation amortisation (21.55%). The pool has a high share of contracts (80.12%) with a ticket size of more than Rs. 10 lakhs. The pool would be exposed to inherent credit risk associated with the unsecured nature of the asset class and performance of the pool would remain exposed to macro-economic shocks / business disruptions, if any.

**Performance of past rated pools:** ICRA has rated 33 pools originated by Lendingkart. The performance of the live pools (which have completed at least 2 months post securitisation) has been healthy till date with the cumulative collection efficiency in the range of 94-99% for all the transactions. No CC has been utilised till November 2022 payout.

### Key rating assumptions

ICRA's cash flow modelling for rating asset-backed securitisation (ABS) transactions involves the simulation of potential delinquencies, losses (shortfall in principal collection during the tenor of the pool) and prepayments in the pool. The assumptions for the loss and coefficient of variation (CoV) are arrived at after taking into account the performance of the originator's portfolio as well as the characteristics of the specific pool being evaluated. Additionally, the assumptions may be adjusted to factor in the current operating environment and any industry-specific factors that ICRA believes could impact the performance of the underlying pool of contracts.

After making these adjustments, the expected mean shortfall in principal collection during the tenure of the pool is estimated at 4.5-5.5% of the initial pool principal, with certain variability around it. The prepayment rate for the underlying pool is estimated in the range of 6.0-18.0% per annum.

### Liquidity position: Strong

The liquidity of the rated transaction is expected to be strong, supported by the healthy collections expected from the pool of contracts and the presence of a CC amounting to 8.00% of the pool principal amount. Even assuming a monthly collection efficiency of only 50% in the underlying pool of contracts in a stress scenario, the CC would cover the shortfalls in the promised SN payouts for a period of around 6 months.

### Rating sensitivities

**Positive factors** – The rating could be upgraded on the sustained strong collection performance of the underlying pool of contracts (>95%), leading to lower-than-expected delinquency levels, and on an increase in the cover available for future investor payouts from the credit enhancement.

**Negative factors** – The rating could be downgraded on the sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and credit enhancement utilisation levels.

## Analytical approach

The rating actions are based on the trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

## About the originator

Lendingkart provides unsecured small and medium-sized enterprise (SME) loans. Lendingkart Technologies Private Limited (LTPL), the technology arm of the Ahmedabad-based Lendingkart Group, holds a 100% stake in Lendingkart. Fullerton Financial Holdings Pte Limited (FFH) had a 39.15% stake in LTPL as on March 31, 2022. The Group was started in 2014 by one of the co-founders, Mr. Harshvardhan Lunia, and raised funds from FFH, Saama Capital, Mayfield India, India Quotient, Bertelsmann India Investments, Sistema Asia Fund and Darrin Capital Management.

The Lendingkart Group is a part of the rapidly evolving fintech industry and it leverages technology to underwrite credit to extend loans to the SME segment, which distinguishes its algorithm-driven credit capabilities from the physical credit underwriting performed by various industry players. Loans are given to micro and small enterprises for meeting their working capital needs. The underwriting is based on the scoring by a proprietary algorithm.

## Key financial indicators

Lendingkart Finance Limited (standalone)	FY2020	FY2021	FY2022
Total income	464	510	639

### Complexity level of the rated instrument

Instrument	Complexity Indicator
SN Series A1	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional, or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
