*Instrument details are provided in Annexure I; § Instruments transferred following merger with HDFC Limited – All facilities, post transfer from HDFC Limited, are unsecured in nature

Rationale

HDFC Bank Limited's ratings continue to be supported by its strong market position as one of the three systemically important banks and the largest private sector bank in India. The ratings take into account the conclusion of the merger with HDFC Limited, which is effective from July 1, 2023. The merger is expected to drive up the scale of the bank meaningfully from the current level, strengthen its presence in certain retail segments and offer more growth opportunities by virtue of the acquired customer base. The HDFC Group, comprising HDFC Bank and its subsidiaries, has a presence in various segments in the financial services sector, supplementing the bank's strong growth over the years.

The ratings also derive comfort from the bank's strong capitalisation profile, with the CET I at 16.40% of the risk-weighted assets (RWAs) as on March 31, 2023, as well as its ability to raise capital as demonstrated in the past. HDFC Bank's capital position is further reinforced by its healthy earnings profile and comfortable asset quality, leading to low credit costs. Given HDFC Limited's robust capital and earnings profile (Tier I of 23.80% as on March 31, 2023, and return on average managed assets (RoMA) of 2.1% in FY2023), ICRA expects the bank to maintain a strong capital and earnings profile post-merger. Additionally, the ratings factor in the bank's strong and granular resource base, which is supported by its expansive retail franchise and widespread branch network, which has contributed to one of the lowest costs of interest-bearing funds in the industry.

While the bank's current operating profitability remains healthy, its ability to realise synergies from HDFC Limited's operations as well as replace HDFC Limited's borrowings with lower-cost funds will be key for a further improvement in its operating profitability from the current level.

The Stable outlook on the rating reflects ICRA's expectation that HDFC Bank will continue to benefit from its retail franchise, which will support its growth and profitability. Moreover, ICRA expects it to maintain the solvency (net non-performing advances (NNPA)/core equity), return on assets (RoA) and capital cushions at levels better than the negative triggers.

Key rating drivers and their description

Credit strengths

Strong market position as largest private sector bank – HDFC Bank is one of the three systemically important banks in India with an 11.8% market share in the banking sector's advances as of March 31, 2023. It is also the second largest bank in the country. Following the conclusion of the merger with HDFC Limited, the bank's overall scale has increased meaningfully. Apart from the existing two subsidiaries, namely HDFC Securities Limited (engaged in securities broking) and HDB Financial Services Limited (a non-banking financial company; NBFC), the additional subsidiaries/associates of HDFC Limited, including HDFC Asset Management Company Limited, HDFC Life Insurance Company Limited, and HDFC Ergo General Insurance Company Limited, have come under the bank's direct ownership/into its fold. While there have been arrangements among HDFC Group companies to cross-sell products, HDFC Bank, with its post-merger subsidiaries/associates, will have a wide presence across various financial services verticals like life insurance, general insurance, securities broking, asset management, etc. This will allow it to provide a diverse range of financial services to its customers, thereby enhancing its customer engagement and retention strategy, particularly in the retail segments.

At the standalone level, the bank has continued to sustain a strong growth momentum, which has usually remained higher than the banking system's growth. As on March 31, 2023, HDFC Bank's overall net advances grew 16.9% year-on-year (YoY) to Rs. 16.01 lakh crore, led by the strong growth seen across segments.

Strong capitalisation profile – HDFC Bank's capitalisation ratios remained strong with the CET I and Tier I at 16.40% and 17.13%, respectively, as on March 31, 2023. The last capital raise by the bank was during July-August 2018 when its CET I was 12.12%¹ and it raised Rs. 23,716 crore (281 basis points (bps) of RWAs as on June 30, 2018). Subsequently, its capital position has been supported by its healthy capital accretion, sustained over the years, even during extended periods of uncertainty, including the Covid-19 pandemic-affected years of FY2021-FY2022. Similarly, HDFC Limited reported a Tier I of 23.80% as on March 31, 2023. Hence, the post-merger capital position is expected to remain strong.

As per ICRA's estimates, HDFC Bank's current capital position and its internal capital generation are expected to support medium-term growth and absorb any unexpected asset quality shocks even after the conclusion of the merger, while remaining well above the negative triggers. All the subsidiaries (including the incoming subsidiaries upon the merger) are adequately capitalised and the bank will be able to provide requisite capital support if needed. Furthermore, it has demonstrated the ability to raise significant capital in the past, which is expected to facilitate the raising of growth capital if required.

Low cost of funds supported by extensive retail franchise – The bank's deposit base grew at a healthy pace to Rs. 18.83 lakh crore as on March 31, 2023 (20.8% YoY growth), driven by its widespread branch network. The low-cost current account and savings account (CASA) ratio stood at 44.4% as on March 31, 2023, which is comparable to the private sector average of ~44-45%. Additionally, the share of the top 20 depositors in total deposits stood at 4.55% as on March 31, 2023, the lowest among peer banks, reflecting the granularity of the deposit base. HDFC Bank has continued to maintain a competitive cost of interest-bearing funds in relation to the private sector average and large peer banks, even while continuing to mobilise deposits at a healthy pace.

HDFC Limited and HDFC Bank had total assets of Rs. 7.27 lakh crore and Rs. 24.66 lakh crore, respectively, as on March 31, 2023. With the conclusion of the merger, the bank is expected to replace HDFC Limited's borrowings with lower-cost funds over the next few years. The ability to maintain the strong growth momentum as well as the pace of mobilising granular low-cost funds will be key for supporting a further improvement in the operating profitability level.

¹ As on June 30, 2018, as per Basel III disclosures

Post-merger earnings profile expected to remain healthy – HDFC Bank’s profitability levels are supported by the strong and consistent growth in net advances, steady fee income and comfortable asset quality levels, resulting in robust operating profitability. Despite the relatively elevated credit costs in relation to the past, the overall profitability levels have remained healthy with the RoA at 1.94-1.95% during FY2022-FY2023. Additionally, the sizeable floating and contingency provision of Rs. 11,150 crore (0.70% of standard advances), as on March 31, 2023, is expected to provide adequate relief from potential asset quality stress. Similarly, HDFC Limited reported a strong RoMA of 2.0-2.1% during FY2022-FY2023. Hence, despite post-merger integration-related expenses, the bank is expected to continue maintaining its profitability levels, which will support its growth.

Credit challenges

Impact of material weakening of macroeconomic factors a monitorable – HDFC Bank has consistently maintained comfortable asset quality levels over the years, which has also kept its credit costs at a lower level. The fresh NPA generation rate increased relatively during FY2022-FY2023 (annualised rate of 2.38% and 1.79%, respectively) due to the impact of the pandemic. Nevertheless, the headline asset quality metrics have remained comfortable with the gross NPAs (GNPAs) at 1.12% and NNPAAs at 0.27% as on March 31, 2023. This was supported by meaningful recoveries and upgrades, given the granularity of the slippages in the recent past. Similarly, HDFC Limited reported comfortable asset quality indicators with GNPAs and NNPAAs of 1.18% and 0.69%, respectively, as on March 31, 2023. Hence, ICRA expects the overall asset quality metrics to remain at comparable levels, although a severe impact due to the material weakening of macroeconomic factors such as the steep rise in interest rates, currency depreciation and high inflation could remain a monitorable for the asset quality.

Environmental and social risks

While banks like HDFC Bank do not face material physical climate risks, they are exposed to environmental risks indirectly through their portfolio of assets. If the entities or businesses, to which banks and financial institutions have an exposure, face business disruptions because of physical climate adversities or if such businesses face climate transition risks because of technological, regulatory or customer behaviour changes, it could translate into credit risks for banks. However, such risks are not material for HDFC Bank as it benefits from adequate portfolio diversification. Further, the lending is typically short-to-medium term, allowing it to adapt and take incremental exposure to businesses that face relatively fewer downside environmental risks. Consequently, while the bank does not face material climate risks in the near to medium term, such risks could materialise in the long term.

With regard to social risks, data security and customer privacy are among the key sources of vulnerability for banks as material lapses could be detrimental to its reputation and invite regulatory censure. After the instances of technical outages faced by HDFC Bank, the regulator had imposed restrictions on some of its business activities in December 2020. Subsequently, the bank made requisite investments to enhance its digital interface and all these restrictions were lifted by the regulatory body in March 2022. HDFC Bank is generally seen to be operating responsibly in terms of its selling practices and it contributes to promoting financial inclusion by lending to the under-served segments. Its lending practices remain prudent, as reflected in the healthy asset quality numbers in this segment compared with its peers.

Liquidity position: Superior

HDFC Bank’s (consolidated) daily average liquidity coverage ratio (LCR) stood at 116% in Q4 FY2023 (112% in Q4 FY2022), which is above the regulatory requirement of 100%. Similarly, the net stable funding ratio (NSFR) stood at 119% as on March 31, 2023, exceeding the regulatory ask of 100%. Besides this, HDFC Bank maintains statutory liquidity ratio (excess SLR) holdings, which are significantly above the regulatory level. This can be utilised to avail liquidity support from the Reserve Bank of India (RBI; through repo) apart from the marginal standing facility of the RBI in case of urgent liquidity requirement.

Rating sensitivities

Positive factors – Not applicable as the ratings for all the instruments are at the highest possible levels.

Negative factors – ICRA could assign a Negative outlook or downgrade the ratings if there is a material deterioration in the asset quality or capital position, leading to the weakening of the solvency profile with NNPA/core equity exceeding 15% on a sustained basis. Further, a sustained RoA of less than 1.0% (annualised) and/or a decline in the capital cushions over the regulatory levels to less than 4% at the CET I level on a sustained basis will remain negative triggers. A material weakening in the bank's liability franchise, thereby impacting its resource profile, will also remain a negative trigger.

Analytical approach

Analytical Approach	Comments
Applicable rating methodologies	ICRA's Rating Methodology for Banks and Financial Institutions ICRA's Rating Methodology on Consolidation
Parent/Group support	Not Applicable
Consolidation/Standalone	For arriving at the ratings, ICRA has considered the standalone financials of HDFC Bank. However, in line with ICRA's limited consolidation approach, the capital requirement of the bank's subsidiaries has been factored in. In ICRA's view, the bank's subsidiaries are well capitalised and largely self-sufficient for their growth capital requirements and any capital infusion in the near to medium term in the subsidiaries is expected to remain limited in relation to the bank's overall profits.

About the company

HDFC Bank Limited is a systemically important as well as the largest private sector bank in India with an 11.8% market share in the banking sector's advances as on as on March 31, 2023. On April 4, 2022, a composite scheme of amalgamation with its promoter, HDFC Limited, was announced. After obtaining the necessary approvals, the merger was concluded and effective from July 1, 2023.

With the merger, the bank has a presence in the banking, insurance (HDFC Life Insurance Company Limited and HDFC Ergo General Insurance Company Limited), and asset management (HDFC Asset Management Company Limited) segments and is a large player in the Indian financial system, while it will sell a materially high stake in the education loans business housed under HDFC Credila Financial Services Limited. Besides this, HDFC Limited's subsidiaries will now operate as direct subsidiaries/associates of the bank. Furthermore, given the retail-oriented nature of HDFC Limited's portfolio, the overall share of retail advances is expected to rise from the current level.

As of March 31, 2023, the bank had 7,821 branches. It has three overseas branches, one each in Dubai, Bahrain, and Hong Kong, as well as two representative offices, one each in the United Arab Emirates and Kenya. Further, it has an offshore banking unit at International Financial Services Centre (IFSC) in GIFT City, Gandhinagar (Gujarat).

Key financial indicators (standalone)

HDFC Bank Limited	FY2021	FY2022	FY2023

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)

Key features of rated debt instruments

The servicing of the Basel III Tier II bonds and infrastructure bonds is not subject to any capital ratios and profitability. However, the Basel III Tier II bonds are expected to absorb losses once the point of non-viability (PONV) trigger is breached in the RBI's opinion. The rated Basel III Tier II instruments are hybrid subordinated debt instruments with equity-like loss-absorption features. Such features may translate into higher loss severity vis-à-vis conventional debt instruments.

Annexure II: List of entities considered for consolidated analysis

Company Name	Ownership	Consolidation Approach

About ICRA Limited:

ICRA Limited was set up in 1991 by leading financial/investment institutions, commercial banks and financial services companies as an independent and professional investment Information and Credit Rating Agency.

Today, ICRA and its subsidiaries together form the ICRA Group of Companies (Group ICRA). ICRA is a Public Limited Company, with its shares listed on the Bombay Stock Exchange and the National Stock Exchange. The international Credit Rating Agency Moody's Investors Service is ICRA's largest shareholder.

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website www.icra.in or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated. All information contained herein must be construed solely as statements of opinion, and ICRA shall not be liable for any losses incurred by users from any use of this publication or its contents.
