Cholamandalam Investment and Finance Company Limited: Ratings confirmed as final for PTCs backed by a pool of vehicle loan receivables

Summary of rating action

Trust Name	Instrument*	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action	Financial sector regulator#
PLATINUM TRUST APR 2026 – TRANCHE II	PTC Series A	1,813.04	1,813.04	[ICRA]AAA(SO); provisional rating confirmed as final	RBI
	Second Loss Facility	27.20	27.20	[ICRA]A-(SO); provisional rating confirmed as final	RBI

*Instrument details are provided in Annexure I

#SEBI's grievance redressal/dispute resolution and SEBI investor protection mechanisms such as SCORES and ODR shall not be available for activities and instruments which fall under the regulatory purview of Financial Sector Regulators other than SEBI.

Rationale

ICRA had assigned provisional ratings to the pass-through certificates (PTCs) and Second Loss Facility (SLF) issued by PLATINUM TRUST APR 2026 – TRANCHE II under a securitisation transaction originated by Cholamandalam Investment and Finance Company Limited (CIFCL/Originator; rated [ICRA]AA+ (Positive)/[ICRA]A1+)¹. The PTCs are backed by a pool of vehicle loan receivables originated by CIFCL with an aggregate principal outstanding of Rs 1,813.04 crore (pool receivables of Rs 2,318.83 crore). CIFCL is also the servicer for the rated transaction.

Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said ratings have now been confirmed as final.

Pool performance summary

Parameter	PLATINUM TRUST APR 2026 – TRANCHE II
Payout month	July 2026
Months post securitisation	3
Pool amortisation	9.2%
PTC Series A amortisation	9.2%
Cumulative prepayment rate	2.4%
Cumulative collection efficiency ²	96.4%
Loss-cum-0+ days past due (dpd) ³	10.2%
Loss cum 30+ dpd ⁴	0.5%
Loss cum 90+ dpd ⁵	0.0%
Cumulative cash collateral (CC) utilisation	0.0%

¹The current rating rationale of the originator, available at this [link](#), provides its detailed rating history and rating transitions

²Cumulative collections till date including advance collections but excluding prepayments / Cumulative billings till date + Opening overdues

³POS on contracts aged 0+ dpd + Overdues / Initial POS on the pool

⁴POS on contracts aged 30+ dpd + Overdues / Initial POS on the pool

⁵POS on contracts aged 90+ dpd + Overdues / Initial POS on the pool

Transaction structure

As per the transaction structure, the monthly cash flow schedule comprises the promised interest payout and principal payout (100% of the pool principal billed). Any surplus excess interest spread (EIS), after meeting the promised payouts, will flow back to the Originator on a monthly basis. The cash collateral (CC), if utilised, will not be replenished from the EIS in subsequent months. Any prepayment in the pool would be used for the prepayment of the PTC Series A principal.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 6.50% of the initial pool principal, amounting to Rs. 117.85 crore, provided by the Originator. The CC will be split into a first loss facility (FLF), amounting to Rs. 90.66 crore (5.00% of initial pool principal), and a second loss facility (SLF) of Rs. 27.20 crore (1.50% of initial pool principal). (ii) the excess interest spread (EIS) of 13.91% of the initial pool principal for PTC Series A.

Key rating drivers and their description

Credit strengths

Established track record – CIFCL, which would also be servicing the loans in the transaction, has an established track record of more than four decades in the lending business with adequate underwriting policies and collection procedures across a wide geography. The company has sufficient processes for servicing of the loan accounts in the securitised pools.

Granular pool supported by presence of credit enhancement – The pool is granular, consisting of 33,589 contracts, with top 10 obligors forming only ~0.26% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of CC and EIS would absorb some amount of the losses in the pool and provide support in meeting the PTC payouts.

Seasoned contracts in the pool – The pool has a weighted average seasoning is ~14 months thereby reflecting the borrowers' relatively better credit profile which is a credit positive.

Credit challenges

High loan-to-value (LTV) contracts – Proportion of contracts with loan-to-value (LTV) ratio of more than 80% is high at ~62% (in terms of the principal amount outstanding on the cut-off date). Borrower with high LTV loans is more likely to default and are sensitive to economic downturns.

Risks associated with lending business – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 2.75% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 4.8% to 18.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final ratings for the instruments.

Details of key counterparties

The key counterparties in the rated transaction are as follows:

Transaction Name	PLATINUM TRUST APR 2026 – TRANCHE II
Originator	Cholamandalam Investment and Finance Company Limited
Servicer	Cholamandalam Investment and Finance Company Limited
Trustee	SBICAP Trustee Company Ltd
CC holding bank	Axis Bank Limited
Collection and payout account bank	State Bank of India

Liquidity position: Strong

For PTC Series A:

The liquidity for PTC Series A is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~5.00 times the estimated loss in the pool.

For second loss facility

The liquidity for the SLF is strong after factoring in the first loss facility (FLF) available for the top-up of the SLF, if needed, as per the defined waterfall mechanism.

Rating sensitivities

Positive factors – Not applicable for PTC Series A.

The rating of SLF can be upgraded, provided there is sustained strong collection performance of the underlying pool contracts, resulting in an increase in the credit enhancement cover available for SLF.

Negative factors – Pressure on the rating could emerge due to sustained weak collection performance of the underlying pool (monthly collection efficiency of <90%), leading to higher-than-expected delinquency levels and credit enhancement utilization levels. Weakening in the credit profile of the servicer (CIFCL) could also exert pressure on the rating.

Analytical approach

The rating action is based on the trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

About the originator

CIFCL, a non-banking financial company, is a part of the Chennai-based Murugappa Group of companies. Incorporated in 1978, it operates through 1,761 branches across 26 states and 7 Union Territories (UTs) with net AUM of Rs. 2,24,334 crore as of March 2026. The company's core business segments include vehicle finance (55%) and HE loans (18%). CIFCL has forayed into three new business divisions in the consumer and SME ecosystem, namely CSEL, SBPL and SME, which contributed 17% to AUM, while housing finance (7%) accounted for the rest. As of March 2026, CIFCL had two wholly-owned subsidiaries, Chola mandalam Leasing Limited and Chola mandalam Securities Limited, a joint venture with Payswiff Technologies Private Limited, and an associate entity – Vishvakarma Payments Private Limited.

In FY2026, CIFCL (standalone) reported a net profit of Rs. 5,220 crore on a managed asset base of Rs. 2,55,372 crore compared with Rs. 4,259 crore and Rs. 2,07,874 crore, respectively, in FY2025. In FY2026, CIFCL (consolidated) reported a net profit of Rs. 5,229 crore on a managed asset base of Rs. 2,55,750 crore compared with Rs. 4,260 crore and Rs. 2,08,113 crore, respectively, in FY2025.

Complexity level of the rated instrument

Instrument	Complexity indicator
PTC Series A	Complex
Second Loss Facility	Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click here](#)
