## Satin Creditcare Network Limited: Provisional [ICRA]AA+(SO) assigned to Series A1 PTC backed by microfinance loan receivables issued by Trumpet 2023

### Summary of rating action

| Trust name   | Instrument*   | Current rated amount (Rs. crore) | Rating action                       |
|--------------|---------------|----------------------------------|-------------------------------------|
| Trumpet 2023 | Series A1 PTC | 109.06                           | Provisional [ICRA]AA+(SO); assigned |

\*Instrument details are provided in Annexure I

|                                                    |                                                                  |
|----------------------------------------------------|------------------------------------------------------------------|
| Rating in the absence of pending actions/documents | No rating would have been assigned as it would not be meaningful |
|----------------------------------------------------|------------------------------------------------------------------|

### Rationale

The pass-through certificates (PTCs) are backed by a pool of microfinance loan receivables originated by Satin Creditcare Network Limited {SCNL/Originator; rated [ICRA]A (Stable)} with an aggregate principal outstanding of Rs. 125.35 crore (pool receivables of Rs. 150.04 crore). SCNL would also act as the servicer for the transaction.

The provisional rating is based on the strength of the cash flows from the selected pool of contracts, the credit enhancement available in the structure as well as the integrity of the legal structure. The rating is subject to the fulfilment of all the conditions under the structure and ICRA's review of the documentation pertaining to the transaction.

### Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will flow back to the Originator on a monthly basis. However, on the occurrence of predefined trigger events, the residual EIS every month shall be utilised for accelerating the principal payment due to Series A1 PTC. Any prepayment in the pool would be used for the prepayment of Series A1 PTC principal.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 6.50% of the initial pool principal, amounting to Rs. 8.15 crore, to be provided by the Originator, (ii) subordination of 13.00% of the initial pool principal for Series A1 PTC and (iii) the EIS of 14.40% of the initial pool principal for Series A1 PTC.

### Key rating drivers and their description

#### Credit strengths

**Granular pool supported by presence of credit enhancement** – The pool is granular, consisting of 30,971 contracts, with the top 10 contracts forming only 0.1% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the CC, subordination and EIS would absorb some of the losses in the pool and provide support in meeting the PTC payouts.

**No overdue contracts in the pool** – The pool has been filtered in such a manner that there were no overdue contracts as on the cut-off date.

**Seasoned contracts in the pool** – The pool had amortised by almost 24% as on the cut-off date with no delinquencies seen in any of the contracts, post loan disbursement, thereby reflecting the borrowers' relatively better credit profile.

**Track record of SCNL** – The company has an established track record of more than two decades in the lending business and has suitable underwriting policies and collection procedures. It has adequate processes for servicing the loan accounts in the securitised pool.

### Credit challenges

**High geographical concentration** – The pool has high geographical concentration with the top 3 states, viz. Assam, Uttar Pradesh and Punjab, contributing ~79% to the initial pool principal amount. Its performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

**Risks associated with lending business** – The pool's performance would remain exposed to macroeconomic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The performance of microfinance loans would also be exposed to political and communal risks.

**Increasing delinquencies in microfinance sector** – The microfinance sector has seen a decline in collections and a consequent rise in delinquencies since the previous fiscal on account of multiple factors like heat waves, general elections, borrower overleveraging and attrition in collection teams. The sustained impact, if any, of these factors on the collections from the pool would be monitorable.

### Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 4.50%, with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 2.4% to 9% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

### Liquidity position: Superior

The liquidity for the instrument in the transaction is superior after factoring in the credit enhancement available to meet the promised payouts to the investors. The total credit enhancement would be ~6.50 times in the pool for Series A1 PTC.

### Rating sensitivities

**Positive factors** – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

**Negative factors** – The sustained weak collection performance of the underlying pool (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer could also exert pressure on the rating.

## Analytical approach

The rating action is based on the analysis of the performance of SCNL's portfolio till June 2025, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the credit enhancement cover available in the transaction.

| Analytical approach             | Comments                                    |
|---------------------------------|---------------------------------------------|
| Applicable rating methodologies | <a href="#">Securitisation Transactions</a> |
| Parent/Group support            | Not applicable                              |
| Consolidation/Standalone        | Not applicable                              |

## Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned rating is provisional and would be converted into final upon the execution of:

1. Trust deed
2. Assignment agreement
3. Legal opinion
4. Trustee letter
5. Chartered Accountant's certificate for know your customer (KYC) due diligence
6. Any other documents executed for the transaction

## Validity of the provisional rating

The trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

## Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA's Policy on Provisional Ratings available at [www.icra.in](http://www.icra.in).

## About the originator

SCNL, set up in 1990 to grant individual business loans to urban shopkeepers, started providing group lending services to the rural poor in 2008. It was registered with the Reserve Bank of India (RBI) as a deposit-taking non-banking financial company (NBFC) under the name, Satin Leasing and Finance Limited. Following its conversion into a public limited company in 1994, it was renamed Satin Creditcare Network Limited in 2000. It stopped accepting public deposits from November 2004 and the RBI changed its classification to Category B (non-deposit taking) from Category A (deposit-taking) in February 2009 and converted it into an NBFC-microfinance institution (NBFC-MFI) in November 2013.

The company's microfinance operations are based on the Grameen Bank joint liability group (JLG) model and were spread across 1,487 branches in the country as on June 30, 2025 on a standalone basis and 1,599 branches on a consolidated basis. As on June 30, 2025, the consolidated assets under management (AUM) stood at Rs. 12,499 crore. On a consolidated basis, SCNL reported a net profit of Rs. 45 crore in Q1 FY2026 (total comprehensive income (TCI) of Rs. 28 crore) against Rs. 186 crore in FY2025 (TCI of Rs. 142 crore).

### Complexity level of the rated instrument

| Instrument    | Complexity indicator |
|---------------|----------------------|
| Series A1 PTC | Moderately Complex   |

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click here](#)
