## Gurgaon Sohna Highway Private Limited: Long-term rating upgraded to [ICRA]A+ (CE) and short-term rating reaffirmed at [ICRA]A1 (CE); outlook revised to 'Positive' from 'Stable'

### Summary of rating action

Instrument*	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action
Fund-based Term Loan	287.86	287.86	[ICRA]A+(CE), upgraded from [ICRA]A(CE); outlook revised to Positive from Stable
Non-fund Based Limit	(83.33)	(83.33)	[ICRA]A1(CE), reaffirmed
Long-term/Short-term Unallocated Limit	7.14	7.14	[ICRA]A+(CE) upgraded from [ICRA]A(CE)/[ICRA]A1(CE); reaffirmed ; outlook revised to Positive from Stable
<b>Total</b>	<b>295.00</b>	<b>295.00</b>	

### Ratings without Explicit Credit Enhancement

[ICRA]A/[ICRA]A1

\*Instrument details are provided in Annexure-1

Note: The (CE) suffix mentioned alongside the rating symbol indicates that the rated instrument/facility is backed by some form of explicit credit enhancement. This rating is specific to the rated instrument/facility, its terms and its structure and does not represent ICRA's opinion on the general credit quality of the entity concerned. The last row in the table above also captures ICRA's opinion on the rating without factoring in the explicit credit enhancement

### Rationale

The above rating is based on the strength of the corporate guarantee provided by H.G. Infra Engineering Limited (HGIEL), the parent company of Gurgaon Sohna Highway Private Limited (GSHPL), for the rated bank lines. The upgrade in the long-term rating and the revision in rating outlook to 'Positive' primarily reflect the upgrade in the ratings of the guarantor (HGIEL).

### Adequacy of credit enhancement

The guarantee is legally enforceable, irrevocable, unconditional and covers the entire amount and tenure of the rated instrument. Given these attributes, the guarantee provided by HGIEL is adequately strong to result in an enhancement in the rating of the said instrument to [ICRA]A+(CE)/[ICRA]A1(CE) against the rating of [ICRA]A/[ICRA]A1 without explicit credit enhancement. In case the rating of the guarantor is to undergo a change in future, the same would reflect in the rating of the aforesaid instrument as well.

### Salient covenants of the rated facility

- » The borrower shall be obligated to make mandatory prepayment in case the sponsor HGIEL ceases to hold (directly or indirectly) ownership of atleast 51% of the total paid up capital of the borrower, without prior permission of the lenders.
- » Maintenance of DSCR equal to or greater than 1.15 times and debt to equity ratio below 4:1.
- » In case the DSCR at the end of any testing period exceeds 1.15 times, then 50% of the surplus cash flows thereafter shall be utilised for prepayment of the facility, without payment of prepayment premium to that extent.
- » At the end of twelve years from the first disbursement, the lenders shall have the option to request the sponsor to prepay the facility and the sponsor shall be under an obligation to prepay all amounts outstanding under the facility; the lenders shall give a written notice of 60 days to the sponsor to give effect to exercising of this option

The rating upgrade also takes into account the healthy project progress (~85% project progress as of April 2021) and receipt of four milestone construction grant payments from the National Highway Authority of India (NHAI). The rating also factors in the strong profile of its sponsor, HGIEL, which is also undertaking the engineering, procurement and construction (EPC) work for this project. This apart, the rating continues to draw comfort from the inherent benefits of the hybrid annuity model (HAM)-based project, including upfront availability of the right of way (RoW), automatic de-scoping of RoW pending beyond 180 days from the appointed date, inflation-linked revisions to bid project cost during the construction period, 40% of the bid project cost to be provided by the authority during the construction period in the form of grant and low equity mobilisation risk (~90% equity infused as on March 31, 2021). Further, it draws comfort from the stable revenue stream post-commissioning, with 60% of the bid project cost to be paid out as semi-annual annuities (along with the interest on the residual annuities payable), besides the inflation-adjusted O&M cost bid over the term of the concession by the project owner and annuity provider, the NHAI [rated [ICRA]AAA(Stable)], which has a strong track record and credit profile, resulting in lower counterparty credit risk. The rating, however, is constrained by the residual project execution risk with the company expecting to achieve COD in Q2FY2022. Further, the company would have to ensure healthy upkeep of the road as per the concession agreement to avoid any deductions from the annuity amount. GSHPL's cash flows are also exposed to interest rate risk given the floating nature of interest rates for the project loan. Moreover, any significant reduction in RBI bank rate would adversely impact its coverage indicators as annuity payments are linked with the bank rate. The ability of the company to complete the project in a timely manner and within the budgeted costs would remain important from the credit perspective.

## Key rating drivers and their description

### Credit strengths

**Strong profile of sponsor** – HGIEL, the sponsor of GSHPL, has established execution track record in the civil construction industry, which benefits the company. HGIEL has also provided an unconditional and irrevocable corporate guarantee for the bank facilities of GSHPL.

**Benefits accruing from HAM** – The project, being executed under HAM, would be supported by benefits inherent under HAM such as upfront availability of RoW, inflation-linked revisions to bid project cost during the construction period and relatively lower risk of equity mobilisation as 40% of the project cost would be funded by grants from the authority during the construction period. The project will have a stable revenue stream in the form of annuity that would be received post-commissioning (equivalent to 60% of the project cost) over the term of the concession period from the NHAI, a Central Government entity.

**Established track record of HGIEL in road construction** – GSHPL has entered into an EPC contract with HGIEL, which has multiple decades of experience and an established track record of timely execution of projects within the budgeted cost, especially in the road construction segment.

### Credit challenges

**Project exposed to execution risk** – The company is vulnerable to residual project execution risks, since ~85% of the project is completed as on April 2021 and the expected COD is September 2021. Moreover, the implementation risk is mitigated to some extent by HGIEL's strong project execution capabilities. Further, the debt has been tied up and HGIEL has already infused equity of Rs. 66 crore out of the total requirement of Rs. 73 crore as on March 31, 2021, resulting in low funding risk.

**Project returns exposed to changes in inflation and interest rate risk** – GSHPL's cash flows remain exposed to the interest rate risk due to the floating nature of interest rates for the project term loan. In an event of persistently low rates of inflation, the interest payments on annuity might be lower than expected, thereby impacting debt coverage metrics.

**Proper maintenance of roads essential for receipt of annuity payments** – GSHPL's source of income includes the annuity, interest on outstanding annuities and annual O&M payments from the authority concerned. Hence, ensuring proper maintenance of roads, along with zero deduction in annuity receipts, will be the key credit sensitivity for GSHPL.

## Liquidity position:

### For the [ICRA]A+(CE)/[ICRA]A1(CE) rating: Adequate

HGIEL's average utilisation of the fund-based limits during the last 6-month period ended in April 2021 is moderate at 57% due to reduced working capital intensity. The company has repayments of Rs. 62 crore and equity commitment of Rs. 259 crore in FY2022. The estimated cash flow from operations is expected to be sufficient to take care of repayments and equity commitments in FY2022.

### For the [ICRA]A/[ICRA]A1 rating: Adequate

GSHPL's liquidity is expected to remain adequate, as the pending project cost of Rs. 204 crore as on March 31, 2021 is expected to be funded by pending equity of Rs 7.00 crore, undrawn debt of Rs. 96 crore and the balance through receipt of NHAI Grant and sponsor support, if required.

## Rating sensitivities

**Positive factors** – The positive outlook could be concluded, and rating could be upgraded on receipt of first semi-annuity payment in a timely manner and creation of DSRA. Further, improvement in the credit profile of the sponsor may also warrant an upgrade.

**Negative factors** – Pressure on rating could arise if the project progress or equity infusion is delayed, resulting in significant time and cost overruns. Ratings may also be downgraded if there is any deterioration in the credit profile of the sponsor or any weakening of linkages with the sponsor, HGIEL.

## About the company

GSHPL, a special purpose vehicle (SPV), is a wholly-owned subsidiary of HGIEL. The company entered into a 17.5-year concession agreement (including two and half years of construction period) on April 19, 2018 with the NHAI. It intends to expand the existing national highway (NH) 248A by 12.5 kilometre and widen the same by six-laning, through a private public partnership (PPP) on a hybrid annuity mode. The project's construction started in January 2019 and is estimated to be completed by September 2021.

The estimated cost for the project is Rs. 675 crore, which is to be funded by equity of Rs. 73 crore, term loan of Rs. 288 crore, and the balance through receipt of the NHAI grant and sponsor support.

## Key financial indicators

Key financial indicators are not applicable as GSHPL is a project stage company.

## About the guarantor

H.G. Infra Engineering Limited was incorporated in 2003 by Mr. Hodal Singh Choudhary, Mr. Girish Pal Choudhary, Mr. Vijendra Singh Choudhary and Mr. Harendra Singh Choudhary in Jodhpur, Rajasthan. It is primarily involved in infrastructure development and the construction of roads and highways across Rajasthan, Uttar Pradesh, Haryana, Maharashtra, Andhra Pradesh and Telangana. In FY2018, the company successfully concluded its IPO. HGIEL is accredited AA class by Public Works Department (PWD) of the Government of Rajasthan (GoR) and is also registered as an SS class contractor by the Military Engineer Services (MES).

## Complexity level of the rated instrument

Instrument	Complexity Indicator
Term Loan	Simple
Non-fund Based Limits	Very Simple
Unallocated Limits	Not Applicable

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional, or legal aspects. Details on the complexity levels of the instruments, is available on ICRA's website: [www.icra.in](http://www.icra.in)
