## John Deere Financial India Private Limited: Ratings reaffirmed; rated amount enhanced

### Summary of rating action

Instrument*	Previous rated amount (Rs. crore)	Current rated amount (Rs. crore)	Rating action
Long-term fund-based bank lines – Others	2,160.0	2,760.0	[ICRA]AAA (Stable); reaffirmed and assigned
Commercial paper	400.0	400.0	[ICRA]A1+; reaffirmed
<b>Total</b>	<b>2,560.0</b>	<b>3,160.0</b>	

\*Instrument details are provided in Annexure I

### Rationale

The ratings continue to factor in John Deere Financial India Private Limited's (JDFIPL) strong parentage. It is a wholly-owned step-down subsidiary of Deere & Company (Deere; rated A1 (Stable) by Moody's)<sup>1</sup> through John Deere India Private Limited (JDIPL). In addition to the shared name, it has close integration with the parent group for the implementation of business policies and risk management practices. Further, ICRA expects management and financial support from the Group to be forthcoming, as and when required. JDFIPL is a captive financier for farm equipment manufactured and sold by JDIPL in India. It is also the captive financier for construction equipment (primarily road construction and core mining equipment) manufactured by Wirtgen India Private Limited<sup>2</sup>.

The ratings also consider JDFIPL's comfortable capitalisation for the current scale of operations (gearing of 3.4x as on March 31, 2025) and the strong liquidity profile, supported by sizeable unutilised bank lines and an intercorporate deposit (ICD) line from JDIPL. ICRA also notes JDFIPL's healthy profitability trajectory in recent years. The annualised return on assets (RoA) and return on equity (RoE) stood at 2.9% and 13.5%, respectively, in FY2025 compared to 2.8% and 13.9%, respectively, during FY2021-FY2024.

JDFIPL is, however, exposed to relatively high portfolio vulnerability on account of its exposure to borrowers susceptible to adverse economic and agro-climatic cycles. Additionally, the share of the construction equipment segment in the company's disbursements has been increasing. JDFIPL's track record in this segment is limited. Thus, the portfolio in this product segment has limited seasoning and the company's ability to maintain adequate asset quality through economic cycles is yet to be established. Nonetheless, the headline asset quality metrics have remained under control and the gross non-performing advances (GNPA)/gross advances ratio stood at 4.4% as on March 31, 2025 (net NPA (NNPA)/net advances: 2.6%). JDFIPL's GNPA/gross advances ratio had remained in the range of 4.8-6.5% during FY2018-FY2024. Going forward, the company's ability to keep credit costs under control while improving its operating efficiency would remain crucial for sustaining healthy profitability.

ICRA believes that JDFIPL will maintain its market position in the domestic tractor financing industry, supported by operational, financial, branding and management support from the parent group, which should continue to augur well for its financial profile. Hence, the outlook on the long-term rating is Stable.

<sup>1</sup> Moody's upgraded the long-term rating on Deere to A1 (Stable) from A2 (Positive) in February 2024

<sup>2</sup> Deere acquired Wirtgen Group in December 2017

## Key rating drivers and their description

### Credit strengths

**Strong parentage** – JDFIPL is a wholly-owned subsidiary of JDIPL, which is indirectly wholly owned by Deere. Given Deere's focus on the Indian market (largest for the Group in terms of volume), ICRA believes JDFIPL is strategically important as the captive financier for farm equipment manufactured and sold by JDIPL. Thus, by virtue of its parentage and importance as a captive financier, JDFIPL benefits from operational, financial and management support from Deere. Moreover, its policies and processes are in line with those approved by the parent.

ICRA notes the track record of support from the parent group in the form of regular equity infusions (Rs. 242 crore during FY2019-FY2021) and a Rs. 1,000-crore liquidity backup line. Further, JDFIPL has good financial flexibility as it is a subsidiary of Deere. It has relationships with global financial institutions, providing it with access to funds at competitive rates.

**Comfortable capitalisation** – JDFIPL's capitalisation level is comfortable for the current scale of operations with the Tier I and total capital adequacy ratios at 21.5% and 22.3%, respectively, and the gearing at 3.4x as on March 31, 2025. Moreover, ICRA expects capital support from the parent to be forthcoming, if needed, to keep the company prudently capitalised while growing as per its business plans. In this regard, it is noted that JDFIPL has received regular equity infusions from the parent group in recent years, including Rs. 142 crore in FY2021 and Rs. 50 crore each in FY2019 and FY2020. Although JDFIPL did not distribute dividends until FY2021, it declared dividends in the range of 10-21% of the net profit during FY2022-FY2025. Going forward, while the company would continue to distribute dividends regularly, ICRA expects it to maintain a comfortable capitalisation profile (with comfortable cushions over the regulatory requirements).

**Healthy profitability** – JDFIPL has maintained a healthy profitability trajectory with a 4-year average RoA of 2.8% and RoE of 13.9% during FY2021-FY2024. The company reported an RoA and RoE of 2.9% and 13.5%, respectively, in FY2025. Despite the sustained pressure on the lending spreads over the past 20-24 months due to rising incremental borrowing costs amid the elevated interest rate environment, JDFIPL's profitability remained healthy in FY2025. This was supported by improved operating efficiency and lower credit costs. It is noted that the bulk of the impact of the elevated incremental borrowing costs was absorbed in FY2025 and any further increase in the average cost of funds is expected to be limited. Moreover, a marginal improvement in the lending spreads is anticipated, supported by the systemic interest rate cuts announced in H1 CY2025, provided the company maintains its loan book yields. Additionally, JDFIPL's ability to keep the credit costs under control while improving its operating efficiency would remain crucial for maintaining healthy profitability.

### Credit challenges

**Relatively high portfolio vulnerability** – JDFIPL primarily lends to farmers for the purchase of farm equipment manufactured and sold by JDIPL. Given the concentrated exposure to borrowers susceptible to adverse economic and agro-climatic cycles, JDFIPL's portfolio is exposed to relatively high vulnerability. Additionally, ICRA notes the rising share of the construction equipment segment in the company's disbursements. JDFIPL's track record in this segment is limited as it grew to Rs. 707 crore as on March 31, 2025 (13% of the loan book) from Rs. 96 crore as on March 31, 2020 (4%). Thus, the portfolio in this product segment has limited seasoning and the company's ability to maintain adequate asset quality through economic cycles is yet to be established.

Nonetheless, the headline asset quality metrics have remained under control and the GNPA/gross advances ratio stood at 4.4% as on March 31, 2025 (net NPA/net advances: 2.6%). In this regard, ICRA notes the volatility in the asset quality indicators in the agro-related lending business with the headline asset quality tending to improve around the harvest season. JDFIPL's GNPA/gross advances ratio had remained in the range of 4.8-6.5% during FY2018-FY2024. Write-offs (as a percentage of the opening loan book) stayed range-bound at 1.1-1.3% in the last three fiscals, while restructured loans were negligible as on March 31, 2025. JDFIPL's 5-year average credit cost was 1.7% during FY2021-FY2025, with a peak of 2.8% in FY2022.

## Liquidity position: Strong

While JDFIPL's collections are characterised by seasonality (exposures in the tractor finance segment have a semi-annual repayment cycle) and the asset-liability maturity profile may reflect modest cumulative negative mismatches in certain near-term buckets, ICRA notes the sizeable undrawn lines of credit (~Rs. 800 crore of unutilised bank lines as on May 31, 2025, excluding unutilised backup line of credit of Rs. 800 crore from the parent) maintained by the company to plug such mismatches. Further, it has good financial flexibility as it is a subsidiary of Deere; it has relationships with global financial institutions, providing it with access to funds at competitive rates. JDFIPL shares treasury bandwidth with its immediate parent, which works closely with the broader Group to manage the funding requirements. This, coupled with the high likelihood of support from the parent, augurs well for the company's liquidity profile.

## Rating sensitivities

**Positive factors** – Not applicable

**Negative factors** – Pressure on the ratings could arise on a deterioration in the parent's credit profile or on lower-than expected support from the parent group.

## Analytical approach

Analytical approach	Comments
Applicable rating methodologies	<a href="#">ICRA's Credit Rating Methodology for Non-banking Finance Companies (NBFCs)</a>
Parent/Group support	Ultimate parent: Deere & Company (Deere) Immediate parent: John Deere India Private Limited (JDIPL) ICRA expects Deere to be willing to extend financial support to JDFIPL through JDIPL, if needed, given the importance the company holds for JDIPL, and hence Deere, for meeting its objectives. JDFIPL, JDIPL and Deere also share a common name, which, in ICRA's opinion, would persuade the Group to provide financial support to JDFIPL to protect its reputation from the consequences of a Group entity's distress
Consolidation/Standalone	Standalone

## About the company

John Deere Financial India Private Limited (JDFIPL), incorporated in October 2011, is a non-deposit taking non-banking financial company registered with the Reserve Bank of India (RBI). It is a wholly-owned subsidiary of John Deere India Private Limited (JDIPL), which is indirectly wholly owned by Deere & Company (Deere; through John Deere Asia (Singapore) Pte Limited). JDFIPL primarily offers retail finance for the purchase of farm equipment manufactured and sold by JDIPL and for construction equipment manufactured and sold by Wirtgen India Private Limited. As on March 31, 2025, JDFIPL's gross loan portfolio outstanding was Rs. 5,261 crore. While the agriculture segment accounted for 87% of the portfolio with an average ticket size of Rs. 6.5 lakh, the construction equipment segment accounted for the balance.

JDFIPL reported a net profit of Rs. 152 crore in FY2025 on total income of Rs. 754 crore compared to Rs. 131 crore and Rs. 694 crore, respectively, in FY2024. Its net worth stood at Rs. 1,189 crore, as on March 31, 2025, with a capital adequacy ratio of 22.3%.

### Key financial indicators (audited)

JDFIPL	FY2024	FY2025
Total income	694.0	754.3
Profit after tax	130.6	152.5
Total assets*	4,852.3	5,521.0
Return on assets*	2.8%	2.9%
Gross gearing (times)	3.3	3.4
Gross stage 3	4.8%	4.4%
CRAR	22.4%	22.3%

\*Based on gross loan book (JDFIPL does not have an off-balance sheet, managed loan book)

### Status of non-cooperation with previous CRA: Not applicable

### Any other information:

JDFIPL also faces prepayment risk, given the possibility of debt acceleration upon the breach of covenants, including financial covenants and parentage-linked covenants. Upon failure to meet the covenants, if the company does not get waivers from the lenders/investors or they do not provide it with adequate time to arrange for alternative funding to pay off the accelerated loans, the ratings would face pressure.

### Rating history for past three years

Current (FY2026)				Chronology of rating history for the past 3 years

### Complexity level of the rated instruments

Instrument	Complexity indicator
Long-term fund-based bank lines – Others	Simple
Commercial paper	Very Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's

credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
