## Keertana Finserv Private Limited: Provisional [ICRA]A+(SO) assigned to Series A1(a) PTCs and Provisional [ICRA]A(SO) assigned to Series A1(b) PTCs backed by microenterprise loan receivables issued by Canopus 05 2024

### Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
Canopus 05 2024	Series A1(a) PTCs	32.36	Provisional [ICRA]A+(SO); assigned
	Series A1(b) PTCs	2.89	Provisional [ICRA]A(SO); assigned

\*Instrument details are provided in Annexure I

Rating in the absence of pending actions/documents	No rating would have been assigned as it would not be meaningful
--	--

### Rationale

The pass-through certificates (PTCs) are backed by a pool of microenterprise loan receivables originated by Keertana Finserv Private Limited {Keertana/[ICRA]BBB (Stable)} with an aggregate principal outstanding of Rs. 41.23 crore (pool receivables of Rs. 50.43 crore).

The provisional ratings are based on the strength of the cash flows from the selected pool of contracts, the credit enhancement available in the structure as well as the integrity of the legal structure. The ratings are subject to the fulfilment of all the conditions under the structure and ICRA's review of the documentation pertaining to the transaction.

### Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout to Series A1(a) PTCs and Series A1(b) PTCs on a pari-passu basis. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity dates (February 09, 2026 and February 10, 2026 for Series A1(a) PTCs and Series A1(b) PTCs, respectively).

Till September 10, 2025, monthly collections from the pool will be used for making the promised interest payout to Series A1(a) PTCs and Series A1(b) PTCs on a pari-passu basis. After making the promised interest payout, the collections will be used to make the expected principal payouts to PTC Series A1(a) till its redemption, followed by the expected principal payouts to PTC Series A1(b). From September 11, 2025, monthly collections from the pool will be used for making the promised interest payout to Series A1(a) PTCs and Series A1(b) PTCs on a pari-passu basis. After making the promised interest payouts, the collections will be utilised for the redemption of Series A1(a) PTCs and Series A1(b) PTCs on a pari-passu basis.

Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will flow back to the Originator on a monthly basis. Any prepayment in the pool would be used for the prepayment of the Series A1(a) PTC principal till its redemption and then for the prepayment of the Series A1(b) PTC principal till its redemption.

Credit enhancement is available in the form of (i) a cash collateral (CC) of 3.00% of the initial pool principal to be provided by the Originator, (ii) subordination of 21.50% of the initial pool principal (including the principal payable to Series A1(b) PTCs, equity tranche and over-collateralisation) for Series A1(a) PTCs and subordination of 14.50% of the initial pool principal for

Series A1(b) PTCs (including equity tranche and over-collateralisation), and (iii) excess interest spread (EIS) of 13.69% for Series A1(a) PTCs and Series A1(b) PTCs.

## Key rating drivers

### Credit strengths

**Granular pool supported by presence of credit enhancement** – The pool is granular, consisting of 9,948 contracts, with no contract exceeding 1% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the CC, subordination and EIS would absorb some amount of the losses in the pool and provide support in meeting the PTC payouts.

**No overdue contracts in the pool** – The pool has been filtered in such a manner that there were no overdue contracts as on the cut-off date. Further, none of the contracts in the pool have ever been delinquent, which is a credit positive.

**Seasoned contracts in the pool** – The pool had amortised by about 20% as on the cut-off date, reflecting the borrowers' better credit profile, repayment track record and buildup of borrower equity.

### Credit challenges

**High geographical concentration** – The pool has high geographical concentration with the top state, viz. Andhra Pradesh, contributing ~85% to the initial pool principal amount. The concentration remains high even at the district level with the top 5 districts accounting for ~48% of the initial pool principal amount. The pool's performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

**Risks associated with lending business** – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The performance of microfinance loans would also be exposed to political and communal risks.

### Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered based on the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 5.0% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 3.0% to 9.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

### Liquidity position

**For Series A1(a) PTCs: Superior**

The liquidity for Series A1(a) PTCs is superior after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be 6.50 times the estimated loss in the pool.

**For Series A1(b) PTCs: Strong**

The liquidity for Series A1(b) PTCs is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be 5.25 times the estimated loss in the pool.

**Rating sensitivities**

**Positive factors** – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

**Negative factors** – The sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer could also exert pressure on the ratings.

**Analytical approach**

The rating action is based on the analysis of the performance of Keertana’s portfolio till March 2024, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the credit enhancement cover available in the transaction.

Analytical Approach	Comments
Applicable rating methodologies	<a href="#">Rating Methodology for Securitisation Transactions</a>
Parent/Group support	Not Applicable
Consolidation/Standalone	Not Applicable

**Pending actions/documents required to be completed for conversion of the provisional rating into final**

The assigned ratings are provisional and would be converted into a final rating upon the execution of:

1. Trust deed
2. Assignment agreement
3. Legal opinion
4. Trustee letter
5. Chartered Accountant’s know your customer (KYC) certificate
6. Any other documents executed for the transaction

**Validity of the provisional rating**

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

**Risks associated with the provisional rating**

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA’s Policy on Provisional Ratings available at [www.icra.in](http://www.icra.in).

## About the originator

Keertana Finserv Private Limited (Keertana) is a non-deposit taking non-banking financial company (NBFC). It was incorporated in February 1996 as Rajshree Tracom Pvt Ltd and received its NBFC licence in 2001 from the Reserve Bank of India (RBI). The company was dormant with no business till the current promoters acquired it at the end of March 2022. Following the receipt of RBI approval for a change in management and control, the current promoters purchased all the shares of the erstwhile promoters. The company is currently managed by Ms. Padmaja Reddy, the erstwhile Managing Director of Spandana Sphoorthy Financial Limited (SSFL; NBFC-MFI). Keertana acquired its gold loan business from Spandana Mutual Benefit Trust (SMBT; Rs. 191 crore) and the micro, small and medium enterprise (MSME) business from Spandana Rural and Urban Development Organization (SRUDO; Rs. 14 crore) as per a business transfer agreement dated April 04, 2022.

Keertana's assets under management (AUM) stood at Rs. 1,719 crore through 286 branches as of March 2024. Gold loans contributed 44% to the AUM while joint liability group (JLG), loan against property (LAP) and MSME accounted for the remaining 66% as of March 2024. Keertana reported a provisional net profit of Rs. 80 crore on a managed asset base of Rs. 1,719 crore in FY2024 compared with a net profit of Rs. 16 crore on a managed asset base of Rs. 700 crore in FY2023.

## Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A1(a) PTCs	Moderately Complex
Series A1(b) PTCs	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
