Rationale

The outstanding rating of Power Grid India Corporation of India Limited (PGCIL) factors in the strategic role of Power Grid Corporation of India Limited (PGCIL) in the Indian power sector owing to its role as India's largest power transmission utility and its ownership and near monopoly in the inter-state transmission network, along with the low level of business risks in its core operations. The ratings also factor in the cost-plus transmission tariff structure for majority of the company's operational assets (above 95% of the total gross block) and PGCIL's superior operating efficiency indicated by the availability factor which has remained consistently high over the years. The ratings also take into account the continued capitalisation of transmission assets, which is expected to boost the company's revenues and cash flows going forward. ICRA notes that the asset monetisation through INVIT will enable quick redeployment of capital to build incremental transmission assets going forward. ICRA continues to take into consideration the support from the Government of India (GoI) (guarantees extended for some of PGCIL's borrowing programmes) which enables the company raise long-term funds at competitive rates. The ratings also note that majority of the company's transmission lines are a part of the inter-state transmission system (ISTS) network wherein the billing and collection is through point of connection (PoC) mechanism and the licensee does not have direct exposure to a single discom. The Central Transmission Utility (CTU) receives the bills from all ISTS licensees and collects the payments from counterparties (primarily state distribution utilities) that are part of the transmission service agreement (TSA). The timely collection by CTU from state distribution utilities is ensured by a payment security mechanism which comprises a letter of credit for 1.05 times of monthly billing as per the terms of the TSA, regulation of power supply in case of non-payment of dues and the option of invocation of a tripartite agreement among the RBI, Government of India and state governments. PGCIL's cash collections have continued to be strong since 2003-04 and the resultant payment discipline. ICRA believes that the collection efficiency will be sustained going forward.

The ratings are constrained by the counterparty credit risk associated with the exposure to state distribution utilities, majority of which have a weak to moderate financial profile. However, timely issuance of tariff orders, adequate tariff hikes for reduction of revenue gaps and time-bound recovery of the regulatory assets and reduction of distribution loss levels going forward remain imperative for a sustained improvement in the health of the power distribution sector, reducing the counterparty credit risks for entities serving the power sector, including transmission companies such as PGCIL. ICRA has also taken note of the fact that the CTU function has been separated from PGCIL and a new entity, Central Transmission Utility of India Ltd (a subsidiary of PGCIL), has been designated as the CTU from April 2021. This entity will eventually be owned directly by the GoI. ICRA will continue to monitor the developments in this regard. ICRA's ratings consider the fact that new projects are awarded either on a nomination basis or through a tariff-based competitive bidding. The projects awarded through the

competitive bidding process shall not have cost overruns as passthrough in tariffs, resulting in increased business risks in the core business, although the proportion of such assets as a percentage of the total gross block is expected to remain low in the near future. While PGCIL is exposed to project execution risks, this has reduced compared to the earlier years due to the relatively low capital expenditure planned for the coming years.

The Stable outlook on the [ICRA]AAA rating reflects ICRA's opinion that PGCIL will continue to benefit from the cost-plus nature of transmission tariff of majority of its assets, its satisfactory operational performance and receipt of timely payments from its customers, primarily the state distribution utilities.

Liquidity position: Superior

The liquidity of the company is superior, supported by the regulated nature of operations (which allow for adequate recovery of fixed charges, including debt servicing requirements). This is supplemented by the satisfactory operational track record of the company, with line availability higher than normative line availability for recovery of transmission charges, evident in the availability of 99.8% in FY2022. The collection efficiency is aided by the presence of LC and tripartite agreement and was satisfactory at 97.9% in FY2022. The cash generated from operations coupled with the available liquid cash and undrawn limits is expected to remain sufficient to meet the debt repayment obligations. The average undrawn working capital limits were Rs 4,800 crore in the last 12 months ended March 2022. The same is also supported by the company's superior financial flexibility due to its strong parentage and large asset base with stable cost-plus return.

Analytical approach

Analytical Approach	Comments
Applicable rating methodologies	Corporate Credit Rating Methodology Rating Methodology for Power Transmission Companies Impact of Parent or Group support on an Entity's Credit Rating
Parent/Group support	The rating derives strength from PGCIL's majority ownership by the Government of India (51.3% as on September 30, 2022) and its role in the power sector in India
Consolidation/Standalone	The rating is based on consolidated financial statements of the company. Details in Annexure-2.

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
