Tata Steel Limited: Rating reaffirmed

Summary of rating action

Instrument [^]	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action
Commercial Paper Programme	15,000.00	15,000.00	[ICRA]A1+ reaffirmed
Total	15,000.00	15,000.00	

[^]Instrument details are provided in Annexure-1

Rationale

The rating reaffirmation takes into account Tata Steel Limited's (TSL) large scale of operations globally, and its status as a leading producer of high-quality steel with significant vertical integration and captive raw material linkages for its Indian operations. This imparts cost efficiency and partially hedges the company's profits against volatility in raw material prices. TSL's captive mines meet 100% and 30% of the company's iron ore and coking coal requirements, respectively for its standalone domestic operations, giving the company a distinct competitive advantage over its peers. The rating also considers the aggressive deleveraging demonstrated at the consolidated level in FY2021 and Q1 FY2022, buoyed by remunerative steel prices, a trend which ICRA expects to persist over the near-to-medium term. ICRA expects that China's policy to discourage steel exports and keep its CY2021 steel production levels capped at CY2020 levels would support international steel prices and benefit Indian steelmakers, including Tata Steel. Unless the company embarks on any large debt-funded inorganic expansion, the company's consolidated net-debt-to-operating profit is likely to remain below 1.5 times in the medium term. The rating also takes into consideration TSL's diversified product portfolio in the flat and long product categories, characterised by a high share of value-added and branded products, which support higher margins and strengthen TSL's operating profile. The rating reaffirmation also reflects TSL's status as a strategically important entity of the Tata Group, and the demonstrated support from the promoter, Tata Sons Private Limited (TSPL, rated [ICRA]AAA (Stable)/[ICRA]A1+), strengthening TSL's credit profile.

The rating, however, reflects the inherent cyclicity in the steel sector, which exposes the company to volatility in earnings. The rating also incorporates the subdued performance of TSL's international operations over the years, which led to a substantial funding support from the domestic business. Tata Steel Europe reported operating losses in FY2020 and FY2021. The European steel business has remained a structural drag on TSL's credit profile over the years. However, ICRA expects a significant improvement in the earnings from TSL's European steel business in FY2022, supported by renewal of long-term contracts at higher prices, leading to much better spreads than the recent past. The rating also incorporates TSL's exposure to regulatory risks, given its presence in the highly regulated iron ore and coal mining operations, and its exposure to forex risks, given that around 60% of its consolidated debt (as on March 31, 2021) is denominated in foreign currency, whereas more than 90% of the consolidated EBITDA is generated from the Indian operations of TSL and its subsidiaries. However, close linkages between dollar movements and steel prices provide a natural hedge to TSL, partly mitigating forex risks.

Going forward, ICRA expects TSL's liquidity profile to remain strong, supported by its healthy earnings from the Indian steel business, high financial flexibility, and a sizeable cash and liquid investment pool.

Key rating drivers and their description

Credit strengths

Aggressive deleveraging leading to improved debt-protection metrics – TSL's operating income and profits rose significantly in H2 FY2021 and Q1 FY2022, supported by large price hikes in response to favourable international steel prices and rising

domestic demand. The company reduced its consolidated gross debt to Rs. 88,501 crore as on March 31, 2021 from Rs. 116,847 crore as on March 31, 2020. Consequently, its net-debt-to-operating profit improved to 2.6 times as on March 31, 2021 from 6.2 times as on March 31, 2020. The deleveraging continued in Q1 FY2022 as well, with the company further pre-paying debt of Rs. 5,894 crore, reducing the gross debt levels further to Rs. 84,237 crore as on June 30, 2021. Given the stated intent of the management to deleverage further, ICRA expects the company's consolidated net-debt-to-operating profit is likely to remain below 1.5 times in the medium term, unless the company embarks on any large debt-funded inorganic expansion.

Large scale of operations globally with a wide distribution reach – Globally, TSL was the 12th largest steel producer in CY2020, having a crude steel capacity of 34 million tonne per annum (mtpa)¹, with operations spread across 26 countries and commercial presence in 50 countries. A large scale of operation leads to synergies associated with shared marketing and distribution functions, shared logistics and raw material procurement channels, shared research and development functions, and shared business support functions. TSL has a high market share in the eastern and northern regions of India. ICRA notes that TSL has been able to operate the steel assets in India at capacity utilisation levels of close to 100% across business cycles owing to its superior product quality and wide distribution network.

Diversified product mix, with a high share of value-added products – TSL's product portfolio spans across the flat and long product categories and is characterised by a high share of value-added and branded products. Over 50% of TSL's sales are in the value-added product categories, which fetch higher realisations, and in turn supports its profitability. TSL has an established position in the domestic automobile flat product segment. In addition, TSL has been able to roll out a wide array of branded products, catering to the needs of the B2C segment, leveraged technology and digital platforms to directly reach the steel consumer, and has also developed a portfolio of products and solutions made from steel (like 'Nest-In', 'Pravesh' steel door, 'Nestudio'), which help in partly mitigating the cyclicity associated with the steel business.

Captive iron ore and coking coal mines provide cost efficiency and partly insulate profitability of domestic operations from volatility in raw material prices – TSL's standalone steel business remains one of the lowest cost steel producers globally, consistently reporting healthy earnings through the cycle². TSL's 13-mtpa standalone India operations procures 100% of its iron ore requirement and around 30% of its coking coal requirement from its captive mines. As a result, TSL's domestic profitability has remained partly insulated from the volatility in raw material prices. In addition to fulfilling its own needs, TSL's captive iron ore mines supply iron ore to its other Group entities in India. Further, TSL's subsidiary, Tata Steel Long Products Limited (TSLLP, rated [ICRA]A1+) has a captive iron ore mine with a peak rated capacity of 2.5 mtpa.

Strategically important entity to the Tata Group – TSL remains a strategically important entity to the Tata Group, which lends it a high degree of financial flexibility. TSL has a demonstrated track record of capital raising in both debt and equity markets, and enjoys a strong relationship with the banks, which strengthens its credit profile. The rating assigned to TSL factors in the high likelihood of its parent, TSPL, extending financial support to TSL. ICRA notes that there has been a demonstrated track record of TSPL extending timely financial support to TSL in the past, as evident during the rights issue of Rs. 12,800-crore³ in end-FY2018. ICRA expects such support from the parent to continue, if the need so arises, because of TSL's strategic importance to the Tata Group, and out of its need to protect its reputation.

Credit challenges

Volatile and low profitability from international operations – TSL has been reporting low and volatile profitability from the European and South-East Asian operations. Tata Steel Europe has two large steelmaking hubs, one in the Netherlands (7.3 mtpa steel plant at Ijmuiden), and another in the United Kingdom (5.1-mtpa steel plant at Port Talbot). ICRA notes that the

¹ Source: World Steel Association

² TSL's standalone steel business consistently reported healthy underlying EBITDA in the range of US\$ 162/MT- US\$ 239/MT of steel deliveries between FY2017 and FY2021

³ Comprising Rs. 8,000 crore fully paid shares issued at Rs. 510/share and Rs. 4,800 crore partly paid shares issued at Rs. 615/share of which Rs. 154/share has already been received upfront and the balance Rs. 461/share is callable later

performance of the European steel business deteriorated in FY2020 and FY2021. However, the same witnessed a trend reversal in Q1 FY2022, with the European operations reporting EBITDA per tonne of close to \$90 against operating losses in FY2021. As Europe has a sizeable share of long-term contracts in its sales mix (these contracts get renegotiated at higher rates on expiry), the performance of the European steel business is expected to further improve for the remainder of FY2022.

Inherent cyclicity of the steel sector – The inherent cyclicity in the steel industry exposes steelmakers to a high degree of earnings volatility, which in turn leads to swings in debt protection metrics. However, TSL's backward integration in raw materials, competitive conversion costs, and an enriched product mix partly mitigate earnings volatility for the India steel business.

Exposure to regulatory risks, given its presence in the highly regulated iron ore and coal mining businesses – TSL's iron ore mining operations witnessed disruptions in FY2015 and FY2016 due to regulatory issues, and the company resorted to external purchases during that period, which had dented its margins. Also, the company had to pay compensations to the state government towards excess mining of iron and manganese ore in Odisha following the order of the Supreme Court.

Exposure to forex risks – Around 60% of TSL's consolidated debt (as on March 31, 2021) was denominated in foreign currency. This exposes TSL to forex risks, more so because of the reliance on Indian operations to partly service the debt obligations of overseas subsidiaries. However, close linkages between dollar movements and steel prices provide a natural hedge to TSL, partly mitigating forex risks.

Liquidity position: Strong

TSL's liquidity is **strong** given the healthy free cash flows of around Rs. 20,000 crore expected in FY2022 and its large unencumbered cash and cash equivalents of close to Rs. 10,000 crore as on June 30, 2021. The company has already pre-paid a large part of its scheduled repayment obligations falling due in FY2022. Moreover, ICRA expects TSL's retained cash flows in FY2022 to remain significantly higher than its Rs. 11,000-crore capex commitments, giving it a comfortable headroom to meet its deleveraging target of \$2 billion in FY2022.

Rating sensitivities

Positive factors – Not applicable

Negative factors – Pressure on TSL's rating could arise in case of any large debt-funded expansion without any commensurate increase in earnings, resulting in a deterioration in the consolidated credit metrics and liquidity profile.

Analytical approach

Analytical Approach	Comments
Applicable Rating Methodologies	Rating Methodology for entities in the ferrous metals industry Corporate Credit Rating Methodology
Parent/Group Support	Parent Company: Tata Sons Private Limited (TSPL) ICRA expects TSPL to be willing to extend financial support to TSL, should there be a need, given its strategic importance to the Tata Group, and out of its need to protect its reputation. Both TSPL and TSL share the common Tata name, which in ICRA's opinion, would persuade TSPL to provide financial support to TSL to protect its reputation from the consequences of a Group entity's distress.
Consolidation/Standalone	For arriving at the ratings, ICRA has considered the consolidated financials of TSL. As on March 31, 2021, the company had 215 subsidiaries/step-down subsidiaries, 28 JVs and 22 associates, that are enlisted in Annexure-2.

About the company

TSL is a part of the widely diversified Tata Group. TSL has an annual crude steel capacity of 34 mtpa. The company has 19.6 mt of crude steel capacity in India, and the remaining capacity mainly in Europe. TSL has targeted to increase its domestic steel capacity to 40 mtpa by 2030. TSL is planning to increase the capacity at Kalinganagar to 8 mtpa from the present 3 mtpa. Tata Steel Europe was formed by the takeover of the erstwhile Corus Plc by TSL. The company also has operations in Thailand and Singapore. The product profile of the company comprises both long and flat products. In addition to different varieties of steel, it is also a large producer of ferro-chrome products.

Complexity level of the rated instrument

Instrument	Complexity Indicator
Commercial Paper (CP)	Very Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analyzing an entity's financial, business, industry risks or complexity related to the structural, transactional, or legal aspects. Details on the complexity levels of the instruments, is available on ICRA's website: www.icra.in

About ICRA Limited:

ICRA Limited was set up in 1991 by leading financial/investment institutions, commercial banks and financial services companies as an independent and professional investment Information and Credit Rating Agency.

Today, ICRA and its subsidiaries together form the ICRA Group of Companies (Group ICRA). ICRA is a Public Limited Company, with its shares listed on the Bombay Stock Exchange and the National Stock Exchange. The international Credit Rating Agency Moody's Investors Service is ICRA's largest shareholder.

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website www.icra.in or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated. All information contained herein must be construed solely as statements of opinion, and ICRA shall not be liable for any losses incurred by users from any use of this publication or its contents.
