\*Instrument details are provided in Annexure I

### Rationale

While assigning the rating for Lupin Diagnostics Limited (LDL), ICRA has taken a consolidated view of Lupin Limited (Lupin) and its wholly owned subsidiary, LDL, given their common management and significant operational and financial linkages between them.

### Material event

On September 29, 2025, Lupin announced the signing of a definitive agreement to acquire 100% equity in VISUfarma B.V. (VISUfarma), a speciality pharmaceutical company headquartered in Amsterdam, the Netherlands. VISUfarma focuses on ophthalmic products and has a strong commercial footprint across Italy, the UK, and Spain. In CY2024, the company reported revenues of EUR 48.1 million. The acquisition will be executed through Lupin's wholly owned subsidiary, Nanomi B.V., for a total consideration of EUR 190 million (approximately Rs. 2,000 crore). The transaction is expected to be completed by December 2025, subject to regulatory approvals in Germany and Spain.

### Impact of material event

The acquisition will enable Lupin to broaden its European footprint beyond its current operations in the UK, Germany, and France, by entering relatively underpenetrated markets such as Italy and Spain while sustaining its healthy operating margins. These markets are typically difficult to access due to their fragmented nature and stringent regulatory requirements. The transaction is proposed to be funded largely through Lupin's existing cash reserves, given the company's strong liquidity position and healthy cash flow generation. As a result, this event is unlikely to have any adverse material impact on Lupin's credit profile. Nonetheless, the company's ability to successfully integrate the acquired business will be monitored

### Analytical approach

| Analytical approach             | Comments                                                                                                                                                                                                      |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Applicable rating methodologies | <a href="#">Pharmaceuticals</a><br><a href="#">Corporate Credit Rating Methodology</a>                                                                                                                        |
| Parent/Group support            | Not Applicable                                                                                                                                                                                                |
| Consolidation/Standalone        | For arriving at the ratings, ICRA has considered the consolidated financials of Lupin. As on June 30, 2025, the company had 33 subsidiaries and one joint venture company, which are enlisted in Annexure-II. |

## About the company

LDL is a wholly owned subsidiary of Lupin whose operations commenced from October 2021. It is a diagnostic service provider offering a comprehensive range of diagnostic services spanning pathological investigations of branches of bio-chemistry, molecular diagnostics, cytology, microbiology, serology, hematology, histopathology, immunology, and routine biochemistry. The company operates as a hub and spoke model with a national reference laboratory in Navi Mumbai, and having collection centers, pick up points, hospital laboratory management and home collection services across India.

Lupin was founded in 1968 by Late Dr. Desh Bandhu Gupta, father of the current Managing Director, Mr. Nilesh Gupta, after Dr. Gupta bought the Lupin trademark from Charak Pharmaceuticals. Set up originally as a proprietary concern, Lupin was converted into a private limited company in 1972 and became a public limited company in 1992. In June 2001, Lupin Chemicals merged with Lupin Laboratories Limited, following which the merged entity was renamed Lupin Limited. The amalgamation was aimed at leveraging the strengths of the two companies.

Lupin is an integrated pharmaceutical company with presence across research, manufacturing and marketing of formulations and APIs. The company's business mix can be broadly divided into two segments, formulations (accounted for 95% of Lupin's consolidated revenues in FY2025) and APIs (accounted for 5% of Lupin's consolidated revenues in FY2025). In terms of geographical presence, Lupin derived 38% of its FY2025 revenue from the United States, 34% from India, 13% from developed markets (comprising Canada, Australia, Europe and others) and 11% from other emerging markets (comprising LATAM, South Africa, the Philippines and Rest of the world).

As per the company, it is the third largest pharmaceutical player in US by prescriptions and the eighth largest company in the Indian pharmaceutical market.

## Complexity level of the rated instruments

| Instrument                                      | Complexity indicator |
|-------------------------------------------------|----------------------|
| Short-term-fund-based/non-fund based facilities | Simple               |

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click here](#)
