Rationale

On August 08, 2023, Svatantra Microfin Private Limited (SMPL) announced that its board of directors had approved a transaction involving the acquisition of 100% of the total issued and paid-up equity share capital of Chaitanya India Fin Credit Private Limited (CIFCPL) from the existing shareholders of CIFCPL, viz. Navi Finserv Limited (NFL) and Navi Technologies Limited (NTL). The completion of the transaction is subject to the receipt of approval from the Reserve Bank of India and the satisfaction of other conditions set forth in the share purchase agreement. Upon the completion of the transaction, CIFCPL shall become a wholly-owned subsidiary of SMPL.

ICRA takes note of the announcement and that the proposed transaction is subject to approvals from various regulatory authorities. The combined assets under management of the two companies would make SMPL the second largest microfinance institution in India and it would benefit from the increase in its scale and operations. The company would require additional equity capital for the proposed acquisition, which is expected to be raised from the promoters. ICRA believes SMPL will continue receiving regular capital support from its promoters to meet its envisaged growth.

In ICRA's opinion, the aforementioned announcement and the proposed transaction are not expected to have any adverse impact on the company's credit profile. SMPL is expected to carry out its business in ordinary course till the requisite approvals are in place from the regulatory authorities and the transaction is completed. Complexity level of the rated instruments

Instrument	Complexity Indicator
Subordinated debt	Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
