Muthoot Fincorp Limited: Rating confirmed as final for PTCs backed by loan against property receivables issued by Impulse 2025

Summary of rating action

Trust Name	Instrument*	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action
Impulse 2025	PTC Series A1	98.92	97.25	[ICRA]AA+(SO); provisional rating confirmed as final

*Instrument details are provided in Annexure II

Rationale

In December 2025, ICRA had assigned provisional rating to the pass-through certificates (PTCs) issued by Impulse 2025 under a securitisation transaction originated by Muthoot Fincorp Limited (MFL/Originator). The PTCs are backed by a pool of loan against property receivables originated by MFL with an aggregate principal outstanding of Rs. 111.78 crore (pool receivables of Rs. 233.38 crore). MFL is also the servicer for the transaction.

Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

Pool performance summary

Parameter	Impulse 2025
Months post securitisation	3
Pool amortisation	4.16%
PTC Series A1 amortisation	4.78%
Cumulative prepayment rate	2.77%
Cumulative collection efficiency	98.05%
Loss cum 0+ dpd	4.84%
Loss cum 30+ dpd	0.80%
Loss cum 90+ dpd	0.24%
Cumulative cash collateral utilisation	0.00%

Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. Any surplus excess interest spread (EIS), after meeting the promised payouts, will flow back to the Originator on a monthly basis. Any prepayment in the pool would be used for the prepayment of PTC Series A1 principal. The transaction has certain predefined trigger events on the occurrence of which the residual cash flows would be passed on to PTC Series A1 investors.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 5.00% of the initial pool principal, amounting to Rs. 5.59 crore, to be provided by the Originator, (ii) principal subordination of 13.00%¹ of the initial pool principal

¹ Subordination at time of provisional rating was 11.50% of initial pool principal (split into 6.50% of overcollateral and 5.00% of equity tranche)

for PTC Series A1 (split into 8.00% of overcollateral and 5.00% of equity tranche) (iii) the EIS of 69.97% of the initial pool principal for PTC Series A1.

Key rating drivers and their description

Credit strengths

Granular pool supported by availability of credit enhancement – The pool is granular, consisting of 1,273 obligors, with the top 10 obligors accounting for 5.17% of the pool principal as on the cut-off date, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the CC, overcollateral and EIS would absorb a part of the losses in the pool and provide support in meeting the PTC payouts.

No overdue contracts in the pool – The pool has been filtered in such a manner that there were no overdue contracts as on the cut-off date. Further, ~91% of the contracts in the pool have never been delinquent in the past which is a credit positive.

Seasoned contracts in the pool – The pool has an average seasoning of ~10 monthly instalments on the cut-off date. This reflects the repayment track record and buildup in borrower equity which is a credit positive.

Adequate track record of originator – The company has adequate processes for the servicing of the loan accounts in the securitised pool. It has a track record of regular collections and recoveries and has expanded its presence to 16 states.

Credit challenges

High geographical concentration – The pool has high geographical concentration with the top 3 states, viz. Tamil Nadu, Telangana and Andhra Pradesh, contributing ~43% to the initial pool principal amount. The pool's performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

Exposed to interest rate risk – The transaction is exposed to interest rate risk as the underlying pool has fixed rate loans (floating after five years from disbursement), whereas yield on PTCs is floating and is linked to an external benchmark (Repo rate).

Risks associated with lending business – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income generating capability of the borrowers and their ability to make timely repayments of their loans.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 5.50% of the pool principal with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 7% to 27% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

Details of key counterparties

The key counterparties in the rated transactions are as follows:

Transaction Name	Impulse 2025
Originator	Muthoot Fincorp Limited (MFL)
Servicer	Muthoot Fincorp Limited (MFL)
Trustee	Beacon Trusteeship Limited
CC holding bank	Axis Bank Limited
Collection and payout account bank	ICICI Bank Limited

Liquidity position: Superior

The liquidity for the PTC instrument is superior after factoring in the credit enhancement available to meet the promised payout to the investors. The total credit enhancement would be more than 10 times the estimated loss in the pool.

Rating sensitivities

Positive factors – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

Negative factors – The sustained weak collection performance of the underlying pool (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer (Muthoot Fincorp) could also exert pressure on the rating.

Analytical approach

The rating action is based on the trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

Complexity level of the rated instrument

Instrument	Complexity Indicator
PTC Series A1	Highly Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects.
