## Northern Arc Capital Limited: Provisional ratings assigned to PTCs backed by consumer finance loan receivables (originated under co-lending partnerships) issued by Rudra Securitisation Trust 6

### Summary of rating action

Trust name	Instrument*	Current rated amount (Rs. crore)	Rating action
Rudra Securitisation Trust 6	Series A1 PTC	100.97	Provisional [ICRA]AA+(SO); assigned
	Equity PTC	6.88	Provisional [ICRA]A+(SO); assigned

\*Instrument details are provided in Annexure I

Rating in the absence of pending actions/documents

No rating would have been assigned as it would not be meaningful

### Rationale

The pass-through certificates (PTCs) are backed by a pool of consumer finance loan receivables originated by Northern Arc Capital Limited {NACL/Originator; rated [ICRA]AA- (Stable)} through co-lending partnerships. The pool has an aggregate principal outstanding of Rs. 114.74 crore (pool receivables of Rs. 159.97 crore). NACL will also be the servicer of the transaction.

The provisional ratings are based on the strength of the cash flows from the selected pool of contracts, the credit enhancement available in the structure as well as the integrity of the legal structure. The ratings are subject to the fulfilment of all the conditions under the structure and ICRA's review of the documentation pertaining to the transaction.

### Transaction structure

As per the transaction structure, till Series A1 PTC is outstanding, the monthly cash flow schedule comprises the promised interest payout to Series A1 PTC. The Series A1 PTC principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. The Equity PTC principal is then expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. Any prepayment in the pool would be used for the prepayment of the Series A1 PTC principal. The residual cash flow from the pool, after meeting the promised and expected payouts, will be passed on to the Originator.

However, on the occurrence of predefined trigger events, the residual EIS every month shall be utilised for accelerating the principal payment due to Series A1 PTC.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 6.00% of the initial pool principal, amounting to Rs. 6.88 crore, to be provided by the Originator, (ii) subordination of 12.00% of the initial pool principal for Series A1 PTC and 6.00% of the initial pool principal for the equity PTC, and (iii) the excess interest spread (EIS) of 30.22% of the initial pool principal for Series A1 and equity PTCs.

### Key rating drivers and their description

#### Credit strengths

**Granular pool supported by presence of credit enhancement** – The pool is granular, consisting of 8,099 contracts, with the top 10 obligors forming only 0.40% of the pool principal, thereby reducing the exposure to any single borrower. Further, the

credit enhancement available in the form of the CC, subordination and EIS would absorb some of the losses in the pool and provide support in meeting the PTC payouts.

**Seasoned contracts in the pool with no overdues** – The pool had a weighted average seasoning of ~8 months with no delinquent contracts as on the cut-off date. This reflects the borrowers' relatively better credit profile, which is a credit positive.

**Track record of co-lending operations** – NACL has a record of over four years of partnership in the consumer finance loans category. It has adequate underwriting policies and collection procedures across a wide geography. The company has adequate processes for servicing the loan accounts in the securitised pool. The collections received from borrowers are deposited in the escrow account controlled by NACL thereby indicating no commingling risk.

### Credit challenges

**High geographical concentration** – The pool has high geographical concentration with the top 3 states, i.e. Maharashtra, Tamil Nadu and Karnataka, contributing ~39% to the initial pool principal. Its performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

**Risks associated with lending business** – The pool's performance would remain exposed to macroeconomic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The pool is exposed to the inherent credit risk associated with the unsecured nature of the asset class and that recovery from delinquent contracts tends to be lower.

### Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 5.75% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 4.8% to 18% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidence of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final ratings for the instruments.

### Liquidity position: Strong

#### Series A1 PTC

The liquidity for Series A1 PTC is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~5.75 times the estimated loss in the pool.

#### Equity PTC

The liquidity for the equity PTC is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~4.75 times the estimated loss in the pool.

## Rating sensitivities

**Positive factors** – The ratings could be upgraded on the strong collection performance of the underlying pool (monthly collection efficiency >95%) on a sustained basis, leading to the build-up of the credit enhancement cover for the remaining payouts.

**Negative factors** – Pressure on the ratings could emerge on the sustained weak collection performance of the underlying pool (monthly collection efficiency of <90%), leading to higher-than-expected delinquency levels and credit enhancement utilisation levels. Weakening in the credit profile of the servicer (NACL) could also exert pressure on the ratings.

## Analytical approach

The rating action is based on the analysis of the performance of NACL’s consumer finance loan portfolio with its co-lending partners till September 2025, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the credit enhancement cover available in the transaction.

## Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned ratings are provisional and would be converted into final upon the execution of:

1. Trust deed
2. Assignment agreement
3. Legal opinion
4. Trustee letter
5. Chartered Accountant’s know your customer (KYC) certificate
6. Any other documents executed for the transaction

## Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

## Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA’s Policy on Provisional Ratings available at [www.icra.in](http://www.icra.in).

## About the originator

NACL is a systemically important non-banking financial company (NBFC). It acts as a platform in the financial services sector with the objective of catering to the diverse credit requirements of underserved households and businesses by providing access to debt finance. This is done either through direct lending and investments or by providing syndication and structuring services. The company commenced its business by targeting microfinance institutions (MFIs) and has diversified into other sectors including micro, small, and medium enterprise (MSME) finance, vehicle finance (includes commercial vehicle and two-wheeler finance), consumer finance, affordable housing finance and agricultural supply chain finance. Further, over the years, NACL has steadily diversified across products, geographies, and borrower segments. Nimbus, NACL’s proprietary technology

system, forms the backbone of its growth as a platform and enables the scaling up of business operations with execution and functional efficiencies and data analytics.

NACL's equity shares were listed on NSE and BSE in September 2024. As of June 2025, on a fully-diluted basis, Leapfrog Financial Inclusion India II Limited was the largest shareholder with a stake of 16.2%, followed by Augusta Investments II Pte Ltd (16.0%), Eight Roads Investments (Mauritius) (II) Limited (7.4%), International Financial Corporation (IFC; 6.1%), Dvara Trust (3.7%), Accion (4.0%), SMBC (3.8%) and others (42.9%).

### Key financial indicators

NACL (consolidated)	FY2024	FY2025	Q1 FY2026

### Complexity level of the rated instrument

Instrument	Complexity indicator
Series A1 PTC	Highly complex
Equity PTC	Highly complex

The Complexity indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click here](#)
