Aavas Financiers Limited: Rating reaffirmed for PTCs issued under home loan securitisation transaction

Summary of rating action

Trust Name	Instrument*	Initial Rated Amount (Rs. crore)	Amount O/s after Last Surveillance (Rs. crore)	Amount O/s after Nov-25 Payout (Rs. crore)	Rating Action
Prime Home Loan Trust IV	PTC Series A	250.75	201.71	164.42	[ICRA]AA(SO); Reaffirmed

*Instrument details are provided in Annexure I

Rationale

The pass-through certificates (PTCs) are backed by a pool of home loan receivables originated by Aavas Financiers Limited {Aavas/Originator; rated [ICRA]AA (Stable)}. Aavas is also the servicer for the transaction.

The rating reaffirmation factors in the healthy pool performance and the build-up of the credit enhancement cover over the future PTC payouts on account of the amortisation of the pool. The rating also draws comfort from the fact that the breakeven collection efficiency is lower than the actual collection level observed in the pool till the November 2025 payout month.

Pool performance summary

Parameter	Prime Home Loan Trust IV
Payout month	November 2025
Months post securitisation	27
Pool amortisation	34.43%
PTC amortisation	34.43%
Cumulative collection efficiency ¹	99.63%
Loss-cum-90+ (% of initial pool principal) ²	0.32%
Loss-cum-180+ (% of initial pool principal) ³	0.24%
Breakeven collection efficiency ⁴	77.19%
Cumulative cash collateral (CC) utilisation (% of initial CC)	0.0%
CC available (as % of balance pool principal)	4.57%
Excess interest spread (EIS) over balance tenure (as % of balance pool principal)	36.28%
Cumulative prepayment rate ⁵	25.56%

¹ Cumulative collections till date / Cumulative billings till date + Opening overdue

² POS on contracts aged 90+ dpd + Overdue / Initial POS on the pool

³ POS on contracts aged 180+ dpd + Overdue / Initial POS on the pool

⁴ It is the minimum collection efficiency required over the balance tenure to ensure all investor payouts are met: (Balance cash flows payable to investor – Credit collateral available) / Balance pool cash flows

⁵ POS at the time of prepayment of contracts prepaid till date / Initial pool principal

Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will flow back to the Originator on a monthly basis. Any prepayment in the pool would be used for the prepayment of the PTC Series A principal.

Key rating drivers and their description

Credit strengths

Healthy pool performance – Performance of the pool has been healthy with cumulative collection efficiency of ~99% till November 2025 payout month which has resulted in low delinquencies in the pools with the 90+ days past due (dpd) and 180+ dpd at 0.32% and 0.24% respectively. The break-even collection efficiency has also declined to ~77%. Further, there have been no instances of cash collateral utilisation till date owing to strong collection performance and presence of EIS in the transaction.

Build-up in credit enhancement – The rating factors in the build-up in the credit enhancement with cash collateral increasing to ~5% of the balance pool compared to around 3% at the time of securitisation. Internal credit support is also available through scheduled EIS of ~36%.

Contracts backed by residential properties – 100% contracts in the pool are backed by residential properties. This is expected to support the quality of the pool as it has been observed that borrowers tend to prioritise repayments towards such loans even during financial stress.

Established track record of the Originator – The Originator, which would also be servicing the loans in the transaction, has an established track record in the lending business of more than 10 years and has adequate underwriting policies and collection procedures. The company has adequate processes for servicing of the loan accounts in the securitised pool.

Credit challenges

Exposed to basis risk and interest risk – Yield for PTC is linked to the RBI repo rate whereas the underlying pool has combination of fixed and floating interest rate. Hence, is exposed to both the risks.

Risk associated with lending business – The pools' performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 2.25% of the initial pool principal with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 6% to 20% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

Details of key counterparties

The key counterparties in the rated transaction are as follows:

Transaction Name	Prime Home Loan Trust IV
Originator	Aavas Financiers Limited
Servicer	Aavas Financiers Limited
Trustee	Beacon Trusteeship Limited
CC holding Bank	ICICI Bank
Collection and payout account Bank	DBS Bank

Liquidity position: Superior

The liquidity for PTC Series A is superior after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement for the transaction would be more than 6.75 times the estimated losses in the pool.

Rating sensitivities

Positive factors – The rating could be upgraded on the sustained strong collection performance of the underlying pool of contracts (>95%), leading to lower-than-expected delinquency levels, and on an increase in the cover available for future investor payouts from the credit enhancement.

Negative factors – The sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer (Aavas) could also exert pressure on the rating.

Analytical approach

The rating action is based on the performance of the pool till the November 2025 payout month (October 2025 collection month), the present delinquency profile of the pool, the credit enhancement available in the pool, and the performance expected over the balance tenure of the pool.

About the originator

Aavas Financiers Limited (Aavas) is a Jaipur (Rajasthan) headquartered housing finance company, which primarily provides housing loans in rural and semi-urban areas. It is present in 14 states, with a network of 405 branches and assets under management of Rs. 21,356 crore as on September 2025.

Aavas was incorporated as a subsidiary of Au Financiers (India) Limited {now Au Small Finance Bank Limited (AuSFB)} in February 2011, and it formally began its operations in March 2012. In June 2016, AuSFB sold its stake in Aavas to private equity (PE) investors –Kedaara Capital and Partners Group –to meet the Reserve Bank of India’s (RBI) criteria for conversion to a small finance bank. Aavas launched an initial public offering (IPO) in FY2019 and its equity shares got listed on the stock exchanges on October 8, 2018. The total issue size was Rs. 1,734 crore, of which ~Rs. 360 crore was raised for business operations while the rest was utilised to pay off the existing shareholders. The company’s shareholding, as on March 31, 2025, was: CVC Capital

(22.5%), Kedaara Capital (16.0%), Partners Group (10.9%), foreign institutional investors (FIIs; 30.4%), domestic institutional investors (DIIs; 9.6%), the management team (1.7%) and others (8.9%).

Complexity level of the rated instrument

Instrument	Complexity Indicator
PTC Series A	Highly Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click here](#)
