## Akara Capital Advisors Private Limited: Rating confirmed as final for PTCs backed by personal loan receivables issued by KLINGON-2025

### Summary of rating action

Trust name	Instrument*	Current rated amount (Rs. crore)	Rating action
KLINGON-2025	Series A1 PTCs	22.33	[ICRA]A(SO); provisional rating confirmed as final

\*Instrument details are provided in Annexure I

### Rationale

ICRA had assigned provisional rating to the pass-through certificates (PTC) issued by KLINGON-2025 under a securitisation transaction originated by Akara Capital Advisors Private Limited (ACAPL/Originator; rated [ICRA]BBB(Stable)). The PTCs are backed by personal loan receivables originated by ACAPL with an aggregate principal outstanding of Rs 25.97 crore (pool receivables of Rs 34.46 crore. ACAPL is also the servicer of the rated transaction. Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

### Pool performance summary

Parameter	KLINGON-2025
Payout month	December 2025
Months post securitisation	3
Pool amortisation	20.4%
Series A1 PTCs amortisation	24.4%
Cumulative prepayment rate	9.0%
Cumulative collection efficiency <sup>1</sup>	93.2%
Monthly collection efficiency	92.1%
Loss-cum 0+ days past due (dpd) <sup>2</sup>	5.5%
Loss cum 30+ dpd <sup>3</sup>	2.4%
Loss cum 90+ dpd <sup>4</sup>	0.0%
Cumulative cash collateral utilisation	0.0%

<sup>1</sup> (Cumulative current collections and overdue collections) / (Cumulative billings + Opening overdues at the time of securitisation)

<sup>2</sup> Unbilled and overdue principal portion of delinquent contracts, as a % of Initial pool principal

<sup>3</sup> Unbilled and overdue principal portion of contracts delinquent for more than 30 days, as a % of Initial pool principal

<sup>4</sup> Unbilled and overdue principal portion of contracts delinquent for more than 90 days, as a % of Initial pool principal

## Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will flow back to the Originator on a monthly basis. Any prepayment in the pool would be used for the prepayment of the Series A1 PTC principal.

In case the portfolio at risk (PAR)>90 of the pool exceeds 5% of the initial principal and/or the current collection efficiency in respect of the pool is less than 90% for any two consecutive payouts, the available EIS will be used for the redemption of Series A1 PTCs until the same is outstanding.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 5.00% of the initial pool principal, amounting to Rs. 1.30 crore, to be provided by the Originator, (ii) subordination of 14.00% (comprising equity tranche of 5.50% and over-collateralisation (OC) of 8.50%) of the initial pool principal for Series A1 PTCs, and (iii) the EIS of 23.97% of the initial pool principal for Series A1 PTCs.

## Key rating drivers and their description

### Credit strengths

**Granular pool supported by presence of credit enhancement** – The pool is granular, consisting of 10,221 contracts, with the top 10 contracts forming less than 1% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the CC, subordination and EIS would absorb some of the losses in the pool and provide support in meeting the PTC payouts.

**Healthy bureau score of borrowers** – All the borrowers in the pool have a CIBIL score of at least 700, which reflects their relatively better credit profile.

**No overdue contracts in the pool** – The pool has been filtered in such a manner that there are no overdue contracts as on the cut-off date. Further, none of the contracts in the pool have ever been delinquent after loan disbursement. This reflects the relatively better credit profile of the borrowers, which is a credit positive.

**Adequate servicing capability** – The company has adequate processes for servicing the loan accounts in the securitised pool. It has a track record of 4.5 years of regular collections and recoveries from the portfolio.

### Credit challenges

**Increased risk arising out of higher share of low-ticket contracts** – The pool consists of low-ticket contracts with about one-fourth of the pool principal comprising a ticket size of less than Rs. 25,000. This reflects the relatively more vulnerable credit profile of the underlying borrowers.

**Risks associated with lending business** – The pool's performance would remain exposed to macroeconomic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The pool is exposed to the inherent credit risk associated with the unsecured nature of the asset class. Moreover, recoveries from delinquent contracts tend to be lower.

## Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 7.25% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 4.8% to 18.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

## Details of key counterparties

The key counterparties in the rated transaction are as follows:

Transaction Name	KLINGON-2025
Originator	Akara Capital Advisors Private Limited
Servicer	Akara Capital Advisors Private Limited
Trustee	Catalyst Trusteeship Limited
CC holding bank	HDFC Bank
Collection and payout account bank	ICICI Bank

## Liquidity position: Strong

The liquidity for the instrument is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~4.25 times the estimated loss in the pool.

## Rating sensitivities

**Positive factors** – The rating could be upgraded on the strong collection performance of the underlying pool (monthly collection efficiency >95%) on a sustained basis, leading to the build-up of the credit enhancement cover for the remaining payouts.

**Negative factors** – The sustained weak collection performance of the underlying pool (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer could also exert pressure on the rating.

## Analytical approach

The rating action is based on the trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

## About the originator

Akara Capital Advisors Private Limited (ACAPL) is a Delhi-based non-deposit taking non-banking financial company (NBFC) registered with the Reserve Bank of India (RBI) since 2016. It started operations in 2017. The company primarily provides unsecured short-term personal loans to salaried individuals through web and mobile platforms. ACAPL is currently owned by Morus Technologies Pte. Ltd (MTPL), a Singapore-based neobanking start-up backed by investors like Public Blowfish Ventures, Divine Blessing Investments, Altara Ventures, Positive Moves Consulting, Fasanara Capital, Tencent Group, Uncorrelated Ventures, etc.

ACAPL is a 100% subsidiary of MTPL (holding company incorporated in Singapore). The Group has another wholly-owned subsidiary, EQX Analytics Private Limited (EQXAPL), which houses the technology platform known as StashFin and sources leads. The technology platform is used by ACAPL and other co-lenders for lending to customers.

### Complexity level of the rated instrument

Instrument	Complexity Indicator
Series A1 PTC	Highly Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [click here](#)
