^{##} Includes an interchangeable limit of Rs. 5,607.00 crore between long-term and short-term limits, and an unallocated limit of Rs. 5,009.36 crore

Rationale

The ratings factor in Muthoot Finance Limited's (MFL) financial risk profile, characterised by its comfortable capitalisation and healthy earnings profile, notwithstanding the increasing competitive pressure in the gold loan segment in recent years. MFL's gold loan book has more than doubled over the last five years to Rs. 72,878 crore as of March 2024 and accounted for about 82% of its consolidated portfolio. The segment reported a growth of 18% in FY2024 vis-à-vis the group loan portfolio growth of 25%. The ratings continue to consider MFL's long track record and leadership position in the gold loan segment, its established franchise with a pan-India branch network, and its efficient internal control and monitoring systems. MFL's ability to raise funds from diverse sources and the short-term nature of gold loans result in a strong liquidity profile.

ICRA, however, notes the performance of the non-gold segments, which have a relatively lower vintage. The sustained good quality growth and earnings performance of these segments would remain a monitorable. Some of the asset segments, namely microfinance (11.3% of the consolidated assets under management (AUM) as of March 2024), affordable housing (2.3%) and vehicle finance (1.3%), recorded gross stage 3 (GS3) of 1.8%, 1.9% and 1.5%, respectively, vis-à-vis 3.3% in the gold loan segment as of March 2024 (improved from 3.8% as of March 2023). ICRA takes note of the lower gold loan auctions undertaken by MFL in FY2024 vis-à-vis FY2023 and FY2022 which occurred largely on account of the loans that were originated when gold prices were high and there were Covid-19 pandemic-related defaults. The gold loan auctions undertaken in FY2024 stood at Rs. 892 crore vis-à-vis Rs. 2,203 crore and Rs. 5,211 crore in FY2023 and FY2022 respectively,. The average portfolio loan-to-value (LTV) stood at 63% as of March 2024 as well as March 2023, supported by higher gold prices. ICRA noted that MFL has discontinued cash disbursements of more than Rs. 20,000 in the gold loan segment (from May 2024), in line with the regulatory direction. While the impact on the business growth is expected to be limited, the same would be a monitorable in the near term.

ICRA expects the consolidated earnings performance to remain healthy at 4.0-5.0% over the medium term, as gold loans continue to account for 80-85% of the overall lending portfolio. Moreover, recoveries from gold loan overdues are expected to be good, which would keep the credit costs under control. Managing the net interest margin (NIM), going forward, in an increasing interest rate and competitive business environment, would be monitorable. MFL's capitalisation profile,

characterised by a consolidated managed gearing of 2.7 times as of March 2024 and 2.6 times as of March 2023 (2.9-3.5 times during FY2018-FY2022), would remain comfortable over the medium term, supported by healthy accruals and moderate growth expectations.

ICRA takes note of the geographical concentration of the branches and the loan book in South India. South India accounts for 59% of MFL's gold loan branches, contributing about 47% to the gold loan book. A demonstrated track record in the non-gold segments and a steady improvement in geographical diversity would be key, going forward, from a rating perspective.

ICRA has also reaffirmed and withdrawn the long-term rating on the Rs. 928.42-crore non-convertible debentures in accordance with its policy on the withdrawal of credit ratings as the instruments have matured and have been fully repaid.

The Stable outlook factors in ICRA's expectation that MFL will continue to benefit from its established operational track record in the gold loan business, which is projected to account for 80-85% of the consolidated loan AUM over the medium term, and the comfortable overall financial risk profile.

Key rating drivers and their description

Credit strengths

Established franchise and leadership position in gold loan segment – MFL has a track record of around two decades in the gold loan business and is India's largest gold loan focussed non-banking financial company (NBFC) with a total portfolio of Rs. 75,827 crore (gold loan: 98%) as of March 2024; the portfolio grew by 20.0% on a YoY basis. The consolidated loan portfolio stood at Rs. 89,079 crore as of March 2024 compared to Rs. 71,497 crore as of March 2023, of which gold, microfinance and housing accounted for 81.8%, 11.3% and 2.3%, respectively.

As of March 2024, MFL had an extensive pan-India network of 4,854 branches; 59% of its branches are in South India, where it has an established franchise. The strong brand value of Muthoot, its experienced promoters and senior management team, and its efficient internal controls and audit systems are expected to support the overall business growth going forward.

Healthy earnings performance, notwithstanding moderation due to significant competitive pressure in recent years – The company's consolidated net profitability (profit after tax/average managed assets; PAT/AMA) improved to 5.0% in FY2024 from 4.6% in FY2023 as better yields led to healthy margins despite the increasing borrowing cost. However, the profitability has been on a moderating trend over the longer term, declining from 6.1% in FY2021 (5.5% in FY2022), notwithstanding the reduction in on-balance sheet liquidity. Nevertheless, the earnings performance continues to be supported by the low credit costs (less than 1% over the last 10 years and average of 0.5%) in the gold loan business. ICRA expects the net profitability to remain at 4.0-5.0% over the medium term.

The share of higher ticket loans (> Rs. 3 lakh), which generally have lower yields and face more competition, increased over the last few years and stood at 29% as of March 2024. The operating cost ratio has inched up in recent quarters and stood at 3.4% in FY2024 and 3.3% in FY2023 from 3.0% in FY2022 because of higher business promotion costs and employee costs (3.3% in FY2021; 4.3-4.6% during FY2017-FY2020).

MFL's (standalone) net profitability was 5.1% in FY2024 and 4.9% in FY2023 (5.9% in FY2022). The annualised return on average net worth (standalone) was 17.9% in FY2024 and 17.6% in FY2023 (23.5% in FY2022).

Capitalisation to remain comfortable over the medium term – MFL has a comfortable capitalisation profile with a standalone gearing of 2.4 times as of March 2024 and March 2023 (2.8 times as of March 2022), aided by good internal generation. The consolidated managed gearing stood at 2.7 times as of March 2024 and 2.6 times as of March 2023 (2.9 times as of March 2022). MFL's standalone net worth was Rs. 24,290.3 crore as of March 2024 and Rs. 21,061.9 crore as of March 2023 (Rs. 18,344.6 crore as on March 31, 2022). The company is expected to be comfortably placed to meet the medium-term capital requirements of its subsidiaries without affecting its own capital structure. ICRA expects MFL's consolidated managed gearing to remain below 4.0 times over the medium term.

Credit challenges

Performance of non-gold segments to remain monitorable; sizeable share of gold loans would support overall portfolio quality – MFL’s standalone portfolio mainly consists of gold loans (96%) with unsecured loans, in the form of personal loans and business loans, largely comprising the balance. It has diversified its exposure via its subsidiaries, namely Belstar Microfinance Limited (Belstar; microfinance), Muthoot Homefin (India) Limited (MHL; affordable housing) and Muthoot Money Limited (MML; vehicle finance). At present, the consolidated loan portfolio is concentrated towards gold loans, comprising 81.8% of the loan book while microfinance, affordable housing and vehicle finance accounted for 11.3%, 2.3% and 1.3%, respectively, as of March 2024. The loan books of Belstar, MHL and MML grew by 62%, 42% and 190%, respectively, on a YoY basis as of March 2024. The GS3 for the subsidiary companies, viz., Belstar, MHL and MML, stood at 1.8%, 1.9% and 1.5%, respectively, as of March 2024 against 2.4%, 4.0% and 3.7%, respectively, as of March 2023. The performance of the non-gold segments was impacted by pandemic-related disruptions because of the unsecured nature of the microfinance business and the average credit profile of the borrowers in the housing and vehicle finance segments.

MFL’s GS3 improved to 3.3% as of March 2024 from 3.8% as of March 2023 (3.0% as of March 2022). ICRA notes the company’s track record in containing credit costs in the gold segment and achieving recoveries in auctions where it typically recovers the principal and a sizeable share of the accrued interest on such loans. ICRA takes note of the lower gold loan auctions undertaken by MFL in FY2024 against FY2023 and FY2022, largely because the loans had been originated when gold prices were high and there were pandemic-related defaults. The gold loan auctions undertaken in FY2024 stood at Rs. 892 crore, vis-à-vis Rs. 2,203 crore and Rs. 5,211 crore in FY2023 and FY2022 respectively. The average portfolio LTV stood at 63% as of March 2024 as well as March 2023, supported by higher gold prices.

ICRA expects MFL’s asset quality in the gold loan segment, which accounts for the bulk of the consolidated AUM, to remain under control with low credit costs. The overall asset quality and credit costs are expected to remain under control as the subsidiaries are projected to account for 15-20% of the consolidated portfolio over the medium term. MFL’s ability to profitably grow its non-gold businesses while maintaining good asset quality would be crucial over the medium to long term, considering the unsecured nature of some of these businesses and the higher inherent risks in these segments compared to gold loans.

Operations concentrated in South India – MFL’s operations are largely concentrated in South India, which constituted 59% of its total branch network and 47% of its total loan portfolio as of March 2024. ICRA, however, notes that the share of the portfolio in South India has reduced from 57% in March 2015. Geographical diversification is expected to improve steadily over the medium to long term with an improvement in the scale of the gold loan portfolio and the stabilisation of the performance of the non-gold asset segments.

Environmental and social risks

Environmental considerations: Given the service-oriented business of MFL, its direct exposure to environmental risks/material physical climate risks is not significant. Lending institutions can be exposed to environmental risks indirectly through their portfolio of assets, though such risks are not material for MFL as its lending operations primarily encompass gold loans. Nevertheless, there is increasing interest from policymakers towards identifying the exposure of financing companies to carbon emissions through their financing activities. This process is, however, in an early stage and ICRA expects any adverse implications to manifest only over a longer time horizon, giving financing companies adequate time to adapt and minimise the credit implications.

Social considerations: With regard to social risks, data security and customer privacy are among the key sources of vulnerability for lending institutions as material lapses could be detrimental to their reputation and invite regulatory censure. MFL has not faced any significant lapses in this regard. It serves the financing needs of a relatively underserved category of borrowers, which supports social inclusion and economic development.

Liquidity position: Strong

MFL had cash and liquid investments of Rs. 6,883 crore and undrawn bank lines of Rs. 329 crore as on June 10, 2024, with a repayment obligation (excluding interest) of Rs. 11,162 crore between June 11, 2024 and August 31, 2024. A sizeable portion of the repayments (Rs. 6,080 crore) comprises cash credit/short-term loans from banks, which are expected to be rolled over, while the term loan, non-convertible debenture (NCD) and commercial paper (CP) repayments are Rs. 2,561 crore, Rs. 1,337 crore and Rs. 1,184 crore, respectively, during the above-mentioned period. The short-term nature of gold loans provides support to the company's liquidity profile.

MFL has a fairly diversified funding profile with bank/financial institution (FI) loans constituting 63% of its total borrowings as of March 2024, followed by NCDs (28%) and CP (8%).

Rating sensitivities

Positive factors – Maintaining comfortable asset quality and capitalisation over the medium to long term will be a positive. A track record of good performance in the non-gold segments and improvement in geographical diversity would also positively impact the rating.

Negative factors – An increase in the share of the unsecured asset segment to more than 15% or significant weakening in the asset quality, thereby impacting the earnings, would have a negative impact. The increase in MFL's consolidated gearing beyond 4.5 times on a sustained basis would also negatively impact the ratings.

Analytical approach

Analytical Approach	Comments
Applicable rating methodologies	Rating Methodology for Non-banking Finance Companies Policy on Withdrawal of Credit Ratings
Parent/Group support	Not applicable
Consolidation/Standalone	To arrive at the ratings, ICRA has considered the consolidated financials of the Muthoot Finance Group. The consolidated financials of the Group include seven subsidiaries as listed in Annexure II

About the company

Muthoot Finance Limited (MFL) is the flagship company of the Kerala-based business house, The Muthoot Group, which has diversified operations in financial services, healthcare, education and hospitality. MFL was incorporated in 1997 and is India's largest gold loan focussed NBFC with total loan assets (standalone) of Rs. 75,827 crore and 4,854 branches as of March 2024. The company derives a major portion of its business from South India (47% of the total gold loan portfolio as of March 2024), where gold loans have traditionally been accepted as a means of availing short-term credit, although it has increased its presence beyond South India over the last few decades .

MFL reported a standalone net profit of Rs. 4,050 crore on an asset base of Rs. 85,028 crore in FY2024 against a net profit of Rs. 3,474 crore on an asset base of Rs. 72,620 crore in FY2023. The consolidated loan portfolio stood at Rs. 89,079 crore as of March 2024 compared to Rs. 71,497 crore as of March 2023 (Rs. 64,494 crore as of March 2022), with gold, microfinance and housing accounting for 82%, 11% and 2%, respectively.

Complexity level of the rated instruments

Instrument	Complexity indicator
NCD programme	Simple
Bank facilities	Simple
Subordinated debt programme	Moderately Complex
Commercial paper	Very Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's

credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)

ABOUT ICRA LIMITED

ICRA Limited was set up in 1991 by leading financial/investment institutions, commercial banks and financial services companies as an independent and professional investment Information and Credit Rating Agency.

Today, ICRA and its subsidiaries together form the ICRA Group of Companies (Group ICRA). ICRA is a Public Limited Company, with its shares listed on the Bombay Stock Exchange and the National Stock Exchange. The international Credit Rating Agency Moody's Investors Service is ICRA's largest shareholder.

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website www.icra.in or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated. All information contained herein must be construed solely as statements of opinion, and ICRA shall not be liable for any losses incurred by users from any use of this publication or its contents.
