Shiksha Financial Services India Private Limited: Rating confirmed as final for PTCs backed by Loan against property receivables issued by Onepiece 2026

Summary of rating action

Trust Name	Instrument*	Current Rated Amount (Rs. crore)	Rating Action
Onepiece 2026	Series A1 PTCs	5.65	[ICRA]A-SO); provisional rating confirmed as final

*Instrument details are provided in Annexure II

Rationale

ICRA had assigned provisional rating to the pass-through certificates (PTC) issued by Onepiece 2026 under a securitisation transaction originated by Shiksha Financial Services India Private Limited (Shiksha/originator). The PTCs are backed by a loan against property receivables originated by Shiksha with an aggregate principal outstanding of Rs. 6.57 crore (pool receivables of Rs. 10.73 crore). Shiksha would also act as the servicer for the transaction.

Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

Pool performance summary

Parameter	Onepiece 2026
Months post securitisation	3
Pool amortisation	9.1%
Series A1 PTC Amortisation	14.2%
Cumulative prepayment rate ¹	5.6%
Cumulative collection efficiency ²	99.8%
Loss-cum-0+ dpd ³ (days past due; as % of initial Pool Principal outstanding (POS))	0.4%
Loss cum 30+ dpd ⁴ (as % of initial Pool POS)	0.00%
Loss cum 90+ dpd ⁵ (as % of initial Pool POS)	0.00%
Cumulative cash collateral (CC) utilisation	0.00%

Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. The residual cash flows from the pool, after meeting the promised and expected payouts, will be used for the prepayment of Series A1 PTC principal. Any prepayment in the pool would be used for the prepayment of Series A1 PTCs principal.

The credit enhancement available in the structure is in the form of (i) a CC (Cash collateral) of 7.00% of the initial pool principal, amounting to Rs. 0.46 crore, provided by the Originator, (ii) subordination of 14.00% of the initial pool principal for Series A1 PTCs, and (iii) the EIS of 45.17% of the initial pool principal for Series A1 PTCs.

¹ Sum of Principal prepaid till date / Initial pool principal

² Cumulative collections till date including overdue and current collections / Cumulative billings till date

³ POS on contracts aged 0+ dpd + Overdues / Initial POS on the pool

⁴ POS on contracts aged 30+ dpd + Overdues / Initial POS on the pool

⁵ POS on contracts aged 90+ dpd + Overdues / Initial POS on the pool

Key rating drivers and their description

Credit strengths

Credit strengths

Granular pool supported by availability of credit enhancement – The pool is granular, consisting of 191 obligors, with the top 10 obligors accounting for ~11% of the pool principal as on the cut-off date, thereby reducing the exposure to any single borrower.

No overdue contracts in the pool – The pool has been filtered in such a manner that there were no overdue contracts as on the cut-off date.

Contracts backed by self-occupied residential properties – The entire pool is backed by self-occupied residential properties. This is expected to support the quality of the pool as it has been observed that borrowers tend to prioritise repayments towards such loans even during financial stress.

Moderate track record of servicing capability – The company has moderate processes for servicing of the loan accounts in the securitized pool as reflected by the demonstrated track record of almost a decade of collections.

Credit challenges

High geographical concentration – The pool has very high geographical concentration with ~99% of the pool originating from single state, viz. Tamil Nadu. The pool's performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

Risks associated with lending business – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income generating capability of the borrowers and their ability to make timely repayments of their loans.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered based on the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 6.00% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 7.20% to 27.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final ratings for the instruments

Details of key counterparties

The key counterparties in the rated transaction are as follows:

Onepiece 2026	
Investor in Series A1 PTCs	Ambit Finvest Private Limited
Trustee	Catalyst Trusteeship Limited
Legal Counsel	Phoenix Legal
FD Bank	ICICI Bank Limited
CPA Bank	ICICI Bank

Liquidity position: Superior

The liquidity for Series A1 PTCs is superior after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be more than 9 times the estimated loss in the pool.

Rating sensitivities

Positive factors: The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

Negative factors: The sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer could also exert pressure on the rating.

Analytical approach

The rating action is based on the trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.
