# PNB Housing Finance Limited: Rating reaffirmed for PTCs backed by home loan receivables issued by India Residential Mortgage Trust 2025 02

#### **Summary of rating action**

Trust name	Instrument*	Initial Rated amount (Rs. crore)	Current Rated amount (Rs. crore)	Rating action
India Residential Mortgage Trust 2025 02	Series A PTC	255.00	240.00	Provisional [ICRA]AAA (SO); reaffirmed

<sup>\*</sup>Instrument details are provided in Annexure I

Rating in the absence of pending actions/documents

No rating would have been assigned as it would not be meaningful

#### **Rationale**

ICRA had assigned a provisional rating to the pass-through certificates (PTCs) issued by India Residential Mortgage Trust 2025 02 under a securitisation transaction originated by PNB Housing Finance Limited {PNBHFL/Originator, rated [ICRA]AA+ (Stable)}. The rating action takes into account the downward revision in the underlying pool to Rs.266.77 crore from Rs.286.11 crore (pool receivables reduced to Rs.467.70 crore from Rs.520.98 crore) as informed to ICRA, due to removal of certain contracts, there. PNBHFL would also act as the servicer of the transaction.

The provisional rating is based on the strength of the cash flows from the selected pool of contracts, the credit enhancement available in the structure as well as the integrity of the legal structure. The provisional rating is subject to the fulfilment of all the conditions under the structure and ICRA's review of the documentation pertaining to the transaction.

# **Transaction structure**

As per the transaction structure, the monthly cash flow schedule comprises promised interest payment to Series A PTC. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will flow back to the Originator on a monthly basis. Any prepayment in the pool would be used for the prepayment of Series A PTC principal.

The credit enhancement available in the structure is in the form of (i) subordination of 10.04% of the initial pool principal for Series A PTC (in the form of first loss tranche) (ii) a credit collateral (CC; in form of second loss credit facility) of 5.00% of the initial pool principal amounting to Rs. 13.34 crore, to be provided by RMBS Development Company Limited (RDCL) (iii) the estimated EIS of ~31% of the initial pool principal for Series A PTC (based on indicative yield; actual number will be finalised after yield discovery on the NSE EBP Platform).

## Key rating drivers and their description

#### **Credit strengths**

**Established player in mortgage lending markets** - PNBHFL is an established player with a long track record of operations in the housing finance industry and a presence in 20 states/Union Territories (UTs) in India along with an experienced management team. The company has adequate processes for servicing of the loan accounts with demonstrated track record of over three decades of regular collections and recovery across a wide geography.

www.icra .in Sensitivity Label : Public Page | 1

Granular pool supported by presence of credit enhancement - The pool is granular, consisting of 1,120 contracts, with top 10 contracts forming less than ~1.7% share in the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the credit guarantee, subordination and EIS would absorb some amount of the losses in the pool and provide support in meeting the PTC payouts.

No overdue contracts in the pool - The pool has been filtered in such a manner that 99.9% of the contracts have nil overdue as on the cut-off date. Further, ~99% of the contracts in the pool have never been delinquent during the past 12 months in loan cycle, which is a credit positive.

High share of salaried borrowers – The current pool has high share (~83% share in the pool principal) which are salaried borrowers. This reduces the risks to some extent, given the more certain nature of the cash flows generated by such borrowers vis-à-vis self-employed borrowers.

# **Credit Challenges**

**Exposed to interest rate risk** – The transaction is exposed to interest rate risk as the yield all the contracts in the pool is floating and linked to originator's internal benchmark rate whereas the yield on the PTCs is fixed.

**Risks associated with lending business** – The pools' performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans.

#### **Key rating assumptions**

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 2.00% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 8.0% to 24.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

#### **Liquidity position: Superior**

The liquidity for Series A PTCs is superior after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be more than 10 times the estimated loss in the pool.

#### Rating sensitivities

Positive factors – Not applicable

**Negative factors** – The rating could be downgraded on the sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and credit enhancement utilisation levels. The rating could also be downgraded on a deterioration in the credit profile of RDCL. Weakening in the credit profile of the servicer could also exert pressure on the rating.

# **Analytical approach**

The rating action is based on the analysis of the performance of PNBHFL's portfolio till March 2025, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the credit enhancement cover available in the transaction.

Analytical approach	Comments		
Applicable rating methodologies Rating Methodology for Securitisation Transactions			
Parent/Group support Not Applicable			
Consolidation/Standalone	Not Applicable		

# Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned rating is provisional and would be converted into final upon the execution of:

- 1. Trust deed
- 2. Assignment agreement
- 3. Power of Attorney
- 4. Legal opinion
- 5. Trustee letter
- 6. Any other documents executed for the transaction

# Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

#### Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA's Policy on Provisional Ratings available at <a href="https://www.icra.in">www.icra.in</a>.

#### About the originator

Incorporated in 1988, PNBHFL is a deposit-accepting housing finance company. As of March 31, 2025, Punjab National Bank (PNB) and the Carlyle Group held a stake of 28.1% and 10.4%. The company offers home loans (including nascent stage of operations in affordable segment), LAP and builder loans. PNBHFL is geographically diversified with a portfolio spread across 20 states/UTs through 356 branches/outreaches. As on March 31, 2025, it reported total managed assets of Rs. 88,271 crore (Rs. 79,618 crore in March 31, 2024)

#### **Key financial indicators (Consolidated)**

Particular	FY2023 (audited)	FY2024 (audited)	FY2025 (audited)

# Complexity level of the rated instrument

Instrument	Complexity indicator
Series A PTC	Moderately complex

The Complexity indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: Click Here
