Keertana Finserv Limited: Ratings confirmed as final for PTCs issued under micro enterprise loan receivables securitisation transaction

Summary of rating action

Trust Name	Instrument*	Rated Amount (Rs. crore)	Rating Action
Koronis 03 2025	Series A1(a) PTCs	26.83	[ICRA]A+(SO); provisional rating confirmed as final
	Series A1(b) PTCs	3.08	[ICRA]A(SO); provisional rating confirmed as final

*Instrument details are provided in Annexure I

Rationale

ICRA had assigned provisional ratings to Series A1(a) pass-through certificates (PTCs) and Series A1(b) PTCs issued by Koronis 03 2025 under a securitisation transaction originated by Keertana Finserv Limited {Keertana/Originator; rated [ICRA]BBB(Stable)}. The PTCs are backed by a pool of micro enterprise loan receivables originated by Keertana with an aggregate principal outstanding of Rs. 34.17 crore (pool receivables of Rs. 40.10 crore). Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said ratings have now been confirmed as final. Keertana is the servicer for the rated transaction.

Pool performance summary:

Parameter	Koronis 03 2025
Payout month	June 2025
Months post securitisation	3
Pool amortisation	18.1%
Series A1(a) PTC Amortisation	24.2%
Series A1(b) PTC Amortisation	0.0%
Monthly Collection Efficiency	93.8%
Cumulative collection efficiency (including advance collections) ¹	96.0%
Cumulative Prepayment rate	0.4%
Loss-cum-0+ days past due (dpd) ²	8.9%
Loss-cum-30+ dpd ³	2.9%
Loss-cum-90+ dpd ⁴	0.0%
Cumulative cash collateral (CC) utilisation	0.0%

Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout to Series A1(a) PTCs and Series A1(b) PTCs on a pari passu basis. Until the March 2026 payout month, the principal is expected to be paid on a monthly basis (100% of the pool principal billed) to Series A1(a) PTCs till its redemption, followed by the expected principal payout to Series A1(b) PTCs. From April 2026 payout month, the principal is expected to be paid pari passu to Series A1(a) PTCs

¹ Cumulative collections/ (Cumulative billings + Opening overdues at the time of securitisation)

² Principal outstanding on contracts aged 0+ dpd / Principal outstanding on the pool at the time of securitisation

³ Principal outstanding on contracts aged 30+ dpd / Principal outstanding on the pool at the time of securitisation

⁴ Principal outstanding on contracts aged 90+ dpd / Principal outstanding on the pool at the time of securitisation

and Series A1(b) PTCs on a monthly basis. The principal for both series of PTCs is promised on the respective final maturity dates. Any surplus excess interest spread (EIS), after meeting the promised payouts, will flow back to the Originator on a monthly basis. Till the March 2026 payout month, any prepayment in the pool would be used for the prepayment of Series A1(a) PTCs principal and, post that, on a pari passu basis to Series A1(a) PTCs and Series A1(b) PTCs. From April 2026 payout month, the prepayment amounts would be passed on to Series A1(a) PTCs and A1(b) PTCs on a pari passu basis for the respective amounts outstanding till complete redemption.

If the current collection efficiency in respect of the pool is less than 95% for any two consecutive payouts and/or the portfolio at risk (PAR)>90 of the pool exceeds 5% of the initial principal outstanding, the EIS shall be utilised towards the repayment of the principal payout to the Series A1 investors.

The credit enhancement available in the structure is in the form of (i) a CC of 5.00% of the initial pool principal, amounting to Rs. 1.71 crore, provided by the Originator, (ii) subordination of 21.50% of the initial pool principal for Series A1(a) PTCs and 12.50% for Series A1(b) PTCs, and (iii) the EIS of 10.98% of the initial pool principal for Series A1(a) and Series A1(b) PTCs.

Key rating drivers and their description

Credit strengths

Granular pool supported by presence of credit enhancement – The pool is granular, consisting of 12,205 contracts, with no single borrower exceeding 0.1% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the CC, subordination and EIS would absorb some amount of the losses in the pool and provide support in meeting the PTC payouts.

No overdue contracts in the pool – The pool has been filtered in such a manner that there are no overdue contracts as on the cut-off date. Further, none of the contracts in the pool have ever been delinquent, which is a credit positive.

Seasoned contracts in the pool – The pool has moderate amortisation of ~25% as on the cut-off date thereby reflecting the borrowers' better credit profile, repayment track record and buildup of borrower equity.

Adequate servicing capability – The company has adequate processes for servicing the loan accounts in the securitised pools. It has a demonstrated track record of ~4.5 years of regular collections and recovery in the microfinance portfolio. Further, company has been promoted by Ms. Padmaja Reddy, who has vast experience in handling microfinance, gold loans, agriculture and related loans, Loan Against Property (LAP) and Micro, Small and Medium Enterprise (MSME) loans.

Credit challenges

High geographical concentration – The pool has high geographical concentration with the top state, viz. Andhra Pradesh contributing ~87% to the initial pool principal amount. The concentration remains high even at district-level with top 5 districts accounting for ~44% of the initial pool principal amount. The pool's performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

Risks associated with lending business – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The performance of microfinance loans would also be exposed to political and communal risks.

Increasing delinquencies in microfinance sector – The microfinance sector has seen a decline in collections and a consequent rise in delinquencies in the current fiscal on account of multiple factors like heatwaves, general elections, borrower overleveraging and attrition in the collection teams. The sustained impact of these factors, if any, on the collections from the pool would be a key monitorable.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered based on the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 5.00% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 3.0% to 9.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

Details of key counterparties

The key counterparties in the rated transaction is as follows:

Transaction Name	Koronis 03 2025
Originator	Keertana Finserv Limited
Servicer	Keertana Finserv Limited
Trustee	Axis Trustee Services Limited
CC holding bank	ICICI Bank
Collection and payout account Bank	Bandhan Bank

Liquidity position:

For Series A1(a) PTCs: Superior

The liquidity for Series A1(a) PTCs is superior after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~6.75 times the estimated loss in the pool.

For Series A1(b) PTCs: Strong

The liquidity for Series A1(b) PTCs is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~4.75 times the estimated loss in the pool.

Rating sensitivities

Positive factors – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

Negative factors – The sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer could also exert pressure on the ratings.

Analytical approach

The rating action is based on the trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A1(a) PTCs	Moderately Complex
Series A1(b) PTCs	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's

credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
