## Advance Valves Global LLP: Ratings reaffirmed

### Summary of rating action

Instrument*	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action
Long-term Fund-based - Cash Credit	17.25	18.25	[ICRA]A-(Stable); reaffirmed
Long-term Fund-based - Term loan	6.00	-	
Short-term Non-Fund based - Others	33.50	43.50	[ICRA]A2+; reaffirmed
Short term - Unallocated	8.97	-	
<b>Total</b>	<b>65.72</b>	<b>61.75</b>	

\*Instrument details are provided in Annexure-1

### Rationale

For arriving at the ratings, ICRA has taken a consolidated view of Advance Valves Private Limited (AVPL) and Advance Valves Global LLP (AVGL), together referred to as the Advance Valves Group or the Group. The entities have strong financial, operational and management linkages with AVPL holding a 51% stake in AVGL.

The rating reaffirmation factors in the strong financial risk profile of the Group characterised by sustained healthy cash accruals, comfortable capital structure, sufficient liquidity position and robust debt protection metrics. ICRA's ratings continue to consider the Group's experienced management with a long operational track record in the valve manufacturing industry, its established relations with customers and its ability to secure orders from reputed engineering procurement contractors (EPC), and oil and gas majors on the back of product accreditations. Going forward, the Group's revenue will be supported by a pending order book of around Rs. 140 crore as on February 2023 and healthy inflow of orders from domestic and international clients (~Rs. 325 crore of orders received in FY2023). Given the limited capital expenditure plans, and repayment obligations, the group's liquidity profile is expected to remain satisfactory.

The ratings, however, are constrained by the Group's high working capital intensity due to high inventory holding requirements and receivables and the vulnerability of operating margins to the fluctuations in raw material prices, primarily steel. In addition, the ratings are constrained by high competitive intensity in valve manufacturing industry characterised by the presence of large players in the domestic and overseas markets and small unorganised entities in India.

The Stable outlook reflects ICRA's expectations that the with sustained order intake, the revenue growth, profitability and liquidity of the Group will continue to remain satisfactory.

### Key rating drivers and their description

#### Credit strengths

**Established track record in valve manufacturing business** – The Group has been manufacturing valves used in various industries since 1987. It manufactures valves for the oil and gas, petrochemicals, water, refrigeration and conditioning industries. The promoters have been involved in the valve manufacturing business for more than three decades and have established relationships with customers and suppliers.

**Entry barrier due to stringent approval process and quality control** – The Group manufactures valves, the use of which is critical, especially in the oil and gas sector. The Group has approval for almost all oil and gas majors globally. The approval process and quality control are very stringent in the niche valves segment. Hence, it is extremely difficult for new entrants in the industry to establish a foothold.

**Healthy financial profile backed by minimal utilization of working capital limits and comfortable capital structure and debt protection metrics** - Over the years, the Group has witnessed healthy profitability. The operating margins remained healthy

at 19.5% in FY2020, 21.1% in FY2021 and 18.6% in FY2022. The Group's financial profile also remained healthy, with a strong net worth base of Rs. 189.7 crore and low gearing of 0.1 times as on March 31, 2022. The debt metrics has also remained robust with an interest coverage of 16.7 times and TD/OPBDITA of 0.8 times for FY2022. The Group's financial profile has also benefitted from sustained healthy cash accruals and minimal utilization of working capital limits resulting in sufficient liquidity position.

**Order book position provides future revenue visibility** – The Group has a comfortable unexecuted order book position of Rs. 140 crore as on February 2023 at the consolidated level, which provides near-term revenue visibility. The order turnaround time is three to eight months. Revenue growth is expected to remain stable with expected healthy order intake on an ongoing basis (~Rs. 325 crore order intake in FY2023).

### Credit challenges

**High working capital intensity** – The Group deals with customers with secured payment trends with these being received in phases based on completion of milestones. As a result, the receivable cycle (~130 days) as well as inventory days (~200 days) remain high and this in-turn results in high overall working capital intensity which was 60.2% in FY2022 although this has reduced as compared to 63% FY2021. Going forward, ICRA expects the Group's operations to remain working capital intensive given the nature of industry the company operates in.

**Intense competition in valves industry due to presence of various players** – The Group faces tough competition from big and reputed players such as Emerson, L&T Valves Limited and Flowserve in the domestic and overseas markets as well as various small players in the domestic market while participating in tenders for valves. Therefore, the revenue growth while maintaining current profitability will remain a key monitorable for the Group.

**Margins exposed to raw material price fluctuations** – While the orders are generally back-to-back in nature, the company remains exposed to risk of increase in prices of key raw materials wherein some price variation may have to be accommodated with the suppliers while the customer contracts are fixed price in nature. The in-built margin in customer contracts, at the time of award, takes into account potential upward price variation in raw material prices to some extent.

### Liquidity position: Adequate

The company's liquidity profile is **adequate**, characterised by low working capital utilisation, with an average utilisation of 20.8% of the sanctioned limits of Rs. 32.75 crore for the past 12 months ending December 2022. Further, at the Group level, the free cash and liquid investments were at Rs. 27.1 crore as on March 31, 2022, providing an additional liquidity cushion. The cash flow from operations is expected to remain adequate compared to repayment obligations of Rs. 2.45 crore in FY2024.

### Rating sensitivities

**Positive factors** – ICRA could upgrade the rating if the Group demonstrates a sustained improvement in the working capital cycle (debtors and inventory), along with a significant growth in its revenues, while maintaining healthy profitability margins and credit profile.

**Negative factors** – ICRA may downgrade the ratings if any significant decline in scale or profitability weakens the key credit metrics, or if a stretch in the working capital cycle or a larger-than-projected debt-funded capex adversely impacts the liquidity profile. A specific credit metric that could lead to a downgrade is the total debt/OPBDITA increasing to more than 2.3 times on a sustained basis.

## Analytical approach

Analytical Approach	Comments

Parent/Group Support	Not Applicable
Consolidation/Standalone	The rating is based on the consolidated financial profile of AVPL and AVGL

## About the company

AVPL is promoted by Mr. Uma Shanker and his family. The company is involved in the business of manufacturing valves, catering to the requirements of diverse industries such as oil and gas, power, water infrastructure and heating, ventilation and air-conditioning (HVAC). The company has two manufacturing units in Noida (Uttar Pradesh) and Gagret (Himachal Pradesh). AVPL's Group company, AVGL, is a limited liability partnership (LLP) under the same promoters. It also manufactures valves that cater to the requirements of diverse industries such as oil and gas, power, water infrastructure and HVAC.

### Key financial indicators (Audited) - Consolidated

Consolidated	FY2021	FY2022
Operating income (Rs. crore)	209.0	191.5
PAT (Rs. crore)	27.1	19.3
OPBDIT/OI (%)	21.1%	18.6%
PAT/OI (%)	13.0%	10.1%
Total outside liabilities/tangible net worth (times)	0.4	0.3
Total debt/OPBDIT (times)	0.5	0.8
Interest coverage (times)	19.8	16.7

PAT: Profit after tax; OPBDIT: Operating profit before depreciation, interest, taxes and amortisation

### Key financial indicators (Audited) - Standalone

Standalone	FY2021	FY2022
Operating income (Rs. crore)	107.0	100.2
PAT (Rs. crore)	13.4	10.7
OPBDIT/OI (%)	21.8%	20.0%
PAT/OI (%)	12.5%	10.7%
Total outside liabilities/tangible net worth (times)	0.4	0.6
Total debt/OPBDIT (times)	0.7	1.1
Interest coverage (times)	13.9	11.3

PAT: Profit after tax; OPBDIT: Operating profit before depreciation, interest, taxes and amortisation

## Complexity level of the rated instrument

Instrument	Complexity Indicator
Long-term Fund-based - Cash credit	Simple
Long-term Fund-based - Term loan	Simple
Short-term Non-Fund based - Others	Very Simple
Short term - Unallocated	Very Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
