## Clix Capital Services Private Limited: Rating confirmed as final for PTCs backed by personal loan receivables issued by Mooncalf 2023

### Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
Mooncalf 2023	Series A1(a) PTC	16.79	[ICRA]AA+(SO); provisional rating confirmed as final
	Series A1(b) PTC	1.87	[ICRA]A(SO); provisional rating confirmed as final

\*Instrument details are provided in Annexure I

### Rationale

In October 2023, ICRA had assigned rating of Provisional [ICRA]AA+(SO) to the Series A1(a) pass-through certificate (PTC) and Provisional [ICRA]A(SO) to the Series A1(b) PTC issued by Mooncalf 2023 trust. The pass-through certificates (PTCs) are backed by a pool of Rs. 20.73-crore (pool principal; receivables of Rs. 27.97 crore) personal loan (PL) receivables originated by Clix Capital Services Private Limited (Clix). As the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

A summary of the pool's performance after the January 2024 payouts is shown in the table below:

Parameter	Mooncalf 2023
Months post securitisation	3
Pool amortisation	18.4%
Series A1(a) PTC amortisation	22.7%
Series A1(b) PTC amortisation	0.00%
Cumulative prepayment rate %	10.0%
Cumulative collection efficiency	98.0%
Loss cum 0+ dpd	3.2%
Loss cum 30+ dpd	1.6%
Loss cum 90+ dpd	0.1%
Cumulative cash collateral utilisation	0.0%

### Key rating drivers

#### Credit strengths

- Availability of CE in the form of EIS, subordination and CC
- Nil overdue contracts in the pool; ~98% of the contracts have never been delinquent since origination as on the cut-off date

#### Credit challenges

- Moderately high geographical concentration in the initial pool with top 3 states accounting for ~46% of the initial pool principal
- Exposed to inherent credit risk associated with the unsecured nature of the asset class; pool's performance could also be affected by any macro-economic shocks/business disruptions, if any

### Description of key rating drivers highlighted above

The first line of support for Series A1(a) PTC in the transaction is in the form of a subordination of 19.00% of the pool principal (includes principal payable to Series A1(b) PTC). After Series A1(a) PTC has been fully paid, subordination of 10.00% of the pool

principal (includes equity tranche/OC) will be available for Series A1(b) PTC. Further credit support is available in the form of an EIS of 21.60% for both series of PTCs. A CC of 5.00% of the initial pool principal, to be provided by Clix, would act as further CE in the transaction. In the event of a shortfall in meeting the promised PTC payouts during any month, the Trustee will utilise the CC to meet the same.

As per the transaction structure, the equity tranche PTC payouts are completely subordinated to the Series A1 PTC payouts. Till March 17, 2026, the collections from the pool will be used for making the promised interest payouts to PTC Series A1(a) and A1(b) on a pari-passu basis. After making the promised interest payouts to Series A1(a) and A1(b) PTCs, collections will be used to make the expected principal payouts to Series A1(a) PTC till its redemption followed by the expected principal payout to PTC Series A1(b). The entire principal repayment to PTC Series A1(a) and A1(b) is promised on the scheduled maturity date of the respective tranches. From March 18, 2026 till the final maturity date, the collections from the pool will be used for making the promised interest payouts to Series A1(a) and A1(b) PTCs on a pari-passu basis. After this, collections will be utilised for the redemption of PTC Series A1(a) and A1(b) on a pari-passu basis. The EIS available after meeting the expected and promised PTC payments will flow back to the originator on a monthly basis. All prepayment amounts would be passed on to PTC Series A1(a) till March 17, 2026. From March 18, 2026, the prepayment amounts would be passed on to Series A1(a) and A1(b) PTCs on a pari-passu basis for the respective amounts outstanding till complete redemption.

There were no overdues in the pool as on the cut-off date. The pool had a weighted average seasoning of ~8 months as on cut off date. It had moderately high geographical concentration with the top 3 states (Maharashtra, Tamil Nadu and Karnataka) accounting for ~46% of the initial pool's principal. The company had witnessed a moderation in the asset quality at the portfolio level, post the onset of the Covid-19 pandemic, resulting in a build-up of delinquencies. ICRA notes that a large part of the portfolio stress in the PL segment has emanated from the old and/or restructured book. Furthermore, the recent originations (post August 2020) have demonstrated a healthy performance, but with a limited track record. The pool's performance will remain exposed to the inherent credit risk associated with the unsecured nature of the asset class. Macro-economic shocks/business disruptions could have a further bearing on the performance.

**Past rated pools' performance:** ICRA has, so far, rated 27 PL pools originated by Clix, of which 21 were live as of the January 2024 payout month. Though collections were impacted for a few months due to the pandemic, the live pools (which have completed 3 payouts) as of the December 2023 payout date, have reported a healthy cumulative collection efficiency of more than 94%. There has not been any CC utilisation in any of the live transactions till date and the CE has built up in all the live pools. The matured pools have reported a cumulative collection efficiency of around 90% till the last payout month.

### Key rating assumptions

ICRA's cash flow modelling for rating asset-backed securitisation (ABS) transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The mean and the coefficient of variation (CoV) are calibrated on the basis of the values observed in the analysis of the past performance of Clix's loan portfolio. Given Clix's short track record in the PL business, ICRA has also considered the credit quality experience of other more established players and ICRA's expectation of the credit quality of PLs. Clix's target borrower segment could be financially vulnerable as well as subject to various seasonality factors. Though the company resorts to legal recourse for some of the delinquent loans, this may not always be a feasible option particularly given the small ticket size and the unsecured nature of the loans issued.

The resulting collections from the pool – after incorporating the impact of losses and prepayments as above – are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction. Various possible scenarios are simulated and the incidences of default to the investor as well as the extent of losses are measured. These are then compared with ICRA's internal benchmarks for the target rating.

For the current pool, after considering the above-mentioned factors regarding the asset class and after adjusting for key features like seasoning, overdues, ticket size, interest rate, bureau score, and geographical distribution, ICRA estimates the shortfall in the pool principal collection within the pool's tenure at 5.5-6.5%, with certain variability around it. The prepayment rate in the pool is estimated at 3.2-12.0% p.a. with a mean of 8.00%.

## Liquidity position: Strong for both the tranches

The liquidity for PTC Series A1(a) and PTC Series A1(b) is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~5.75 times and ~4.25 times the estimated loss in the pool for PTC Series A1(a) and PTC Series A1(b), respectively.

## Rating sensitivities

**Positive factors** – The rating could be upgraded based on the sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and on an increase in the cover available for future PTC payouts from the CE.

**Negative factors** – The rating could be downgraded on the sustained weak collection performance of the underlying pool (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and CE utilisation levels and weakening in the credit profile of the servicer could also exert pressure on the rating.

## Analytical approach

The rating action is based on the Trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

## About the company

Clix Capital Services Private Limited (Clix) is a non-banking financial company (NBFC) registered with the Reserve Bank of India (RBI). It provides retail financing products (personal loans, business loans, micro, small and medium enterprise (MSME), etc). The company, which was incorporated as GE Money Financial Services Pvt Ltd in 1994, formed the non-banking business of the General Electric (GE) Group along with its Group company – GE Capital Services India (GE Capital). In September 2016, this business was acquired by a consortium, comprising AION Capital Partners, Mr. Pramod Bhasin and Mr. Anil Chawla, and rebranded as Clix<sup>1</sup>. In April 2022, Clix Finance India Private Limited (CFIPL; erstwhile GE Capital) was merged with Clix. Following the merger, Clix's portfolio comprises MSME and consumer lending along with healthcare and equipment finance and digital lending (onboarded from CFIPL). Additionally, Clix Housing Finance Private Limited, a wholly-owned subsidiary of Clix, primarily provides housing/mortgage finance products.

### Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A1(a) PTC	Moderately Complex
Series A1(b) PTC	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
