## Clix Capital Services Private Limited: Rating confirmed as final for PTCs backed by business loan receivables issued by BL Diadem Jan 2023

### Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
BL Diadem Jan 2023	Series A1 SN	29.58	[ICRA]AA(SO); provisional rating confirmed as final

\*Instrument details are provided in Annexure I

### Rationale

In February 2023, ICRA had assigned a Provisional [ICRA]AA(SO) rating to Series A1 SN issued by BL Diadem Jan 2023 Trust. The securitisation notes (SN) are backed by a pool of Rs. 40.69-crore business loan receivables (underlying pool principal of Rs. 32.87 crore) originated by Clix Capital Services Private Limited (Clix/originator). Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

A summary of the pool's performance as on April 2023 payouts is shown in the table below.

Parameter	BL Diadem Jan 2023
Months post securitisation	2
Pool amortisation	7.34%
Series A1 SN Amortisation	8.15%
Cumulative prepayment rate %	1.18%
Cumulative collection efficiency	99.52%
Loss cum 0+ dpd	0.65%
Loss cum 30+ dpd	0.30%
Loss cum 90+ dpd	0.00%
Cumulative cash collateral utilisation	0.00%

### Key rating drivers

#### Credit strengths

- Availability of CE in the form of EIS, subordination and CC.
- Pool consists of zero overdue and no restructured contracts; moreover, more than 99% of contracts have never been delinquent since origination as on cut-off date.

#### Credit challenges

- High geographical concentration in the initial pool with top 3 states accounting for 62.1% in the pool.
- Moderation in the asset quality at portfolio level, post the onset of the Covid-19 pandemic; performance of recent originations (Q3 FY2021 onwards) has, however, been better though the track record remains limited.
- Exposed to inherent credit risk associated with the unsecured nature of the asset class; performance of the pool could also be affected by macro-economic shocks/business disruptions, if any.

## Description of key rating drivers highlighted above

The underlying loans follow a monthly payment schedule. The promised cash flow schedule for Series A1 SN on a monthly basis comprises the interest payment at a predetermined yield on the outstanding SN principal and the principal to the extent of 90% of the billed pool principal amount for each month. The balance 10% is not promised and is to be paid on an expected basis. During the tenure of Series A1 SN, the collections from the pool, after making the promised and expected payouts to Series A1 SN1, as per the waterfall mechanism, would be used for interest payments on the equity tranche.

The first line of support for Series A1 SN in the transaction is in the form of subordination of 10.00% of the pool principal. Additionally, the EIS available in the structure provides CE support. A CC of 10.0% of the initial pool principal provided by Clix acts as further CE in the transaction. In the event of a shortfall in meeting the promised SN payouts during any month, the Trustee will utilise the CC to meet the shortfall.

There were no overdues in the pool as on the cut-off date and the majority (99%) of the contracts in the pool have been regular since origination {demonstrated nil peak days past due (dpd)}. The pool consists of loans with a weighted average seasoning of 7.6 months. It has high geographical concentration with the top 3 states (Maharashtra, Telangana and Delhi) accounting for 62.1% of the pool principal. The performance of Clix's business loan portfolio was adversely impacted by the pandemic, resulting in an increase in the delinquency levels. ICRA notes that a large part of the portfolio stress emanated from the old and/or restructured book while the performance of recent originations (Q3 FY2021 onwards) has been healthy. This notwithstanding, the track record remains limited, and the pool's performance is expected to remain exposed to the underlying credit risks inherent in the asset class and macro-economic shocks/business disruptions.

**Past rated pools' performance:** ICRA has previously rated 17 BL pools, originated by Clix, of which 10 were live as of the April 2023 payout month. Though collections were impacted for a few months due to the pandemic, live pools, which have completed 3 payouts as of the April 2023 payout date, have reported a healthy collection efficiency of more than 97%. There has not been any CC utilisation in any of the transactions till date and the CE has built up in all the live pools.

## Key rating assumptions

ICRA's cash flow modelling for rating asset-backed securitisation (ABS) transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a lognormal distribution. The mean and the coefficient of variation (CoV) are calibrated on the basis of the values observed in the analysis of the past performance of Clix's loan portfolio. Given the short track record of Clix in the business loan business, ICRA has also considered the credit quality experience of other more established players and ICRA's expectation of the credit quality of business loans. The company's target borrower segment could be financially vulnerable as well as subject to various seasonality factors. Though Clix resorts to legal recourse for some of the delinquent loans, this may not always be a feasible option particularly given the small ticket size and the unsecured nature of the loans issued.

The resulting collections from the pool – after incorporating the impact of losses and prepayments as above – are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction. Various possible scenarios are simulated and the incidences of default to the investor as well as the extent of losses are measured. These are then compared with ICRA's internal benchmarks for the target rating.

For the current pool, after considering the above-mentioned factors regarding the asset class and after adjusting for key features like seasoning, overdues, ticket size, interest rate, bureau score, and geographical distribution, ICRA estimates the shortfall in the pool principal collection within the pool's tenure at 5.25-6.25%, with certain variability around it. The prepayment rate in the pool is estimated at 1.6-6.0% p.a. with a mean of 4.00%.

## Liquidity position: Strong

The liquidity of the rated transaction is expected to be strong, supported by the healthy collections expected from the pool of contracts and the presence of a CC amounting to 10% of the pool principal amount. Assuming a monthly collection efficiency of only 50% in the underlying pool of contracts in a stress scenario, the CC would cover the shortfall in the scheduled SN payouts for eight months.

## Rating sensitivities

**Positive factors** – The rating could be upgraded based on the sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and on an increase in the cover available for future SN payouts from the CE.

**Negative factors** – The rating could be downgraded on the sustained weak collection performance of the underlying pool (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and CE utilisation levels.

## Analytical approach

The rating action is based on the Trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA

## About the company

Clix Capital Services Private Limited (Clix) is a non-banking financial company (NBFC) registered with the Reserve Bank of India (RBI). It provides retail financing products (personal loans, business loans, micro, small and medium enterprise (MSME), housing finance, etc). The company, which was incorporated as GE Money Financial Services Pvt Ltd (GE Money) in 1994, formed the non-banking business of the General Electric (GE) Group along with its Group company – GE Capital Services India (GE Capital). In September 2016, this business was acquired by a consortium, comprising AION Capital Partners, Mr. Pramod Bhasin and Mr. Anil Chawla, and rebranded as Clix<sup>1</sup>. In April 2022, Clix Finance India Private Limited (CFIPL; erstwhile GE Capital) was merged with Clix. Following the merger, Clix's portfolio comprises MSME and consumer lending along with healthcare and equipment finance and digital lending (onboarded from CFIPL). Additionally, Clix Housing Finance Private Limited, a wholly-owned subsidiary of Clix, primarily provides housing/mortgage finance products.

### Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A1 SN	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
