Prism Johnson Limited: [ICRA]A+ (Stable) assigned

Summary of rating action

Instrument*	Current Rated Amount (Rs. crore)	Rating Action
Non-convertible Debenture Programme^	50.00	[ICRA]A+(Stable); Assigned
Total	50.00	

*Instrument details are provided in Annexure-1; ^NCD of erstwhile Silica Ceramica Private Limited transferred to Prism Johnson Limited, post amalgamation

Rationale

The rating assigned to the Non-Convertible Debenture (pertaining to erstwhile Silica Ceramica Private Limited, transferred to Prism Johnson Limited (PJM) post amalgamation) favourably factors in the turnaround in PJM's tiles division (HRJ) as reflected in an increase in operating margins for HRJ division to 8.7% in FY2021 from 3.8% in FY2020, supported by higher sales volumes of 8.5% YoY, change in product mix and cost optimisation measures. The cement division also witnessed an increase in the OPBIDTA/MT by 8.1% to Rs. 962/MT, driven by favourable input costs –mainly power, fuel and freight expenses. As a result, PJM's overall operating margins improved to 11.1% in FY2021 from 9.1% in FY2020, despite some moderation in revenues. An improvement in the operating margins, along with decline in net debt (including lease liabilities), by 31% to Rs. 1,384.5 crore as on March 31, 2021 through prepayment of loans and an increase in cash balances due to higher internal cash accruals led to improved debt coverage metrics such as interest coverage of 3.0 times (2.1 times in FY2020) and Net Debt/OPBDITA of 2.2 times (3.5 times in FY2020). While some moderation in margins from the tiles division is likely in FY2022 from Q3-Q4 FY2021 levels of 12%-14%, it is expected to remain in the range of 11%-12%, much higher than the historic records of sub 4% levels. While PJM has planned capex to the tune of Rs. 520 crore (excluding maintenance capex) during FY2022-FY2024, it is proposed to be funded by internal accruals. Further, the reduction in debt supported by the scheduled repayments and the expected healthy operating profits are likely to result in continuing improvement in debt coverage metrics over the medium term. The ratings favourably factor in the PJM's established position as a key cement player in the central markets and HRJ continues as one of the leading brands in tiles with a vast distribution network and premium brand image. ICRA foresees some business disruptions in the current quarter caused by the adverse impact of the second wave of Covid-19 pandemic, though not to the extent of Q1 FY2021, owing to lesser stringent lockdown imposed so far. Nevertheless, the demand indicators from the infrastructure segment are anticipated to remain intact in the near term, though the rural segment may take some time to ramp up. The Government's thrust on the affordable housing and infrastructure segments is a positive from the long-term demand perspective.

The ratings, are however, constrained by the susceptibility of PJM's profitability to fluctuations in the input prices - across all the three divisions– cement, tiles and RMC. Further, the tiles and RMC segment are highly competitive with a large number of unorganised players. PJM's operations remains exposed to demand and pricing dynamics in the cement industry, which is influenced by the cyclical economic trends and capacity additions by the players during such periods. The benefits of waste heat recovery system (WHRS) and solar power would result in some power cost savings, which is likely to mitigate the impact of rising input costs in the cement division to an extent. The ratings are constrained by the subdued performance of the RMC division. Given that the company has sizeable debt repayment of over Rs. 500 crore in FY2023, the DSCR is likely to remain low in FY2023. However, ICRA notes the financial flexibility enjoyed by the company as a part of the Rajan Raheja Group and PJM's successful refinancing track record. ICRA has factored in PJM's long-term capex plans towards a grinding unit at Satna and / or an integrated unit at Andhra Pradesh, where it has limestone mines and land available. As per the management, large debt-funded capex programme will be taken up when the net debt/OPBIDTA reaches below 1x times. Further, the stake sale in Raheja QBE General Insurance Company Limited (RQBE), for an aggregate consideration of ~Rs. 365 crore, is still pending owing to the delay in regulatory approvals.

The Stable outlook on the rating reflects ICRA's opinion that PJI will continue to benefit from strong business profile, especially in its cement and HRJ divisions, and its strong financial flexibility by virtue of being a part of the Rajan Raheja Group.

Key rating drivers and their description

Credit strengths

Established presence as a key cement manufacturer in Central India – PJI is a key cement manufacturer in Central India, with a cement capacity of 5.6 million tonne per annum (MTPA). It has an established presence in the eastern Uttar Pradesh (53% of PJI's cement sales in FY2021), Madhya Pradesh (25%) and Bihar (22%) markets.

HRJ remains a leading tiles brand with a vast distribution network and premium brand image – H&R Johnson is one of the leading ceramic / vitrified tiles manufacturers in the country with a capacity of ~60 million square metres per annum across 11 manufacturing plants (including those under subsidiaries and joint ventures) as on March 31, 2021. The division has a nationwide trade network of over 1,000 dealers, in addition to 19 large format display centres.

Improvement in operating margins and debt coverage metrics in FY2021 – PJI's financial profile witnessed an improvement in FY2021, backed by improved operating margins to 11.1% from 9.1% in FY2020, despite moderation in revenues, driven by higher margins from the cement and HRJ divisions. The HRJ division's turnaround in FY2021 is reflected by an increase in operating margins to 8.7% in FY2021 from 3.8% in FY2020, supported by higher sales volumes of 8.5% YoY, change in product mix and cost optimisation measures. At the same time, the cement division witnessed an increase in the OPBIDTA/MT by 8.1% to Rs. 962/MT, driven by favourable input costs – majorly power, fuel and freight expenses. An improvement in the operating margins, along with decline in net debt (including lease liabilities) by 31% to Rs. 1,384.5 crore as on March 31, 2021 resulted in an improvement in debt coverage metrics such as interest coverage of 3.0 times and Net Debt/OPBDITA of 2.2 times against 2.1 times and 3.5 times, respectively, in FY2020. PJI has planned capex to the tune of Rs. 520 crore (excluding maintenance capex) during FY2022-FY2024, which is proposed to be funded by internal accruals. Further, the reduction in debt, supported by the scheduled repayments and the healthy operating profits are likely to result in continuing improvement in debt coverage metrics in the medium term.

ICRA foresees some business disruptions in the current quarter caused by the adverse impact of the second wave of Covid-19 pandemic, though not to the extent of Q1 FY2021, owing to lesser stringent lockdown imposed so far. Nevertheless, the demand indicators from the infrastructure segment are expected to remain intact in the near term, though the rural segment may take some time to ramp-up. The Government's thrust on the affordable housing and infrastructure segments is a positive from long-term demand perspective.

Credit challenges

Vulnerability of revenues to cyclical economy; susceptibility of profitability to fluctuations in input prices – PJI remains exposed to demand and pricing dynamics in the cement industry, which is influenced by cyclical economic trends and capacity additions by the players during such periods. When the incremental capacity additions exceed the incremental demand, the prices and consequently, the profitability of the players get impacted. Further, PJI's profitability remains susceptible to fluctuations in the input prices – across all three divisions, cement, tiles and RMC. The tiles and RMC segments are highly competitive with a large number of unorganised players. The benefits of WHRS and solar power would result in some power cost savings, which is likely to mitigate the impact of rising input costs in the cement division to an extent. Further, the margins are expected to moderate in tiles division in FY2022 from Q3-Q4 FY2021 levels of 12%-14% to around 11%-12%, much higher than historic record of sub 4% levels.

Weak performance of RMC continues – RMC sales declined by 36% YoY in FY2021 due to Covid-19 pandemic-led disruption and the division reported operating losses of Rs. 16.9 crore against operating profit of Rs. 22.9 crore in FY2020.

High debt repayments in FY2023 – Given that the company has sizeable debt repayment of over Rs. 500 crore in FY2023, the DSCR is likely to remain low in FY2023. However, ICRA notes the financial flexibility enjoyed by the company as a part of the Rajan Raheja Group and PJI's successful refinancing track record.

Long-term capex plans – PJI's long-term capex plans include a clinker facility at Satna along with satellite grinding units in UP and Bihar and / or an integrated unit at Andhra Pradesh, where it has limestone mines and land available. The company plans to undertake the same when the net debt/OPBIDTA reaches below 1 times.

Liquidity position: Adequate

PJI's liquidity is **adequate** with cash and liquid investment of ~Rs. 493.7 crore (ex-RQBE) as on March 31, 2021 and a significant cushion in the fund-based working capital limits. The company is expected to meet the debt repayments of Rs. 179 crore in FY2022 from its cash flow from operations. Further, it has a capacity expansion plan of around Rs. 520 crore (excluding the regular maintenance) over the next two to three years, which are likely to be funded through internal accruals.

Rating sensitivities

Positive factors – Sustained improvement in the performance of the cement, HRJ and RMC divisions and the resulting improvement in PJI's operating profit margin and return indicators will be a positive trigger. Furthermore, Total debt/OPBIDTA below 2.0 times, on a sustained basis, may trigger a rating upgrade.

Negative factors – Negative pressure on PJI's ratings may arise if there is a decline in revenues and earnings from the cement and HRJ divisions. Any major debt-funded capex / large inorganic expansion, leading to weakening of credit metrics, would pose a downward pressure on PJI's ratings. Additionally, Total debt/OPBIDTA of greater than 2.5 times, on a sustained basis, may trigger a downward rating revision.

Analytical approach

Analytical Approach	Comments

Parent/Group Support	Not Applicable
Consolidation/Standalone	ICRA has considered the consolidated financials of PJI. List of entities forming part of PJI's consolidated financials are enlisted in Annexure-2

About Prism Johnson Limited

Prism Johnson Limited, promoted by the Rajan Raheja Group, was incorporated in 1992. It has been involved in the manufacturing and sales of cement since 1997. The company's cement division operates two units, both based in Satna, Madhya Pradesh, with a combined installed cement manufacturing capacity of 5.6 MTPA. It caters to the major markets of Uttar Pradesh, Madhya Pradesh and Bihar. In FY2010, PJI amalgamated H&R Johnson (India) Limited and RMC Readymix (India) Private Limited with itself. Post amalgamation, PJI has been operating with three divisions, namely cement, HRJ and RMC. The HRJ division operates with a total installed capacity of ~60 million sqm from 11 manufacturing plants (including JVs) and RMC division operates with a total installed capacity of 10.5 million cum. (across 96 plants in 44 locations).

Key financial indicators

Complexity level of the rated instrument

Instrument	Complexity Indicator
NCD	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional, or legal aspects. Details on the complexity levels of the instruments, is available on ICRA's website: [Click Here](#)
