Fund-based short-term facilities from banks	100.00	100.00	[ICRA]A2; reaffirmed
Total	**1,142.78**	**1,142.78**	

**Instrument details are provided in Annexure I; #Sub-limit of fund-based long-term facilities from banks*

Rationale

The ratings reaffirmation takes into consideration Sakthi Finance Limited's (SFL) track record in the retail financing business and its established franchise, which has evolved over the last six decades of operations. The ratings also factor in the company's demonstrated ability to raise market borrowings via non-convertible debentures (NCDs), which are retail in nature, through public placement over the years. The ratings are, however, constrained by SFL's geographically concentrated operations, the highly competitive business environment, and its subdued profitability indicators. The ratings also take into consideration the company's moderate asset quality profile, with its gross stage 3 assets (GS3) standing at 5.7% (provisional) as of September 2023.

SFL's capitalisation profile is adequate for its medium-term growth plans; its gearing stood at 6.0 times as of September 2023 (provisional; 5.9 times as of March 2023). ICRA notes that SFL is planning to raise Rs. 200.00 crore through the public issuance of debentures in February 2024, which is expected to support its liquidity position in the near term. Going forward, it would be crucial for the company to diversify its funding profile to support portfolio growth while maintaining an adequate liquidity profile.

ICRA notes that SFL had stopped taking fresh deposits since H2 FY2021 while the renewal of existing deposits was discontinued from April 2021, following the Reserve Bank of India's (RBI) observations on the sub-debt raised by the company via private placements till FY2020[1]. Accordingly, the deposits outstanding were run down over the last two years and the same, along with the non-compliant sub-debt, stood at ~Rs. 262 crore as of September 2023, which is estimated to be within the permissible deposit cap of 1.5 times of the net owned funds (NOF). From September 2023, SFL started accepting fresh deposits again and it also commenced the renewal of existing deposits. The company will mobilise incremental public deposits as an when these sub-debts come up for maturity over the next few years. However, it would be required to augment its statutory liquid assets for the non-compliant sub-debt, in case of any adverse observation by the RBI regarding the same.

[1] The sub-debt raised by the company until FY2020, via a private placement to retail/high-net-worth individual (HNI) investors (Rs. 234 crore outstanding as of December 2023), was not in adherence to the RBI's guidelines on raising money via private placement by a non-banking financial company (NBFC)

Key rating drivers and their description

Credit strengths

Established franchise and track record in regional market – SFL has a track record of more than six decades in the vehicle finance segment, with operations across Tamil Nadu, Kerala, Andhra Pradesh and Karnataka. It has a good understanding of the target segments, mainly the used commercial vehicle (CV) segment, and has established customer relationships. The company has leveraged the franchise by raising market borrowings via NCDs, which are retail in nature, through public placement over the years. SFL has demonstrated its ability to do the same by raising Rs. 666 crore over the last five and half years (FY2019-H1 FY2024), with each issuance having a sizeable number of retail investors and an average investment size of about Rs. 5 lakh.

ICRA notes that the Sakthi Group's presence in related businesses, like automotive dealerships, has aided effective origination, prudent appraisal, and good market responsiveness, monitoring and collections. The company has a branch-centric operating model with an in-house origination team, which is responsible for collections, while the credit sanctions are centralised. SFL conducts credit bureau checks to screen its customers, followed by a field investigation and an income assessment and viability analysis as a part of its loan origination process. It has implemented a workflow management system in most of its branches, which enables the management to monitor sourcing and collection activities on a real-time basis.

Adequate capitalisation, considering medium-term growth plans – SFL has an adequate capitalisation profile with a gearing[2] of 6.0 times as of September 2023 (5.9 times as of March 2023 and 6.1 times as of March 2022). ICRA notes that the company's modest near-term portfolio growth expectations would keep its capital structure under control. SFL envisages to reduce its gearing below 6.0 times over the medium term, supported by the raising of capital (including via disposal of non-core assets). This would help the company improve its portfolio growth further over the medium to long term. SFL's total capital adequacy stood at 17.3% (provisional; Tier I at 13.4%) as of September 2023.

Credit challenges

Regionally concentrated operations – SFL has a regionally concentrated portfolio with Tamil Nadu and Kerala accounting for 95% of the total portfolio as of September 2023. ICRA expects the portfolio share to remain concentrated, given the company's limited branch expansion plans for the medium term.

SFL's portfolio increased at a compound annual growth rate (CAGR) of about 6% during FY2020-FY2023. The portfolio grew by a moderate 4% in FY2023 and further by 8% (annualised) to Rs. 1,230 crore in H1 FY2024. This was supported by improved disbursements, which stood at Rs. 822 crore in FY2023 vis-à-vis Rs. 597 crore in FY2022 (Rs. 347 crore in H1 FY2024).

Subdued profitability indicators, notwithstanding improvement in FY2023 and H1 FY2024 – SFL's profit after tax (PAT), as a proportion of total assets, has been subdued in the past (average of 0.9% in FY2018-FY2022). It witnessed a modest improvement over the last two years to 1.0% in FY2023 and 1.1% in H1 FY2024, supported by higher interest margins and credit costs. The net interest margin (NIM) improved to 6.4% in H1 FY2024 and 6.3% in FY2023 from 5.6% in FY2022 (5.1% in FY2021) due to increasing yields and the stable cost of funds, notwithstanding the increase in systemic rates. Further, credit costs moderated to 0.5% in H1 FY2024 (0.7% in FY2023) from 0.8% in FY2022, as the impact of the Covid-19 pandemic has largely been absorbed. However, the operating costs increased to 4.6% in H1 FY2024 (4.4% in FY2023) from 4.1% in FY2022 (4.0% in FY2021) due to the modest portfolio growth. Going forward, the company's ability to increase its operating efficiency and keep the credit costs under control would be critical for improving its profitability.

Moderate asset quality – SFL's GS3 increased to 5.7% in September 2023 and 5.8% in March 2023 from 5.2% in March 2022 as it has aligned the GS3 reporting with the updated IRAC[3] norms, which require the daily stamping of accounts. Consequently,

[2] Net worth (Ind-AS) adjusted for revaluation reserve

[3] RBI circular dated November 12, 2021 regarding prudential norms on Income Recognition, Asset Classification and Provisioning

the provision coverage on the GS3 assets declined to 49.6% as of September 2023 and 51.0% as of March 2023 from 60.4% in March 2022. The softer bucket overdues (30+ days past due; dpd) stood at 13.3% in September 2023 and 17.7% in March 2023 vis-à-vis 12.9% in March 2022 (14.1% in March 2021). Nevertheless, ICRA notes that SFL has been able to keep its credit costs (0.5% in H1 FY2024, 0.7% in FY2023 and 0.4-0.8% during FY2018-FY2022) under control, demonstrating its ability to make recoveries from harder bucket delinquencies as well. ICRA also notes that it would be critical for the company to keep recoveries in line with the past, so as to maintain the asset quality and ensure that the credit costs are under control.

Diversification of funding mix critical for long-term growth plans – As of September 2023, loans from banks and financial institutions, deposits, NCDs (public issue), NCDs (private placement), preference shares, and sub-debt accounted for 15%, 2%, 44%, 11%, 1% and 26%, respectively, of the total debt. The increase in the share of public NCDs in the recent past has led to chunky outflows on maturity, which the company has been managing through the incremental fresh public issuance of NCDs. SFL is currently in the process of raising Rs. 200.00 crore through the public issuance of debentures in February 2024, which is expected to support its NCD redemptions in the coming months and help it maintain an adequate liquidity profile. The company's track record of raising money via public issuances provides comfort.

Over the last few years, SFL's financial flexibility was constrained by the continued weakness in the performance of Group entities; however, with the recent resolution of some of the Group-related issues, the same is expected to improve, going forward. ICRA notes that SFL has been significantly dependent on market borrowings in the recent past, especially via the public issuance of debentures.

ICRA notes that the company would be required to augment its statutory liquid assets for the non-compliant sub-debt, in case of any adverse observation by the RBI. As such, SFL's ability to diversify its lender base to achieve its long-term growth plans and to maintain adequate liquidity will be a key monitorable.

Environmental and social risks

Given the service-oriented business of SFL, its direct exposure to environmental risks/material physical climate risks is not significant. However, the residual value of the security could reduce in case of policy changes such as an incremental rulings on the reduction in the operating life of CVs, thereby impacting the profitability. Further, there is increasing interest from policymakers towards identifying the exposure of financing companies to carbon emissions through their financing activities. However, this process is in an early stage and ICRA expects any adverse implications to manifest only over a longer time horizon, giving financing companies adequate time to adapt and minimise the credit implications.

With regard to social risks, data security and customer privacy are among the key sources of vulnerability for lending institutions as material lapses could be detrimental to their reputation and invite regulatory censure. The company has not faced any lapse over the years, which highlights its sensitivity to such risks.

Liquidity position: Adequate

SFL had unencumbered cash and liquid investments of Rs. 30.4 crore and undrawn bank lines of Rs. 39.2 crore as on November 30, 2023 with a debt obligation of Rs. 133.1 crore (including sub-debt payments of Rs. 79.0 crore) during December 2023-February 2024. Monthly collections have been stable and remained healthy at ~Rs. 60-65 crore, which will support the liquidity profile. The asset-liability maturity (ALM) profile, as on November 30, 2023, does not reflect cumulative negative mismatches up to 12 months. The proposed public issuance of NCDs in February 2024 is expected to improve its liquidity position further.

Rating sensitivities

Positive factors – A steady improvement in SFL's funding, asset quality and earnings profile shall positively impact the ratings.

Negative factors – Pressure on the ratings could arise on a deterioration in SFL's liquidity profile or an increase in the gearing beyond 7.0 times on a sustained basis or a significant weakening in the asset quality, which could adversely impact its earnings.

About the company

Sakthi Finance Limited (SFL), incorporated in 1955, is a part of the Sakthi Group, which has a presence in sectors such as sugar, beverages, automobile and transport dealerships, auto components and textiles. It primarily finances CVs, which constituted 90% of its total portfolio as of September 2023. The remaining portfolio consisted of loans towards the purchase of cars, construction equipment and other machinery. SFL mainly operates in Tamil Nadu and Kerala, which together accounted for about 95% of the total portfolio.

In FY2023, SFL reported a net profit of Rs. 12.5 crore on a managed asset base of Rs. 1,275.9 crore compared to Rs. 9.5 crore and Rs. 1,244.3 crore, respectively, in FY2022. As per the provisional financials for H1 FY2024, the company reported a net profit of Rs. 7.2 crore on a managed asset base of Rs. 1,322.6 crore.

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: Click Here
