## Satin Creditcare Network Limited: Rating confirmed as final for PTCs backed by microfinance loan receivables issued by Rover 2025

### Summary of rating action

Trust name	Instrument*	Current rated amount (Rs. crore)	Rating action
Rover 2025	Series A1 PTC	144.04	[ICRA]AA+(SO); provisional rating confirmed as final

\*Instrument details are provided in Annexure I

### Rationale

ICRA had assigned a provisional rating to the pass-through certificates (PTCs) issued by Rover 2025 under a securitisation transaction originated by Satin Creditcare Network Limited (SCNL/Originator; rated [ICRA]A (Stable)). The PTCs are backed by a pool of microfinance loan receivables originated by SCNL with an aggregate principal outstanding of Rs. 164.62 crore (pool receivables of Rs. 197.71 crore). SCNL is also the servicer of the transaction.

Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

### Pool performance summary

Parameter	Rover 2025
Payout month	June 2025
Months post securitisation	4
Series A1 PTC amortisation	26.34%
Cumulative prepayment rate	3.08%
Cumulative collection efficiency	99.67%
Loss-cum-0+ days past due (dpd)	0.76%
Loss-cum-30+ dpd	0.41%
Loss-cum-90+ dpd	0.05%
Cumulative cash collateral (CC) utilisation	0.00%

### Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. The residual cash flow available, after making the promised and expected payments, shall flow back to the Originator on every payout date. All prepayment amounts would be passed on to Series A1 PTC (till Series A1 PTC principal is not fully amortised) every month and future payouts will be revised accordingly.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 7.00% of the initial pool principal, amounting to Rs. 11.52 crore, provided by the Originator, (ii) subordination of 12.50% of the initial pool principal for Series A1 PTC, and (iii) the excess interest spread (EIS) of 14.53% of the initial pool principal for Series A1 PTC.

## Key rating drivers and their description

### Credit strengths

**Granular pool supported by presence of credit enhancement** – The pool is granular, consisting of 37,451 contracts, with the top 10 contracts forming only 0.05% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the CC, subordination and EIS would absorb a part of the losses in the pool and provide support in meeting the PTC payouts.

**No overdue contracts in the pool** – The pool has been filtered in such a manner that there were no overdue contracts as on the cut-off date.

**Seasoned contracts in the pool** – The pool had amortised by almost 22% as on the cut-off date with no delinquencies seen in any of the contracts, post loan disbursement. This reflects the relatively better credit profile of the borrowers.

**Track record of SCNL** – SCNL has a track record of more than two decades in the lending business with sufficient underwriting policies and collection procedures. The company has adequate processes for servicing the loan accounts in the securitised pool.

### Credit challenges

**High geographical concentration** – The pool has high geographical concentration with the top 3 states, viz. Uttar Pradesh, Bihar and Punjab, contributing ~65% to the initial pool principal amount. Its performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

**Risks associated with lending business** – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The performance of microfinance loans would also be exposed to political and communal risks.

**Increasing delinquencies in microfinance sector** – The microfinance sector witnessed a decline in collections and a consequent rise in delinquencies in the current fiscal on account of multiple factors like heat waves, general elections, borrower overleveraging and attrition in collection teams. The sustained impact, if any, of these factors on the collections from the pool would be monitorable.

### Key rating assumption

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 4.00%, with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 2.4% to 9% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

### Details of key counterparties

The key counterparties in the rated transaction are as follows:

Transaction name	Rover 2025
Originator	Satin Creditcare Network Limited
Servicer	Satin Creditcare Network Limited
Trustee	Catalyst Trusteeship Limited
CC holding bank	HSBC Bank
Collection and payout bank	HSBC Bank

### Liquidity position: Superior

The liquidity for Series A1 PTC is superior after factoring in the credit enhancement available to meet the promised payouts to the investor. The total credit enhancement would be ~6.75 times the estimated loss in the pool.

### Rating sensitivities

**Positive factors** – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

**Negative factors** – The sustained weak collection performance of the underlying pool (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer could also exert pressure on the rating.

### Analytical approach

The rating action is based on the trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

### About the originator

SCNL, set up in 1990 to grant individual business loans to urban shopkeepers, started providing group lending services to the rural poor in 2008. It was registered with the Reserve Bank of India (RBI) as a deposit-taking non-banking financial company (NBFC) under the name, Satin Leasing and Finance Company Limited. Following its conversion into a public limited company in 1994, the company was renamed Satin Creditcare Network Limited in 2000. It stopped accepting public deposits from November 2004 and the RBI changed its classification to Category B (non-deposit taking) from Category A (deposit taking) in February 2009 and converted it into an NBFC-microfinance institution (NBFC-MFI) in November 2013. The company's microfinance operations are based on the Grameen Bank joint liability group (JLG) model and were spread across 1,454 branches spread across 27 states/Union Territories on a consolidated basis as on March 31, 2025.

As on March 31, 2025, its consolidated assets under management (AUM) stood at Rs. 12,784 crore.

### Complexity level of the rated instrument

Instrument	Complexity indicator
Series A1 PTC	Moderately complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click here](#)
