Bhaskara-1 Trust January 2024	PTC Series A1	29.84	NA	0.72	[ICRA]AA+(SO); Upgraded from [ICRA]A(SO)

*Instrument details are provided in Annexure I

Rationale

The pass-through certificates (PTCs) are backed by two pools of micro, small and medium enterprise (MSME) business loan receivables originated by NeoGrowth Credit Private Limited {NCPL/Originator; rated [ICRA]BBB+ (Stable)}. NCPL is also the servicer for the transactions.

The rating upgrade factors in the build-up of the credit enhancement cover over the future PTC payouts on account of the high pool amortisation. The available cash collateral (CC) is fully covering the balance PTC payouts as per April 2025 payout month.

Transaction structure

For both transactions

As per the transaction structure, the monthly cashflow schedule comprises the promised interest payout. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. The residual cashflow available, after making the promised and expected payments, shall flow back to the Originator on every payout date. Any prepayment in the pool would be used for the prepayment of Series A1 PTC principal.

Key rating drivers and their description

For both transactions

Credit strengths

Substantial credit enhancement available in the structure –The rating upgrade factors in the build-up in the credit enhancement with the CC fully covering the future PTC payouts to the investors, on account of significant pool and PTC/SN amortisation for both the pools

Servicing capability of the originator – The company has adequate processes for servicing the loan accounts in the securitised pools. It has demonstrated a considerable track record of regular collections and recovery across a wide geography and multiple economic cycles.

Credit challenges

Not Applicable as CC covers entire PTC cashflows.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

Details of key counterparties

The key counterparties in the rated transactions are as follows:

Transaction Name	Aryabhata-4 Trust January 2024	Bhaskara-1 Trust January 2024
Originator	NeoGrowth Credit Private Limited	NeoGrowth Credit Private Limited
Servicer	NeoGrowth Credit Private Limited	NeoGrowth Credit Private Limited
Trustee	Catalyst Trusteeship Limited	Catalyst Trusteeship Limited
CC Bank	RBL Bank	ICICI Bank
Collection and payout account bank	ICICI Bank	ICICI Bank

Liquidity position: Superior for both the pools

The liquidity is superior for both the pools since the available CC fully covers the balance PTC/SN payouts.

Rating sensitivities

Positive factors: Not applicable

Negative factors: The rating for PTCs are unlikely to be downgraded as the CC available in the transactions are sufficient to meet the future investor payouts.

Analytical approach

The rating action is based on the performance of the pool till April 2025 (payout month), the present delinquency levels and the credit enhancement available in the pool, and the performance expected over the balance tenure of the pool.
