Infina Finance Private Limited: Rating reaffirmed; rated amount enhanced

Summary of rating action

Instrument*	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action
Commercial paper programme	2,500.00	3,000.00	[ICRA]A1+; assigned/reaffirmed
Commercial paper programme (IPO financing)	2,000.00	2,000.00	[ICRA]A1+; reaffirmed
Total	4,500.00	5,000.00	

*Instrument details are provided in Annexure I

Rationale

The rating factors in the financial flexibility enjoyed by Infina Finance Private Limited (Infina) by virtue of being an associate of the Kotak Mahindra Bank Group. Kotak Mahindra Capital Company Limited (KMCC), a wholly-owned subsidiary of Kotak Mahindra Bank Limited {KMBL; rated [ICRA]AAA (Stable)}, holds a 49.99% stake in Infina while the balance is held by the Kotak family through other closely-held entities. The rating also considers the company's strong capitalisation.

Infina's earnings profile is, however, exposed to the volatility in the capital markets as loan against securities (LAS) accounts for 89% of its loan book and demand for LAS could be impacted by market cycles. The company's profitability was also impacted in FY2023 by the regulatory restrictions on the initial public offering (IPO) financing business. Infina undertakes proprietary positions in the equity market, which adds volatility to its profitability. Considering the performance of long-short strategy in FY2023 and uncertainty in capital markets the long- short book was wound down in March 2023. Further, the loan book is concentrated, given the single loan product and the moderate scale of the loan book, while the liabilities are also concentrated towards commercial paper (CP) funding. However, Infina's comfortable asset quality and history of negligible credit losses provide comfort.

While Infina's gearing remains modest, it typically increases for ~1-2 weeks when the company utilises its CP for proprietary IPO applications. The company maintains the regulatory capital requirements on a continuous basis, including the borrowings for the proprietary IPO book.

Key rating drivers and their description

Credit strengths

Support from Kotak Mahindra Bank Group – KMCC (wholly-owned subsidiary of KMBL) held a 49.99% stake in Infina, as on June 30, 2023, while closely-held entities of the Kotak family held the balance. As it is an associate of the Kotak Mahindra Bank Group, Infina enjoys considerable financial flexibility in raising funds at competitive rates. ICRA expects support from the promoters to be forthcoming in case of any requirement. Further, the company's board has senior executives from the Kotak Mahindra Bank Group. Infina's senior management has been with other Kotak Group entities before joining the company.

Strong capitalisation – The company's capitalisation remains strong with a net worth of Rs. 2,389 crore as on June 30, 2023 and a modest gearing of 0.85 times. The Tier I capital adequacy ratio stood at 54.8% as on June 30, 2023. The strong capitalisation has been supported by internal accruals and the moderate scale of operations. With expectations of an increase in the scale of the loan book, ICRA expects Infina's borrowings and gearing to increase in the near to medium term. However, the existing capitalisation is likely to support the growth in the medium term.

Credit challenges

Volatility in earnings profile – Proprietary trading (both realised and unrealised gains), Income from Long-term investments and interest income from LAS have been the major sources of income for Infina (LAS accounted for 89% of the overall loan book as of June 30, 2023). As a result, the revenue profile remains significantly exposed to the inherent volatility in the securities market. The company reported a profit after tax (PAT) of Rs. 106 crore in FY2023 compared to Rs. 270 crore in FY2022. With the volatility in equity markets, the net gains on the investment book declined to Rs. 17 crore in FY2023 from Rs. 232 crore in FY2022. Further, net interest income was lower in FY2023 due to the compression in the spreads for the LAS book with the increased cost of short-term funding through CPs and the regulatory restrictions on the IPO financing business. This was partly offset by lower operating expenses. The company wound down its proprietary trading book in March 2023, given its outlook on the equity market. Hence, profitability would be driven by the interest spreads and the scale of the LAS portfolio in the near term. Infina's profitability improved in Q1 FY2024 with a PAT of Rs. 82 crore against a net loss of Rs. 6 crore in Q1 FY2023.

Concentration in loan book and liabilities – The loan book grew to Rs. 3,168 crore as on June 30, 2023 from Rs. 2,776 crore as on March 31, 2023. While the company has been diversifying into the retail segment, the loan book largely comprises larger ticket size promoter and high-net-worth individual (HNI) LAS. It remains concentrated with the top 20 exposures forming a sizeable portion of the portfolio (86% of the portfolio and 114% of the net worth as on June 30, 2023). Given the LAS-focussed portfolio, the size of the loan book and the value of the collateral remain exposed to the inherent volatility in the capital markets. ICRA takes comfort from the lending against liquid securities and the adequate security cover, which mitigates the credit risk. Infina's asset quality remains comfortable with no history of credit losses.

The liabilities remain concentrated with the entire borrowings from CPs. The dependence on CPs exposes the company to market volatility, which could constrain funding availability. ICRA, however, notes Infina's policy of maintaining liquidity on the balance sheet for meeting repayments due in the next 45 days. Also, the majority of the loan book has put/call options at 3 months/6 months/1 year, which can be exercised for liquidity management if required.

Liquidity position: Strong

As on August 31, 2023, Infina had a free cash and bank balance and liquid investments of Rs. 511 crore against the total debt (CP) outstanding of Rs. 1,340 crore maturing between September 2023 and February 2024. The liquidity is further supported by the call/put options in the loan book at 3 months/6 months/1 year, which can be exercised for liquidity management. This led to positive cumulative gaps across all the buckets as per the Statement of Structural Liquidity as on July 31, 2023. Given the reliance on CPs, the company's ability to roll over its borrowings will remain a key rating monitorable. ICRA, however, notes that Infina has the ability to raise funds at competitive rates as it is an associate of the Kotak Mahindra Bank Group.

Rating sensitivities

Positive factors – Not applicable

Negative factors – A material change in the expected level of support from the Kotak Mahindra Bank Group or a significant deterioration in the credit risk profile of the Kotak Mahindra Bank Group could warrant a rating downgrade.

About the company

Infina Finance Private Limited is a non-deposit taking non-banking financial company (NBFC) involved in lending against securities. It also has private equity investments though the scale remains small in relation to total assets. The company's net worth was built in 2006 when certain strategic investments were divested, with Infina deriving huge capital gains. Infina is an associate company of the Kotak Group, with Kotak Mahindra Capital Company Limited (KMCC), a wholly-owned subsidiary of KMBL, holding a stake of 49.99% in the company. The balance is closely held by the Kotak family.

Complexity level of the rated instruments

Instrument	Complexity Indicator
Commercial paper programme (IPO financing)	Very Simple
Commercial paper programme	Very Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
