Total	3,93,125.72	3,93,125.72	

**Instrument details are provided in Annexure-1; # Total utilisation of the captioned programme and rated long-term borrowings programme FY2021 (including bonds, long-term bank borrowings and bank guarantees) should not exceed Rs. 81,880 crore for financial year 2020-21*

Rationale

While arriving at the ratings, ICRA has taken a consolidated view of the credit profiles of Power Finance Corporation Ltd. (PFC) and REC Limited (REC) as REC is a subsidiary of PFC and both entities are in a similar line of business with strategic importance to the Government of India (GoI) and an overlapping clientele.

The ratings draw significant strength from PFC's sovereign ownership¹, its importance to the GoI, given its important role as a nodal agency for various power sector schemes, and its dominant market position (including REC) in the power sector financing segment. The ratings also continue to draw comfort from PFC's healthy financial flexibility by virtue of its ownership and adequate profitability profile.

These strengths are partly offset by the company's exposure to a single sector (i.e. power) with a high concentration towards state power utilities as well as the vulnerability of its exposure to private sector borrowers (16% and 14% of the loan book as on September 30, 2020, at the standalone and consolidated level, respectively). This is reflected by the asset quality indicators with the stage 3 assets at 7.2% and 6.2% of total advances at the standalone and consolidated level, respectively, as of September 30, 2020.

¹ 56% held by the GoI as on September 30, 2020

ICRA also notes that the acquisition of REC impacted PFC's capitalisation level, given the requirement to knock off its investment [in excess of 10% of its net owned funds (NOF)] in REC from its NOF for capital adequacy calculations. Further, while the capitalisation level remained above the regulatory threshold of 10% and improved steadily in 9M FY2020, the large forex losses incurred by both PFC and REC in Q4 FY2020, coupled with the significant dividend outgo, eroded most of the gains achieved in 9M FY2020. As on March 31, 2020, PFC's standalone Tier I capital stood modest at 12.45%. Further, ICRA notes that the consolidated leverage (adjusted for GoI fully serviced bonds) was high at 8.5 times as of September 30, 2020. The consolidated solvency (net stage 3 assets/NOF) was also impacted by the aforesaid transaction and forex losses and was weak at 30% as on September 30, 2020 (though better than the level of ~50% as on March 31, 2019).

ICRA believes that prudent capitalisation is a key mitigant against the risks in PFC's portfolio arising out of the sectoral and credit concentration. In this context, ICRA has taken cognizance of the Rs. 120,000-crore package to discoms with PFC and REC as lending partners. While this is not expected to increase the annual disbursement run rate proportionately, the portfolio trajectory is likely to be relatively steeper than previously expected despite the likelihood of lower disbursements in other segments amid the challenging environment for project execution/implementation. As a result, the leverage could increase a bit though the extent of impact on the capitalisation ratios will be cushioned by the lower risk weight applicable to the exposures backed by state government guarantees.

Based on discussions with the managements and stakeholders of both entities, including the principal shareholder, ICRA understands that PFC and REC remain important vehicles for the implementation of the GoI's various power sector schemes. Moreover, support will be forthcoming from the GoI if needed. Support to REC, if required, will be extended by the GoI through PFC. Thus, the Stable outlook reflects ICRA's expectation that PFC, along with REC, will remain strategically important to the GoI and will continue to play a major role in various power sector schemes of the Government. Consequently, PFC and REC are likely to retain a dominant position in power sector financing while maintaining an adequate profitability, borrowing and capitalisation profile. With PFC and REC becoming a part of the same group, there could be some challenges in incremental fund-raising owing to the group exposure limits that the lenders might have. However, the impact of the same, if any, on a sustained basis, would only be visible over the medium term. Overall, the ability of PFC and REC to grow the loan book while maintaining adequate profitability and controlling the credit costs would remain a monitorable.

Notwithstanding the ratings of [ICRA]AAA(Stable) and [ICRA]A1+ outstanding on the other borrowing programmes of the company, the one notch lower rating on the perpetual debt programme reflects the specific features of these instruments as per the guidelines issued by the Reserve Bank of India (RBI) for hybrid debt capital instruments.

Key rating drivers and their description

Credit strengths

Majority ownership of GoI and strategic importance, given the role played in implementing various GoI schemes; dominant position in power sector financing – As nodal agencies for implementing various GoI schemes aimed at developing the country's power sector (such as Ultra Mega Power Projects (UMPPs) and the Integrated Power Development (IPD) Scheme), PFC and REC remain strategically important to the GoI for achieving its

objective of augmenting the power capacity across the country. Further, the GoI remains a majority shareholder in PFC with a stake of ~56%, as of September 30, 2020, and has representation on the company's board.

Given the GoI's support, PFC has been able to raise funds at competitive rates. Precedents, wherein it received approval from the GoI to raise tax-free and 54EC low-cost capital gain bonds, provide comfort with respect to its financial flexibility, ability to raise low-cost funds, and maintain a diversified borrowing profile. Also, PFC has an experienced management team with the senior team having an experience of more than 30 years in power financing. Moreover, the company, along with REC, has maintained a dominant position in power sector financing with a large share of funding to state power utilities. ICRA notes that PFC's acquisition of REC further strengthened its position, while supporting better portfolio diversity, compared to individual entities. At the same time, with PFC and REC becoming a part of the same group, challenges in incremental fund-raising owing to the group exposure limits of lenders, if any, remain a monitorable.

Adequate profitability profile – Given the elevated share of non-performing advances (though declining), PFC's and REC's yield on loan assets moderated to the sub-10% range during the past three years compared to a level well over 10.5% in FY2017. The cost of funds, however, witnessed a lower decline during this period, leading to a decline in spreads. Overall, the net interest margins (NIMs) were lower at less than 3% during FY2018-FY2020 compared to a level close to 4% in FY2017. Nevertheless, the company's profitability remains adequate with a return on equity (RoE) of 16.0% and 22.1% at the standalone and consolidated level, respectively, in H1FY2021. At the standalone level, PFC's six-year average RoA and RoE for FY2015-FY2020 stood at 2.0% and 14%, respectively. Also, while the sizeable investment in REC impacts PFC's standalone margins, the impact on profitability is likely to be partially offset by the profit in the form of the dividend declared by REC. Incrementally, PFC is likely to maintain a spread of 2.5-3% on its lending. ICRA, however, notes that PFC's credit costs could increase if there is a higher-than-expected haircut on the stressed private sector exposures or there are sizeable fresh slippages, thereby adversely impacting its profitability.

Credit challenges

High concentration risk and portfolio vulnerability – PFC's exposure to a single sector (i.e. power), the large ticket size of loans, high concentration of exposure towards financially weak state power utilities and the vulnerability of its exposure to private sector borrowers (16% and 14% of the loan book as on September 30, 2020, at the standalone and consolidated level, respectively) increase its portfolio vulnerability. The risk is further heightened as PFC and REC are exempt² from the concentration norms applicable to non-banking financial companies (NBFCs), and thus have relatively concentrated exposures. PFC's independent power producer (IPP) portfolio remains impacted by concerns regarding fuel availability, disputed and competitive power sale tariffs, absence of power purchase agreements (PPAs), environmental clearance and land acquisition issues.

PFC's gross stage 3 assets as of September 30, 2020 stood at 7.2% and 6.2% of total advances at the standalone and consolidated level, respectively. With provision covers of 56% and 58%, respectively, at the standalone and consolidated level, the net stage 3 assets as of September 30, 2020 stood at 3.1% and 2.6% of total advances at the standalone and consolidated level, respectively. Over 50% of the consolidated private sector book is recognised as a part of the stage 3 assets on which the company has made provisions of 58%. It might have to create additional

² Exemption available in case of lending to state government entities

provisions if it is unable to effectively resolve the stressed assets. ICRA, however, believes that any incremental stress in the loan book is likely to be restricted to the private sector book, wherein most of the stressed loans are already in stage 3. Going forward, PFC's ability to grow its loan book, while controlling the credit costs and maintaining the profitability, would be imperative.

Exposure to foreign exchange rate fluctuations – PFC and REC are exposed to risks arising from fluctuations in foreign exchange rates, given the large unhedged foreign currency exposure emanating from borrowings denominated in foreign currencies. ICRA notes that about 16% of PFC's consolidated borrowings are denominated in foreign currencies (up from 12% in FY2019). Of this, less than 50% exposure is hedged due to the long tenor of the borrowings and the company's focus on hedging exposures falling due over the next five years. The sizeable unhedged foreign currency exposure may continue to keep the profitability volatile.

Moderation in capitalisation level – The acquisition of REC impacted PFC's capitalisation level, given the requirement to knock off its investment (in excess of 10% of its NOF) in REC from its NOF for capital adequacy calculations. Thus, while PFC's capitalisation level was characterised by a comfortable Tier I capital of 15.95% as of December 31, 2018, the cushion reduced with the Tier I capital at 11.7% as of March 31, 2019. Further, while the capitalisation level remained above the regulatory threshold of 10% and improved steadily in 9M FY2020 (with the Tier I at the standalone level improving to 14.37% as on December 31, 2019), the large forex losses incurred by both PFC and REC in Q4 FY2020, coupled with the significant dividend outgo, eroded most of the gains achieved in 9M FY2020. As on March 31, 2020, PFC's standalone Tier I capital stood modest at 12.45%. Further, ICRA notes that the consolidated leverage (adjusted for GoI fully serviced bonds) was high at 8.5 times as of September 30, 2020. The consolidated solvency (net stage 3 assets/NOF) was also impacted by the aforesaid transaction and forex losses and stood weak at 30% as on September 30, 2020 (though better than the level of ~50% as on March 31, 2019).

ICRA believes that prudent capitalisation is a key mitigant against the risks in PFC's portfolio arising out of the sectoral and credit concentration. In this context, ICRA has taken cognizance of the Rs. 120,000-crore package to discoms with PFC and REC as lending partners. While this is not expected to increase the annual disbursement run rate proportionately, the portfolio trajectory is likely to be relatively steeper than previously expected despite the likelihood of lower disbursements in other segments amid the challenging environment for project execution/implementation. As a result, the leverage could increase a bit though the extent of impact on the capitalisation ratios will be cushioned by the lower risk weight applicable to the exposures backed by state government guarantees.

Based on discussions with the managements and stakeholders of both entities, including the principal shareholder, ICRA understands that PFC and REC remain important vehicles for the implementation of the GoI's various power sector schemes. Moreover, support will be forthcoming from the GoI if needed. Support to REC, if required, will be extended by the GoI through PFC. This provides comfort as the GoI's stake in PFC is limited at ~56%, which constrains the company's ability to raise capital from non-Government sources without diluting the GoI's shareholding, unless the GoI participates in such capital-raising programmes.

Liquidity position: Adequate

Notwithstanding the recent improvement in asset liability maturity (ALM) position (as of September 30, 2020), PFC's ALM profile is typically characterised by sizeable cumulative negative mismatches in the up to one-year

buckets, given the relatively long tenure of the loans extended by it. While such gaps are partially bridged through sizeable unutilised bank lines (about Rs. 4,660 crore as of September 30, 2020) and cash & equivalents (Rs. 1,186 crore as of September 30, 2020), the company also relies on interest income and refinancing to repay its maturing debt. Nevertheless, the healthy financial flexibility, supported by the sovereign ownership and ability to raise funds at short notice, provides comfort.

Rating sensitivities

Positive triggers – Not applicable

Negative triggers – ICRA could change the rating outlook to Negative or downgrade the ratings on a change in the ownership and/or a change in PFC's strategic role or importance to the GoI. Also, deterioration in consolidated solvency (net Stage 3/NOF) to a level above 40% on a sustained basis will be a negative trigger.

Analytical approach

Analytical Approach	Comments
Applicable Rating Methodologies	ICRA's Credit Rating Methodology for Non-Banking Finance Companies Impact of Parent or Group Support on an Issuer's Credit Rating
Parent/Group Support	The ratings derive significant strength from the GoI's majority ownership (56% as on September 30, 2020) of PFC and the company's important role as a nodal agency for various power sector schemes of the Government; the GoI ownership supports PFC's financial flexibility
Consolidation/Standalone	Consolidation

About the company

PFC, incorporated in 1986, is a non-banking financial company (NBFC) with infrastructure finance company status. It was set up by the Government of India (GoI) as a specialised development financial institution to fund projects in the domestic power sector. The GoI held a 56% stake in the company as on September 30, 2020.

PFC provides loans for a range of power sector activities including generation, distribution, transmission, and plant renovation and maintenance. It finances state sector entities including generating and distribution companies as well as IPPs. PFC is also the nodal agency for the development of Ultra Mega Power Projects (UMPPs) and the Integrated Power Development Scheme (IPDS) and the bid process coordinator for the Independent Transmission Projects (ITP) Scheme.

PFC is the promoter and holding company of REC Limited. In March 2019, it acquired 103.94-crore equity shares of REC from the President of India constituting 52.63% of the paid-up share capital of REC. The cash purchase consideration for the transaction was Rs. 139.50 per share, implying a total acquisition cost of ~Rs. 14,500 crore.

PFC, on a standalone basis, reported a profit after tax (PAT) of Rs. 5,655 crore in FY2020 compared to PAT of Rs. 6,953 crore in FY2019. As of March 31, 2020, its reported capital adequacy was 17.0% with Tier I of 12.5% (17.1% and 11.7%, respectively, as of March 31, 2019,) and it had a total loan book of Rs. 3,44,905 crore (Rs. 3,14,667 crore as of March 31, 2019). PFC's exposure to state power utilities and Central and joint sector entities accounts for 84% of its total advances.

At the consolidated level, PFC achieved a PAT of Rs. 9,477 crore in FY2020 compared to PAT of Rs. 12,640 crore in FY2019. As of March 31, 2020, its reported Tier I capital was 12.34% (12.40% as on March 31, 2019) and it had a total loan book of Rs. 6,67,330 crore (Rs. 5,96,142 crore as on March 31, 2019).

Coastal Maharashtra Mega Power Limited	Associate	Proportionate Consolidation
Coastal Tamil Nadu Power Limited	Associate	Proportionate Consolidation
Orissa Integrated Power Limited	Associate	Proportionate Consolidation
Sakhigopal Integrated Power Company Ltd	Associate	Proportionate Consolidation
Ghogarpalli Integrated Power Company Ltd	Associate	Proportionate Consolidation
Tatiya Andhra Mega Power Limited	Associate	Proportionate Consolidation
Deoghar Mega Power Limited	Associate	Proportionate Consolidation
Cheyur Infra Limited	Associate	Proportionate Consolidation
Odisha Infrapower Limited	Associate	Proportionate Consolidation
Deoghar Infrapower Limited	Associate	Proportionate Consolidation
Bihar Infrapower Limited	Associate	Proportionate Consolidation
Bihar Mega Power Limited	Associate	Proportionate Consolidation
Jharkhand Infrapower Limited	Associate	Proportionate Consolidation

Corrigendum:

Rationale dated December 03, 2020 has been corrected with revision as detailed below:

There is a change in the rating history table. The previous PR date Feb 25, 2019 has been replaced with Feb 25, 2020 on page no – 7 of the rationale published in December 2020.

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website www.icra.in or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated. All information contained herein must be construed solely as statements of opinion, and ICRA shall not be liable for any losses incurred by users from any use of this publication or its contents
