WheelsEMI Private Limited: Ratings confirmed as final for PTCs backed by vehicle loan receivables issued by Kepler 05 2025

Summary of rating action

Trust name	Instrument*	Current rated amount (Rs. crore)	Rating action
Kepler 05 2025	Series A1(a) PTCs	15.95	[ICRA]AA-(SO); provisional rating confirmed as final
	Series A1(b) PTCs	1.77	[ICRA]A-(SO); provisional rating confirmed as final
	Equity Tranche PTC	1.01	[ICRA]BBB(SO); provisional rating confirmed as final

*Instrument details are provided in Annexure I

Rationale

ICRA had assigned provisional rating to Series A1(a) PTCs, Series A1(b) PTCs and Equity Tranche PTC issued by Kepler 05 2025 under a securitisation transaction originated by WheelsEMI Private Limited {WheelsEMI/Originator; rated [ICRA]BBB (Stable)}. The PTCs are backed by a pool of vehicle loan receivables originated by WheelsEMI with an aggregate principal outstanding of Rs. 20.26 crore (pool receivables of Rs. 24.78 crore). WheelsEMI also acts as the servicer for the transaction.

Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said ratings have now been confirmed as final.

Pool performance summary

Parameter	Kepler 05 2025
Payout Month	August 2025
Months post securitisation	3
Pool amortisation	14.0%
Series A1(a) PTCs amortisation	17.8%
Series A1(b) PTCs amortisation	0.0%
Equity Tranche PTC amortization	0.0%
Cumulative prepayment rate	0.2%
Cumulative collection efficiency ¹	99.0%
Monthly collection efficiency	98.8%
Loss cum 0+ dpd ²	2.6%
Loss cum 30+ dpd ³	0.3%
Loss cum 90+ dpd ⁴	0.0%
Cumulative credit collateral utilisation	0.0%

¹ Cumulative collections (incl. advances)/ (Cumulative billings + Opening overdue at the time of securitisation)

² Principal outstanding on contracts aged 0+ dpd / Principal outstanding on the pool at the time of securitisation

³ Principal outstanding on contracts aged 30+ dpd / Principal outstanding on the pool at the time of securitisation

⁴ Principal outstanding on contracts aged 90+ dpd / Principal outstanding on the pool at the time of securitisation

Transaction structure

As per the transaction structure, the Equity Tranche PTC payouts are completely subordinated to the Series A1 PTC payouts. Till September 15, 2026, the collections from the pool will be used for making the promised interest payouts to Series A1(a) and Series A1(b) PTCs on a pari passu basis. After making the promised interest payouts to Series A1(a) and A1(b) PTCs, the collections will be used to make the expected principal payouts to Series A1(a) PTCs till its redemption followed by the expected principal payout to Series A1(b) PTCs. The entire principal repayment to all tranches is promised on the scheduled maturity date of the respective tranches. From September 16, 2026 till the final maturity date, the collections from the pool will be used for making the promised interest payouts to Series A1(a) and Series A1(b) PTCs on a pari passu basis. After making the promised interest payouts, collections will be utilised for the redemption of Series A1(a) and A1(b) PTCs on a pari passu basis. The excess interest spread (EIS) available, after meeting the expected and promised PTC payments, will flow back to the Originator on a monthly basis.

All prepayment amounts would be passed on to Series A1(a) PTCs till September 15, 2026. From September 16, 2026, the prepayment amounts would be passed on to Series A1(a) and Series A1(b) PTCs on a pari passu basis for the respective amounts outstanding till complete redemption.

The transaction has defined certain trigger events, on the occurrence of which the residual cash flows would be passed on to the Series A1 PTC investors.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 5.00% of the initial pool principal, amounting to Rs. 1.01 crore, provided by the Originator, (ii) principal subordination of 21.25% of the initial pool principal for Series A1(a) PTCs, 12.50% for Series A1(b) PTCs and 7.50% for the Equity Tranche PTC, and (iii) the EIS of 14.74% of the pool principal for all three tranches.

Key rating drivers and their description

Credit strengths

Granular pool supported by presence of credit enhancement – The current pool is granular, consisting of 2,782 contracts and top 10 contracts forming less than ~2.00% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the CC, subordination and EIS would absorb some amount of the losses in the pool and provide support in meeting the PTC payouts.

Healthy bureau score of borrowers – All the contracts in the pool belong to borrowers with a CIBIL score of at least 700. This reflects the relatively better credit profile.

No overdue contracts in the pool – The pool has been filtered in such a manner that there are no overdue contracts as on the cut-off date. Further, all the contracts in the pool have never been delinquent post loan disbursement, thereby reflecting the borrowers' relatively better credit profile, which is a credit positive.

Adequate servicing capability of WheelsEMI – The Originator has adequate processes for servicing the loan accounts in the securitised pool. It has a considerable track record of over a decade of regular collections across geographies and multiple economic cycles.

Credit challenges

High geographical concentration – The pool has high geographical concentration with the top 3 states, viz. Uttar Pradesh, Bihar and Madhya Pradesh, contributing ~83% to the initial pool principal amount. The pool's performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

Risks associated with lending business – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 5.25% of the pool principal with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 2.4% to 9.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final ratings for the instruments.

Details of key counterparties

The key counterparties in the rated transaction are as mentioned below:

Transaction Name	Kepler 05 2025
Originator	Wheelsemi Private Limited
Servicer	Wheelsemi Private Limited
Trustee	Catalyst Trusteeship Limited
CC holding bank	IDFC First Bank
Collection and payout account Bank	ICICI Bank Limited

Liquidity position:

Series A1(a) PTCs: Superior

The liquidity for Series A1(a) PTCs is superior after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~6.75 times the estimated loss in the pool.

Series A1(b) PTCs and Equity Tranche PTC: Strong

The liquidity for Series A1(b) PTCs and the Equity Tranche PTC is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~5.00 times and ~4.25 times of the estimated loss in the pool for Series A1(b) PTCs and the Equity Tranche PTC, respectively.

Rating sensitivities

Positive factors – The ratings could be upgraded on the strong collection performance of the underlying pool (monthly collection efficiency >95%) on a sustained basis, leading to the build-up of the credit enhancement cover for the remaining payouts.

Negative factors – The sustained weak collection performance of the underlying pool (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer could also exert pressure on the ratings.

Analytical approach

The rating action is based on the trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

About the originator

WheelsEMI is a Pune based, registered non-deposit taking NBFC which provides financing for new as well as pre-owned two-wheelers and EV 3-wheelers. The company is promoted by Mr. Srinivas Kantheti and Mr. V Karunakaran who acquired Vardnarayan Savings and Investment Co Pvt Ltd., a small finance company based in Nanded, Maharashtra with a loan book of Rs. 35 lakh (at the time of acquisition) in 2017. WheelsEMI provides financing for low-income customers. Bike Bazaar Finance is the brand name of WheelsEMI Private Limited.

The company also has a 100% subsidiary named BluBird Auto Trade Private Limited, which was incorporated in April 2019. Blubird Auto Trade started its operations with purchasing, refurbishing and selling pre-owned two wheelers. However, now its primary business is leasing/ renting of e-2-wheelers. Its customer base mainly consists of riders working for delivery apps.

Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A1(a) PTCs	Moderately Complex
Series A1(b) PTCs	Moderately Complex
Equity Tranche PTC	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click here](#)
