## Datamatics Global Services Limited: Ratings reaffirmed; rated amount enhanced

### Summary of rating action

Instrument*	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action
Long Term / Short Term - Fund based/Non-fund Based	110.0	170.0	[ICRA]A+ (Stable) / [ICRA]A1+; reaffirmed/assigned
<b>Total</b>	<b>110.0</b>	<b>170.0</b>	

\*Instrument details are provided in Annexure-1

### Rationale

The rating reaffirmation favourably factors in Datamatics Global Services Limited's (DGSL, or company) healthy financial performance, as demonstrated by its steady revenue growth, improvement in profit margins, robust debt protection metrics and strong liquidity profile (unencumbered cash/deposits/liquid investments of ~Rs. 364 crore as on September 30, 2021). The steady improvement in profit margins in FY2021 and H1 FY2022 have been driven by increased automation in its Business Process Management (BPM) division, offshoring of partial work to low-cost locations, constant optimisation of process and reduction in operational overheads. Moreover, healthy internal accrual generation has continued to result in low reliance on debt, translating into a comfortable capital structure and robust debt protection metrics.

Additionally, the ratings continue to factor in the extensive experience of promoters in the information technology (IT) and business process management (BPM) services industry, DGSL's established and diversified customer profile, its comfortable financial risk profile, and a strong liquidity position. The company's diversified customer profile is reflected in its presence across sectors such as banking, financial services and insurance (BFSI), publishing, manufacturing, hospitality, and international organisation. The company is focussed on enhancing its presence in IT services through Robotic Process Automation (RPA), Intelligent Data Processing (IDP) and Automated Fare Collection (AFC) products, which is expected to drive its future growth and profitability.

However, the ratings are constrained by DGSL's moderate scale of operations and profitability compared to other major IT services players and its exposure to intense competition from other established industry participants in India and other low-cost locations. Further, with significant presence in the US (drove 58% of revenues in FY2021) and Europe, including the UK (16%), the company's business remains vulnerable to any regulation restricting outsourcing from these key markets. The ratings are also constrained by the susceptibility of profitability to foreign exchange (forex) fluctuations, since a significant portion of its revenues is generated in foreign currency (US Dollar, Euro and British Pound), thereby exposing its profit margins to forex fluctuations. However, the company's policy of hedging a sizeable portion of its receivables mitigates the risk to an extent.

The Stable outlook on the [ICRA]A+ rating reflects ICRA's opinion that DGSL will continue to benefit from its established business profile and diverse customer base. Also, owing to the cost optimisation measures taken by the company, overall profitability is likely to be maintained over the near to medium term.

### Key rating drivers and their description

#### Credit strengths

**Extensive experience of promoters in IT and BPM services industry** - The promoters, along with the company's other senior management, have extensive experience in the IT and BPM space, which has helped drive the company's growth over the years.

**Diversified customer profile** - DGSL's customer profile remains diversified across sectors, such as BFSI, manufacturing, publishing, hospitality, and international organisation, among others. The BFSI sector contributed 27% to DGSL's total revenues in FY2021, while the publishing business contributed 25%, followed by other verticals (48%) during the same period.

**Improvement in profit margins led by cost optimisation initiatives** - Backed by increasing automation in its BPM division, offshoring of partial work to low-cost locations, constant optimisation of process and reduction in operational overheads (lower rental and travelling expense), there has been a steady expansion of overall operating profit margin (OPBDITA/OI) from ~8.6% during Q3 FY2020 to ~16.7% during Q2 FY2022. The OPBDITA/OI improved to ~12.5% in FY2021 from ~10.4% in FY2020, which in turn led to improvement in net profit margin (NPM) to ~7.3% in FY2021 from ~5.0% in FY2020. On a half yearly basis, the OPBDITA/OI improved from ~10.9% in H1 FY2021 to ~15.6% in H1 FY2022. Higher operating profits, along with exceptional income arising out of forex gain from buyback of equity share capital and redemption of preference share capital held in overseas subsidiaries, the NPM to ~12.7% during H1 FY2022 against that of ~5.4% achieved during H1 FY2021.

**Comfortable financial profile with healthy liquidity position** - DGSL's capital structure remains comfortable owing to low debt levels of ~Rs. 20.1 crore (entirely as current and non-current lease liability, as external bank debt was nil) against a net worth of ~Rs. 715.9 crore along with unencumbered cash, deposits and liquid investment of ~Rs. 254.52 crore as on March 31, 2021. The debt protection metrics continued to remain comfortable and further improved during FY2021. Total debt/OPBDITA stood at 0.1x (0.9x in previous year) and interest coverage at 30.6x (20.9x in previous year) during FY2021. Owing to continued lower debt levels (largely as current and non-current lease liability) along with unencumbered cash, deposits and liquid investment of ~Rs. 364 crore as on September 30, 2021, improved profitability, lower interest and financial expenses during H1 FY2022, DGSL's financial profile and liquidity profile has strengthened further in H1 FY2022. The same is likely to sustain going forward, supported by healthy internal accrual generation and no major increase in the company's debt levels. Due to divestment in Cignex Datamatics Inc. (Cignex) during Q4 FY2021, the overall scale of operations witnessed a degrowth of ~4.5% during FY2021. However, on an adjusted basis, without considering revenues from Cignex, the scale of operations grew by ~1.5% during FY2021 w.r.t. the previous year. Also, during Q2 FY2022, the revenue grew by ~5% on a YoY basis, while on an adjusted basis without considering revenues from Cignex, the revenues grew by ~24% during Q2 FY2022, on a YoY basis.

## Credit challenges

**Competition from other companies in India and other low-cost locations** - DGSL's scale of operations and profitability remains more moderate than other major IT services players and is exposed to intense competition from other established industry participants and low-cost locations. However, DGSL is focussed on enhancing its value-added digital services/product business to counter the competition to some extent. The company is focussed on enhancing its presence in digital solutions through RPA, IDP, and a research and development (R&D) team focussed on AI and digital solutions, which is expected to drive its future growth. Digital solutions and AI remain at the core of DGSL's offering in the IT and BPM space.

**Revenues vulnerable to outsourcing restrictions in key markets** - The company derived 58% of its revenues from the US market in FY2021, followed by Europe (16%). Any regulation restricting outsourcing in these key markets may have a detrimental impact on the company's business.

**Exposure to foreign currency fluctuations** - Approximately 75-80% of DGSL's revenues are generated in foreign currency, thereby exposing its profit margins to forex fluctuations. However, the company's policy of hedging a sizeable portion of its receivables mitigates the risk to a large extent.

## Liquidity position: Strong

DGSL's consolidated liquidity profile remains **strong**, supported by healthy internal accrual generation, sizeable unencumbered cash, deposits and liquid investments (~Rs. 364 crore as on September 30, 2021), no major debt repayment liability or major capex plans. Further, the average utilisation of fund-based and non-fund-based limits stood at ~38% during the last 18 months ended September 2021, indicating a considerable buffer from unutilised sanctioned limits. The company has an unutilised limit of ~Rs. 124.8 crore out of a total sanctioned limit of Rs. 170 crore as on September 30, 2021. Overall, free cash and liquid investments, unutilised working capital limits and expected comfortable cash accruals would be sufficient to meet regular capital expenditure and incremental working capital requirements. ICRA has not factored in any inorganic growth while estimating the company's liquidity position.

## Rating sensitivities

**Positive factors** – ICRA could upgrade DGSL's rating if the company is able to sustain its revenue growth, improve its profit margins and strong liquidity profile over the medium term. Specific credit metrics include core RoCE exceeding 20% on a sustained basis.

**Negative factors** – Negative pressure on DGSL’s rating could arise if there is a sustained pressure on revenue growth and profitability. Also, weakening of Gross Total Debt/OPBDITA above 1.5 times on a sustained basis would exert a negative pressure on the company’s rating.

## Analytical approach

Analytical Approach	Comments
Applicable Rating Methodologies	<a href="#">Corporate Credit Rating Methodology</a> <a href="#">Entities in the Information Technology (Services) Industry</a>
Parent/Group Support	Not applicable
Consolidation/Standalone	The rating is based on the consolidated business and financial profile of the company. The list of consolidated companies is given in Annexure-2.

## About the company

Incorporated in November 1987, DGSL provides IT, BPM, engineering, and big data and analytics services to its customers. The company has also developed products in robotics process automation, advanced analytics, business intelligence, and automated fare collection. DGSL is headquartered in Mumbai, with offices across North America, Europe, Australia and Asia, through its subsidiaries. DGSL’s customer base is diversified across various sectors, such as BFSI, manufacturing, hospitality, publishing, and international organisation, among others. The company is headed by Dr. Lalit S. Kanodia, the chairman, and Mr. Rahul L. Kanodia, the vice chairman and CEO.

## Complexity level of the rated instruments

Instrument	Complexity Indicator
Long term/Short term – Fund based/Non-fund based	Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional, or legal aspects. Details on the complexity levels of the instruments, is available on ICRA's website: [www.icra.in](http://www.icra.in)
