Annapurna Finance Private Limited: Provisional [ICRA]AA+(SO) assigned to PTCs backed by microfinance loan receivables issued by Nimbus MFI Trust 06 2026

Summary of rating action

Trust name	Instrument*	Rated amount (Rs. crore)	Rating action
Nimbus MFI Trust 06 2026	Series A1 PTC	58.43	Provisional [ICRA]AA+(SO); assigned

*Instrument details are provided in Annexure II

Rating in the absence of pending actions/documents	No rating would have been assigned as it would not be meaningful
--	--

Rationale

The pass-through certificates (PTCs) are backed by a pool of microfinance loan receivables originated by Annapurna Finance Private Limited {Annapurna/Originator; rated [ICRA]A- (Stable)¹} with an aggregate principal outstanding of Rs. 68.34 crore (pool receivables of Rs. 82.37 crore). Annapurna would also be the servicer of the rated transaction.

The provisional rating is based on the strength of the cash flows from the selected pool of contracts, the credit enhancement available in the structure as well as the integrity of the legal structure. The provisional rating is subject to the fulfilment of all the conditions under the structure and ICRA's review of the documentation pertaining to the transaction.

Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout. The principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will flow back to the Originator on a monthly basis. Any prepayment in the pool would be used for the prepayment of the Series A1 PTC principal.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 5.00% of the initial pool principal, amounting to Rs. 3.42 crore, to be provided by the Originator, (ii) over-collateralisation (OC) of 14.50% of the initial pool principal for Series A1 PTC and (iii) the EIS of 15.47% of the initial pool principal for Series A1 PTC.

Key rating drivers and their description

Credit strengths

Granular pool supported by presence of credit enhancement – The pool is granular, consisting of 14,347 contracts, with no single borrower exceeding 0.1% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of the CC, subordination in the form of OC, and the EIS would absorb some of the losses in the pool and provide support in meeting the PTC payouts.

No overdue contracts in the pool – The pool has been filtered in such a manner that there were no overdue contracts as on the cut-off date. Further, 100% of the borrowers comprising the pool principal have never been delinquent since disbursement, which is a credit positive.

¹ The current rating rationale of the Originator, available at this [link](#), provides its detailed rating history and rating transitions

Seasoned contracts in the pool – The pool had a weighted average amortisation of ~18% as on the cut-off date, reflecting the borrowers' better credit profile, repayment track record and buildup of borrower equity.

Adequate servicing capability of Annapurna – Annapurna, which would also be servicing the loans in the transaction, has an established track record of over two decades in the microfinance lending business along with adequate underwriting policies and collection procedures.

Credit challenges

High geographical concentration – The pool has high geographical concentration with the top 3 states, viz. Bihar, Madhya Pradesh and Uttar Pradesh, contributing ~61% to the initial pool principal amount. Its performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc. Nonetheless, the contracts are well-diversified across multiple districts with the top 10 districts not exceeding 20% of the pool amount, which alleviates the concentration risk to some extent.

Higher vulnerabilities associated with microfinance sector – In the past, the microfinance sector had seen lower collections and elevated delinquencies on account of borrower overleveraging and attrition in collections teams. However, portfolio performance is strengthening, in terms of reduction in delinquencies and improving collections, post guardrail implementation.

Risks associated with lending business – The pool's performance would remain exposed to macroeconomic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The performance of microfinance loans would also be exposed to political and communal risks.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 4.25% of the pool principal with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 3.0% to 9.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

Liquidity position: Superior

The liquidity for Series A1 PTC is superior after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be more than 6 times the estimated loss in the pool.

Rating sensitivities

Positive factors – The sustained strong collection performance of the underlying pool of contracts (monthly collection efficiency >95%), leading to lower-than-expected delinquency levels, and an increase in the cover available for future investor payouts from the credit enhancement would result in a rating upgrade.

Negative factors – The sustained weak collection performance of the underlying pool of contracts (monthly collection efficiency <90%), leading to higher-than-expected delinquency levels and higher credit enhancement utilisation levels, would result in a rating downgrade. Weakening in the credit profile of the servicer could also exert pressure on the rating.

Analytical approach

The rating action is based on the analysis of the performance of Annapurna’s microfinance institution (MFI) portfolio till March 2026, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the credit enhancement cover available in the transaction.

Analytical approach	Comments
Applicable rating methodologies	Securitisation Transactions
Parent/Group support	Not applicable
Consolidation/Standalone	Not applicable

Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned rating is provisional and would be converted into a final rating upon the execution of:

1. Trust deed
2. Assignment agreement
3. Power of attorney
4. Legal opinion
5. Trustee letter
6. Other key or important documents executed for the transaction

Validity of the provisional rating

The trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA’s Policy on Provisional Ratings available at www.icra.in.

About the originator

Annapurna Finance Private Limited, formerly known as Annapurna Microfinance Private Limited (AMPL), was formed by People’s Forum, a society registered in Odisha. People’s Forum has been engaged in various socio-economic development programmes, including microfinance, since 1990. In November 2009, People’s Forum acquired a non-banking financial company (NBFC), Gwalior Finance and Leasing Company Private Limited, which was renamed AMPL in February 2010.

Annapurna provides microcredit for mostly income-generating activities to women borrowers using the group lending model. It also offers other products such as individual loans to provide financial assistance to the micro, small and medium enterprise (MSME) segment, home and home improvement loans, consumer durable loans, etc. As of March 2026, Annapurna was catering to more than 29 lakh borrowers through a network of 1,757 branches spread across 464 districts in 22 states, while managing a portfolio of Rs. 11,535 crore.

Key financial indicators

Annapurna	FY2024	FY2025	FY2026

Annexure I: Disclosure pursuant to the SEBI Circular SEBI/HO/DDHS/DDHS-PoD-2/I/4685/2026 dated February 10, 2026

ICRA rated Instruments fall under regulatory purview of various Financial Sector Regulators (FSR) as under:

Sr. no.	Instrument	FSR
1	Listed/Proposed to be listed Bonds/Debentures/Preference Shares (all securities)	SEBI
2	Unlisted/Proposed to be unlisted Bonds/Debentures/ Preference share (all securities)	MCA
3	Listed PTCs / Securitisation Notes (originated by entities regulated by RBI) (*)	SEBI
4	Listed PTCs / Securitisation Notes (originated by entities not regulated by RBI) (*)	SEBI
5	Unlisted PTCs / Securitisation Notes (originated by entities regulated by RBI) (*)	RBI
6	Listed Commercial Paper and NCDs with original maturity less than 1 year	RBI
7	Unlisted Commercial Paper and NCDs with original maturity less than 1 year	RBI
8	Loan Facilities (Fund/Non-Fund Based) from Bank / NBFCs/ NHB/ FIs (\$))	RBI
9	External Commercial Borrowings/Loans from overseas branches of Indian Banks/other similar borrowings	RBI
10	Certificates of Deposit	RBI
11	Fixed Deposits raised by NBFCs, Banks, HFCs, FIs	RBI
12	Fixed Deposits raised by corporates other than NBFCs, Banks, HFCs, FIs	MCA
13	Inter Corporate Deposits/Loans extended by Corporates	MCA
14	Listed Security Receipts	SEBI
15	Unlisted Security Receipts	RBI
16	Unlisted PTCs / Securitisation Notes (originated by entities not regulated by RBI) (*)	Investor-side Regulator such as IRDAI, PFRDA (%)

(*) Includes securitisation transactions involving assignee payout, acquirer's payout.

(\$) Includes bank facilities such as liquidity facility, second loss facility that are part of securitisation transactions.

(%) These ratings were assigned prior to the introduction of SEBI CRA Circular dated Feb 10, 2026 and accordingly, investor side FSRs have been mentioned.

Other Activities offered by ICRA fall under regulatory purview of various Financial Sector Regulators (FSR) as under:

Sr. no.	Activity name	FSR
1	Credit Ratings for Capital Protection Oriented Schemes (by Mutual Funds and AIFs)	SEBI
2	Credit quality ratings (CQRs) for Mutual Fund Schemes and Schemes of AIFs	SEBI
3	Independent Credit Evaluation (ICE)	RBI
4	Expected Loss Ratings (For Loan Facilities [Fund/Non-Fund based] from Banks/NBFCs/NHB/FIs)	RBI
5	Expected Loss Ratings (Listed / Proposed to be listed Bonds / Debentures / Preference Shares (all securities))	SEBI
6	Expected Loss Ratings (Unlisted / Proposed to be unlisted Bonds/ Debentures / Preference Shares (all securities))	MCA
7	Credit Rating of Borrowing programme	(@)
8	Issuer Ratings	(#)
9	Monitoring Agency	SEBI
10	Research activities, incidental to rating such as research for Economy & Industries (permitted by SEBI vide SEBI Master Circular for CRAs)	NA

(@) The rated instrument may involve issuance of different instruments such as debt securities (listed or otherwise), bank loans, commercial paper (listed or otherwise), etc. The regulator of the instrument can only be determined upon issuance. Accordingly, ICRA shall capture the rated quantum details along with names of respective FSR in the press release(s) after the issuance(s) of the instruments.

(#) Since no instrument is being rated, FSR is not applicable. The rating scale and definitions stipulated in SEBI Master Circular for CRAs are being followed.

Disclosure: SEBI's grievance redressal/dispute resolution and SEBI investor protection mechanisms such as SCORES and ODR shall not be available for activities and instruments which fall under the regulatory purview of Financial Sector Regulators other than SEBI.

Complexity level of the rated instrument

Instrument	Complexity indicator
Series A1 PTC	Highly Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click here](#)
