*Instrument details are provided in Annexure I; LT – Long term; ST – Short term; ^ST borrowing programme of FY2025 includes commercial paper programme of up to Rs. 5,000 crore

Rationale

While arriving at the ratings, ICRA has taken a consolidated view of the credit profiles of Power Finance Corporation Ltd. (PFC) and REC Limited (REC) as REC is a subsidiary of PFC (collectively referred to as the Group) and the entities are in a similar line of business with strategic importance to the Government of India (GoI) and overlapping clientele.

The ratings continue to draw significant strength from PFC's sovereign ownership¹, its importance to the GoI, given its role as a nodal agency for various power sector schemes, and the Group's dominant market position in the power sector financing segment with an aggregate loan book of Rs. 9,54,483 crore as on December 31, 2023. The ratings continue to draw comfort from the diversified borrowing mix, healthy financial flexibility by virtue of the ownership, adequate liquidity and the established track record of healthy profitability. These strengths are partly offset by the moderate capitalisation with a consolidated gearing of 6.6x as on December 31, 2023.

The Group remains vulnerable to the risks arising from its exposure to a single sector (i.e. power) with high concentration towards the relatively weak state power utilities as well as the vulnerability of its exposure to private sector borrowers. However, the asset quality indicators have shown an improving trend as the gross stage 3 assets stood at 3.5% and 3.1% of the total advances at the standalone and consolidated level, respectively, as on December 31, 2023, after remaining elevated over the last two years.

¹ 56% held by GoI as on December 31, 2023

The ratings also factor in the Group's healthy profitability with a consolidated return on managed assets (RoMA) of 2.6% in 9M FY2024 (2.4% in FY2023), supported by adequate margins, low operating costs and controlled credit costs.

PFC and REC modified their memorandum of association (MoA) in FY2023 so that they can lend to other infrastructure projects as well. Thus, the share of power sector exposure in the overall mix is expected to decline over the medium to long term. PFC is also exposed to risks arising from fluctuations in foreign exchange rates, given the sizeable foreign currency denominated borrowings. Nonetheless, it has been actively focused on hedging its foreign currency borrowings. The risk is somewhat mitigated as 92% of the foreign exchange borrowings (on a standalone basis), with a residual maturity of up to 5 years, was fully hedged as on December 31, 2023 compared with 65% as on March 31, 2020.

ICRA believes that prudent capitalisation is a key mitigant against the risks arising from sectoral and credit concentration. In this context, cognisance has been taken of the various Government schemes with PFC and REC as lending partners. The impact on the capitalisation ratios has been cushioned by the lower risk weight applicable to the exposures, backed by state government guarantees. ICRA believes that PFC and REC remain important vehicles for the implementation of the GoI's various power sector schemes. Hence, support will be forthcoming from the GoI if needed.

The Stable outlook reflects ICRA's expectation that the Group will likely remain strategically important to the GoI and will continue to play a major role in various power sector schemes of the Government. Consequently, PFC and REC are likely to retain a dominant position in power sector financing, while maintaining adequate profitability, borrowing and capitalisation profiles.

ICRA has also taken note of the recent changes made by the Reserve Bank of India (RBI) towards consumer credit and bank credit to non-banking financial companies (NBFCs). The cost of bank borrowings for the sector, and hence the company, could increase. Thus, PFC's ability to pass on the potentially higher borrowing costs and protect the margins will be a key monitorable.

ICRA has reaffirmed and withdrawn the rating for the Rs. 8,400 crore short-term borrowing programme of FY2024 as no amount is outstanding against the same. Further, the ratings for the Rs. 19,222.96 crore long-term borrowing programme and Rs. 22,306.84 crore long-term/short-term borrowing programme of earlier years (prior to FY2023) have been reaffirmed and withdrawn as the instruments have matured and were fully repaid post-maturity. The ratings have been withdrawn at the request of the company and as per ICRA's policy on the withdrawal of credit ratings.

Key rating drivers and their description

Credit strengths

Majority ownership by GoI; strategic role in implementing various GoI schemes and dominant position in power sector financing – As nodal agencies for implementing various GoI schemes aimed at developing the country's power sector, such as PM Suryodaya Scheme (launched in 2024 with REC named as the nodal implementation agency), Revamped Distribution Sector Scheme (RDSS) and Integrated Power Development Scheme (IPDS). PFC and REC remain strategically important to the GoI for achieving its objective of augmenting the power capacity across the country. Further, the GoI remains a majority shareholder in PFC with a stake of ~56%, as on December 31, 2023, and has representation on the company's board. PFC has a skilled management team with the senior team having more than 30 years of experience in power financing. Moreover, the company, along with REC, has maintained a dominant position in power sector financing with a large share of funding to state power utilities. ICRA notes that PFC's acquisition of REC strengthened its position further, while supporting better portfolio diversity, compared to individual entities. At the same time, as PFC and REC are a part of the same Group, sustained challenges in incremental fund-raising owing to the Group's exposure limits for lenders will remain a monitorable. PFC is committed towards maintaining the current market share of 20% in the infrastructure financing segment going forward.

Good financial flexibility and resource profile – The Group enjoys good financial flexibility, given its sovereign ownership, which augurs well for raising long-term funds from both domestic and international financial institutions (FIs) at competitive rates. Given the Gol's support, PFC has been able to raise funds at competitive rates. Precedents, wherein it received approval from the Gol to raise tax-free and 54EC low-cost capital gain bonds, provide comfort with respect to its financial flexibility, ability to raise low-cost funds, and maintain a diversified borrowing profile. The funding mix remains adequately diversified and includes long-term market instruments, foreign currency borrowings, banks and FIs. Over the past few years, PFC has significantly increased the share of hedged foreign currency borrowing with residual maturity of up to 5 years (92% as on December 31, 2023, against 65% as on March 31, 2020).

Established track record of healthy profitability – The yields have improved on a consolidated basis following the hike in lending rates. However, this was partly offset by the increase in the cost of funds, given the rise in systemic interest rates during the year. Consequently, the net interest margin (NIM; consolidated) increased slightly to 3.2% in 9MFY2024 from 3.0% in FY2023. Further, negligible slippages in the loan accounts and the reversal of the provision on recoveries from the existing stressed assets resulted in nil credit costs in 9M FY2024 and FY2023 compared to 0.7% in FY2022, on a consolidated basis. At the same time, operating expenses remained low at 0.1% in 9M FY2024 and FY2023 (0.1% in FY2022), given the wholesale nature of the business. Overall, the consolidated profitability profile remains healthy with a net profit of Rs. 18,905 crore in 9M FY2024 and Rs. 21,179 crore in FY2023, translating into a return on managed assets (RoMA) and a return on equity (RoE) of 2.6% and 21.0% in 9M FY2024 compared to 2.4% and 20.3%, respectively, in FY2023. The overall profitability indicators are expected to remain stable going forward as well, supported by business growth and controlled credit costs while margins could face some pressure.

On a standalone basis, stable NIMs and controlled credit costs in 9M FY2024 vis-à-vis FY2023 resulted in a net profit of Rs. 10,232 crore in 9M FY2024 compared to a net profit of Rs. 11,605 crore in FY2023. The higher profitability translated into RoMA and RoE of 2.8% and 18.8% respectively in 9M FY2024 as compared with 2.7% and 18.2%, respectively, in FY2023, broadly in line with PFC's 3-year (FY2019-FY2023) average RoA and RoE of 2.4% and 18%, respectively.

Credit challenges

High concentration risk and portfolio vulnerability – The Group's exposure to a single sector (i.e. power), large ticket sized loans, the high concentration of exposure towards financially weak state power utilities and the vulnerability of its exposure to private sector borrowers increase the portfolio vulnerability. Both PFC and REC modified their MoAs in FY2023 to be able to lend to other infrastructure projects as well. Thus, the share of power sector exposure in the overall mix is expected to decline over the medium to long term. As for concentration risk, ICRA notes that the RBI recently issued a notification proposing to withdraw the exemptions granted to Government-owned NBFCs from meeting the credit concentration norms. However, the same is unlikely to significantly impact the business of both PFC and REC as these entities are largely within the concentration limits prescribed by the RBI.

The Group's asset quality indicators have been improving with the gross stage 3 assets declining to 3.5% and 3.1% of the total advances at the standalone and consolidated levels, respectively, as on December 31, 2023, following the high resolutions in FY2023 and 9M FY2024. With a provision cover of ~74%, the net stage 3 assets stood at 0.9% of the total advances at the standalone as well as the consolidated level as on December 31, 2023. As on December 31, 2023, 13 of the 22 projects under PFC's stressed category, worth Rs. 13,899 crore are being resolved under the National Company Law Tribunal (NCLT) while the remaining projects, worth Rs. 2,174 crore are being resolved outside the NCLT. As on December 31, 2023, on a consolidated and standalone basis, the entire portion of the credit-impaired assets was from the private sector book for which the company has made sizeable provisions. Going forward, the Group's ability to grow its loan book, while controlling the credit costs and maintaining the profitability, would be imperative.

Moderate capitalisation – PFC’s acquisition of REC had impacted the Group’s consolidated capitalisation. While considerable recovery has been witnessed since then, the leverage remains moderate with a consolidated gearing of 6.6x as on December 31, 2023. Comparatively, PFC’s capitalisation at the standalone level was characterised by a gearing of 5.3x and a capital-to-risk weighted assets ratio (CRAR) of 26.9% as on December 31, 2023. ICRA believes that prudent capitalisation is a key mitigant against the risks arising out of sectoral and credit concentration. In this context, cognisance has been taken of the various Government schemes with PFC and REC as lending partners. The impact on the capitalisation ratios will be cushioned by the lower risk weight applicable to the exposures backed by state government guarantees.

Environmental and social risks

Given the service-oriented nature of its business, the Group does not face material physical climate risks but is exposed to environmental risks indirectly through its portfolio of assets. However, if the entities or businesses, to which these companies have an exposure face business disruptions because of physical climate adversities or if such businesses face climate transition risks because of technological, regulatory or customer behaviour changes, the same could translate into credit risks for the companies involved. Such risk is, nevertheless, mitigated by adequate portfolio diversification. With regard to social risks, data security and customer privacy are among the key sources of vulnerability for lending institutions as material lapses could be detrimental to their reputation and invite regulatory censure. Given the nature of their business, PFC and REC's exposure to social risks is limited.

Liquidity position: Adequate

As on December 31, 2023, PFC’s asset-liability maturity (ALM) profile, on a standalone basis, reflected debt maturities (principal only) of about Rs. 64,860 crore for the 12-month period ending December 31, 2024, against which its scheduled inflows from advances are expected at Rs. 1,09,352 crore. The company’s ALM profile has improved in recent years due to lower dependence on short-term borrowings and the raising of relatively longer-tenor borrowings in the last one year, resulting in positive cumulative mismatches in all buckets up to 1 year. PFC’s ALM profile had historically been characterised by some cumulative negative mismatches in the up to one-year buckets, given the relatively longer tenure of the loans extended by it. While such gaps, when existing, are partially bridged by sizeable unutilised bank lines and cash and equivalents, the company also relies on interest income and refinancing to repay its maturing debt. Nevertheless, the healthy financial flexibility, supported by the sovereign ownership and the ability to raise funds at short notice, provides comfort.

Rating sensitivities

Positive factors – Not applicable

Negative factors – ICRA could change the rating outlook to Negative or downgrade the ratings on a change in the ownership and/or a change in PFC’s strategic role or importance to the GoI. Also, a deterioration in the consolidated solvency (net stage 3/net owned fund) to a level above 40%, on a sustained basis, will be a negative trigger.

Analytical approach

Analytical Approach	Comments
Applicable rating methodologies	ICRA’s Credit Rating Methodology for Non-banking Finance Companies Policy on Withdrawal of Credit Ratings
Parent/Group support	The ratings derive significant strength from the GoI’s majority ownership (56% as on December 31, 2023) of PFC and the company’s important role as a nodal agency for various power sector schemes of the Government; the GoI ownership supports PFC’s financial flexibility.
Consolidation/Standalone	Consolidation

About the company

Incorporated in 1986, PFC is a non-banking financial company (NBFC) with infrastructure finance company status. It was set up by the GoI as a specialised financial institution to fund projects in the domestic power sector. The GoI held a 56% stake in the company as on December 31, 2023. PFC provides loans for a range of power sector activities including generation, distribution, transmission, plant renovation and maintenance. It finances state sector entities including generating and distribution companies as well as independent power producers (IPPs). It is also the nodal agency for the Late Payment Surcharge Scheme (LPS), Revamped Distribution Sector Scheme (RDSS) and the Integrated Power Development Scheme (IPDS) and the bid process coordinator for the Independent Transmission Projects (ITP) Scheme. PFC is the promoter and holding company of REC Limited. In March 2019, it acquired 103.94 crore equity shares of REC from the President of India, constituting 52.63% of the paid-up share capital of REC.

On a standalone basis, PFC reported a profit after tax (PAT) of Rs. 10,232 crore in 9M FY2024 and Rs. 11,605 crore in FY2023 compared with Rs. 10,022 crore in FY2022. As on December 31, 2023, the reported capital adequacy was 26.86% and it had a total loan book of Rs. 4,57,027 crore (Rs. 4,22,498 crore as on March 31, 2023 and Rs. 3,73,135 crore as on March 31, 2022).

At the consolidated level, PFC achieved a PAT of Rs. 18,905 crore in 9M FY2024 and Rs. 21,179 crore in FY2023 compared with Rs. 18,768 crore in FY2022. As on December 31, 2023, it had a loan book of Rs. 9,54,483 crore (Rs. 8,57,500 crore as on March 31, 2023 and Rs. 7,58,496 crore as on March 31, 2022).

Complexity level of the rated instrument

Instrument	Complexity Indicator
Long-term borrowing programme	Simple
Short-term borrowing programme	Simple
Long-term/Short-term borrowing programme	Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)

About ICRA Limited:

ICRA Limited was set up in 1991 by leading financial/investment institutions, commercial banks and financial services companies as an independent and professional investment Information and Credit Rating Agency.

Today, ICRA and its subsidiaries together form the ICRA Group of Companies (Group ICRA). ICRA is a Public Limited Company, with its shares listed on the Bombay Stock Exchange and the National Stock Exchange. The international Credit Rating Agency Moody's Investors Service is ICRA's largest shareholder.

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website www.icra.in or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated. All information contained herein must be construed solely as statements of opinion, and ICRA shall not be liable for any losses incurred by users from any use of this publication or its contents.
