# Clix Capital Services Private Limited: Rating confirmed as final for PTCs backed by backed by personal loan receivables issued by PL Elder 2023

## **Summary of rating action**

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
PL Elder 2023	Series A PTC	38.58	[ICRA]A+(SO); provisional rating finalised

<sup>\*</sup>Instrument details are provided in Annexure I

#### Rationale

In March 2023, ICRA had assigned a Provisional [ICRA]A+SO) rating to Series A1 PTC issued by PL Elder 2023 Trust. The pass-through certificates (PTCs) are backed by a pool of Rs. 43.85-crore (pool principal; receivables outstanding of Rs. 59.69 crore) originated by Clix Capital Services Private Limited (Clix/originator). Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

A summary of the pool's performance as on April 2023 payouts is shown in the table below.

Parameter	PL Elder 2023
Months post securitisation	2
Pool amortisation	10.10%
Series A PTC Amortisation	11.48%
Cumulative prepayment rate %	5.48%
Cumulative collection efficiency	98.46%
Loss cum 0+ dpd	2.45%
Loss cum 30+ dpd	0.49%
Loss cum 90+ dpd	0.00%
Cumulative cash collateral utilisation	0.00%

## **Key rating drivers**

## **Credit strengths**

- Availability of CE in the form of EIS, principal subordination and CC
- Pool consists of zero overdue and non-restructured contracts as on cut off date

#### **Credit challenges**

- High geographical concentration with top five states contributing to over 51% of the initial pool principal
- Moderation in asset quality witnessed at portfolio level post the pandemic; performance of recent originations (Q3 FY2021 onwards), however, has been better despite the limited track record
- Exposed to inherent credit risk associated with the unsecured nature of the asset class; the pool's performance could also be affected by macro-economic shocks / business disruptions, if any

## Description of key rating drivers highlighted above

The underlying loans follow a monthly payment schedule. As per the transaction structure, the monthly cash flow schedule comprises the promised interest payment to Series A PTC at the predetermined interest rate on the principal outstanding, while the entire principal is promised on the last payout date (i.e., August 20, 2025). During the tenure of Series A PTC, on each

payout date, the pool's collections after meeting the promised Series A PTC interest payouts, will be used to make the expected principal payouts. This principal payout, however, is not promised and any shortfall in making the expected principal payment to PTC Series A would be carried forward to the subsequent payout. The EIS, if any, shall flow back to the Originator on every payout date after making all the payouts to PTC Series A as per the Waterfall Mechanism. Also, in case of a shortfall in meeting the promised PTC payouts during any month, the Trustee will utilise the CC to meet the shortfall.

The first line of support for Series A PTC in the transaction is in the form of a subordination of 12.00% of the pool principal through an equity tranche. Additionally, the EIS of 23.13% of the pool principal provides CE support. A CC of 5.00% of the initial pool principal provided by Clix acts as further CE in the transaction. In the event of a shortfall in meeting the promised PTC payouts during any month, the Trustee will utilise the CC to meet the same.

There were no overdues in the pool as on the cut-off date. The pool has a weighted average seasoning of 6.7 months. It has high geographical concentration with the top five states (Maharashtra, Andhra Pradesh, Telangana, Tamil Nadu and Gujarat) accounting for more than 51% of the pool's principal. The company witnessed a moderation in the asset quality at the portfolio level, post the onset of the pandemic, resulting in a build-up of delinquencies. ICRA notes that a large part of the portfolio stress in the personal loan segment has emanated from the old and/or restructured book. Further, the recent originations (post Covid) have demonstrated a healthy performance, but with a limited track record. The pool's performance will remain exposed to the inherent credit risk associated with the unsecured nature of the asset class. Macro-economic shocks/business disruptions could also impact its performance.

Past rated pools' performance: ICRA has, so far, rated 23 PL pools originated by Clix of which 18 are live. Though collections were impacted for a few months due to the pandemic, live pools, which have completed 3 payouts as of the March 2023 payout date, have reported a healthy cumulative collection efficiency of more than 94%. There has not been any CC utilisation in any of the transactions till date and the CE has built up in all the live pools.

## **Key rating assumptions**

ICRA's cash flow modelling for rating asset-backed securitisation (ABS) transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The mean and the coefficient of variation (CoV) are calibrated based on the values observed in the analysis of the past performance of Clix's loan portfolio. Given the short track record of Clix in the personal loan business, ICRA has considered the credit quality experience of other more established players and ICRA's expectation of the credit quality of personal loans. Clix's target borrower segment could be financially vulnerable as well as subject to various seasonality factors. Though the company resorts to legal recourse for some of the delinquent loans, this may not always be a feasible option particularly given the small ticket size and the unsecured nature of the loans issued.

The resulting collections from the pool – after incorporating the impact of losses and prepayments as above – are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction. Various possible scenarios are simulated and the incidences of default to the investor as well as the extent of losses are measured. These are then compared with ICRA's internal benchmarks for the target rating.

For the current pool, after considering the above-mentioned factors regarding the asset class and after adjusting for key features like seasoning, overdues, ticket size, interest rate, bureau score, and geographical distribution, ICRA estimates the shortfall in the pool principal collection within the pool's tenure at 4.75-5.75%, with certain variability around it. The prepayment rate in the pool is estimated at 3.2-12.0% p.a. with a mean of 8.00%.

## **Liquidity position: Strong**

As per the transaction structure, only the interest amount is promised to the PTC holders on a monthly basis while the principal amount is promised on the scheduled maturity date of the transaction. Also, the cash flows from the pool and the available CE are expected to be comfortable to meet the promised payouts to the Series A PTCs investors.

## **Rating sensitivities**

**Positive factors** – The rating could be upgraded based on the sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and on an increase in the cover available for future PTC payouts from the CE.

**Negative factors** – The rating could be downgraded on the sustained weak collection performance of the underlying pool (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and CE utilisation levels.

## **Analytical approach**

The rating action is based on the Trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA

## About the company

Clix Capital Services Private Limited (Clix) is a non-banking financial company (NBFC) registered with the Reserve Bank of India (RBI). It provides retail financing products (personal loans, business loans, micro, small and medium enterprise (MSME), housing finance, etc). The company, which was incorporated as GE Money Financial Services Pvt Ltd (GE Money) in 1994, formed the non-banking business of the General Electric (GE) Group along with its Group company – GE Capital Services India (GE Capital). In September 2016, this business was acquired by a consortium, comprising AION Capital Partners, Mr. Pramod Bhasin and Mr. Anil Chawla, and rebranded as Clix¹. In April 2022, Clix Finance India Private Limited (CFIPL; erstwhile GE Capital) was merged with Clix. Following the merger, Clix's portfolio comprises MSME and consumer lending along with healthcare and equipment finance and digital lending (onboarded from CFIPL). Additionally, Clix Housing Finance Private Limited, a whollyowned subsidiary of Clix, primarily provides housing/mortgage finance products.

# **Complexity level of the rated instrument**

Instrument	Complexity Indicator		
Series A PTC	Moderately Complex		

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: Click Here
