# Vedika Credit Capital Ltd: Rating confirmed as final for PTCs backed by microfinance loan receivables issued by Fury 2025

#### **Summary of rating action**

| Trust Name | Instrument*   | Current Rated Amount<br>(Rs. crore) | Rating Action                                       |  |
|------------|---------------|-------------------------------------|-----------------------------------------------------|--|
| Fury 2025  | PTC Series A1 | 36.17                               | [ICRA]A-(SO); provisional rating confirmed as final |  |

<sup>\*</sup>Instrument details are provided in Annexure I

#### Rationale

In June 2025, ICRA had assigned Provisional [ICRA]A-(SO) rating to Pass Through Certificate (PTC) Series A1, issued by Fury 2025. The PTCs are backed by a pool of micro finance loan receivables originated by Vedika Credit Capital Ltd. (Vedika/Originator) with an aggregate principal outstanding of Rs. 40.19 crore (pool receivables of Rs. 52.09 crore). Vedika is also the servicer for the transaction.

Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

# **Pool performance summary**

| Parameter                                                   | Fury 2025    |
|-------------------------------------------------------------|--------------|
| Payout month                                                | October 2025 |
| Months post securitisation                                  | 4            |
| Pool amortisation                                           | 13.73%       |
| PTC Series A1 amortisation                                  | 15.25%       |
| Cumulative prepayment rate                                  | 0.00%        |
| Cumulative collection efficiency <sup>1</sup>               | 99.73%       |
| Loss-cum-0+ dpd (% of initial pool principal) <sup>2</sup>  | 0.78%        |
| Loss cum 30+ dpd (% of initial pool principal) <sup>3</sup> | 0.10%        |
| Loss cum 90+ dpd (% of initial pool principal) <sup>4</sup> | 0.00%        |
| Cumulative cash collateral utilisation                      | 0.00%        |

www.icra .in Sensitivity Label : Public Page 1

<sup>&</sup>lt;sup>1</sup>Cumulative collections / (Cumulative billings + Opening overdues at the time of securitisation)

<sup>&</sup>lt;sup>2</sup>Principal outstanding on contracts aged 0+ dpd / Principal outstanding on the pool at the time of securitisation

<sup>&</sup>lt;sup>3</sup>Principal outstanding on contracts aged 30+ dpd / Principal outstanding on the pool at the time of securitisation

<sup>&</sup>lt;sup>4</sup>Principal outstanding on contracts aged 90+ dpd / Principal outstanding on the pool at the time of securitisation

#### **Transaction structure**

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. The residual cash flow available, after making the promised and expected payments, shall flow back to the Originator on a monthly basis. Any prepayment in the pool would be used for the prepayment of PTC Series A1 principal. However, on the occurrence of predefined trigger events, the residual EIS every month shall be utilised for accelerating the principal payment due to PTC Series A1.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 10.00% of the initial pool principal, amounting to Rs. 4.02 crore, provided by the Originator, (ii) subordination of 10.00% of the initial pool principal for PTC Series A1, and (iii) the excess interest spread (EIS) of 17.96% of the initial pool principal for PTC Series A1.

#### Key rating drivers and their description

#### **Credit strengths**

**Granular pool supported by presence of credit enhancement** – The pool is granular, consisting of 6,121 contracts, with no contract exceeding 1% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the CC, subordination and EIS would absorb some amount of the losses in the pool and provide support in meeting the PTC payouts.

**No overdue contracts in the pool-** The pool has been filtered in such a manner that there are no overdue contracts as on the cut-off date. Further, none of the contracts in the pool have ever been delinquent, which is a credit positive.

**Servicing capability of Vedika** – The company has adequate processes for servicing of the loan accounts in the securitised pool. It has demonstrated long track record of regular collections and recovery across geography and multiple economic cycles.

#### **Credit challenges**

High geographical concentration- The pool has high geographical concentration with the top 3 states, viz. Bihar, West Bengal and Assam, contributing ~78% to the initial pool principal amount. The pool's performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

**Risk associated with lending business** - The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The performance of microfinance loans would also be exposed to political and communal risks.

Increasing delinquencies in microfinance sector – The microfinance sector has seen a decline in collections and consequently rise in delinquencies in the current fiscal on account of multiple factors like heat wave, general elections, borrower overleveraging and attrition in collection teams. Any sustained impact of these factors on the collections from the pool would be monitorable.

### **Key rating assumptions**

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 4.50% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 3.0% to 9.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

#### **Details of key counterparties**

| Transaction Name                   | Fury 2025                     |
|------------------------------------|-------------------------------|
| Originator                         | Vedika Credit Capital Limited |
| Servicer                           | Vedika Credit Capital Limited |
| Trustee                            | Catalyst Trusteeship Limited  |
| CC holding Bank                    | Bank of Maharashtra           |
| Collection and payout account Bank | ICICI Bank Limited            |

## **Liquidity position: Superior**

The liquidity for PTC Series A1 is superior after factoring in the credit enhancement available to meet the promised payouts to the investor. The total credit enhancement is  $\sim$ 7.0 times the estimated loss in the pool.

#### **Rating sensitivities**

**Positive factors:** The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

**Negative factors:** The sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer could also exert pressure on the rating.

## **Analytical approach**

The rating actions are based on the trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

| Analytical Approach                 | Comments                                           |  |

## About the originator

Vedika Credit Capital Ltd is a Non-Deposit taking, Non-Banking Finance Company. The Company was originally registered as a Private Limited Company but was later converted into a Public Limited Company in November 1995. It was recognized and reregistered to carry out the business of Non-Banking Finance Company with approval from Reserve Bank of India in March 1998. Until February 2004 the company was involved in stock broking activities with its earlier owners. In February 2004, its present owners who stopped stock broking activities and started finance activities purchased the company. The purchasers of the Company were carrying out financing activity through Sole Proprietorship form of business organization. All the business thereafter was diverted to Vedika. Since 2007, the company has been into Micro Finance products like Joint Liability Groups loans and Individual Loans. As of Q1 FY2026, the company's AUM stood at Rs. 1,475.6 crore.

# Complexity level of the rated instrument

| Instrument    | Complexity Indicator |  |  |
|---------------|----------------------|--|--|
| PTC Series A1 | Moderately Complex   |  |  |

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional, or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: Click Here
