Fourdegreewater Services Private Limited: Rating confirmed as final for PTCs issued by Wint Basket 02

Summary of rating action

Trust Name	Instrument*	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action
Wint Basket 02	PTC Series A1	15.03	15.05	[ICRA]BBB(SO); provisional rating confirmed as final

*Instrument details are provided in Annexure I

Rationale

In October 2023, ICRA had assigned Provisional [ICRA]BBB(SO) rating to pass-through certificates¹ (PTC) Series A1 issued by Wint Basket 02 wherein the seller/originator is Fourdegreewater Services Private Limited (Fourdegreewater). The PTCs are backed by future receivables arising from the non-convertible debentures (NCD) issued by seven entities, viz. Aye Finance (P) Ltd., Clix Capital Services Private Limited, Navi Finserv Limited, NeoGrowth Credit Private Limited {[ICRA]BBB(Stable)}, Protium Finance Limited, Spandana Sphoorty Financial Limited {[ICRA]A(Stable)} and Vivriti Capital Limited {[ICRA]A(Stable)}.

Due to change in the pool cut-off date the pool cashflows have been revised to Rs. 16.44 crore (from Rs. 16.50 crore) while there is no change in the underlying pool principal of Rs. 14.98 crore. The PTC issued amount also stands revised at Rs. 15.05 crore on account of change in pool cashflows and transaction settlement date.

Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

Key rating drivers

Credit strengths

- Diversity amongst the borrower entities in terms of the varied nature of businesses
- Presence of entities having moderate to strong credit profiles

Credit challenges

- High obligor concentration in the pool (top obligor constitutes ~17% of initial pool principal)
- No external credit enhancement in the structure

Description of key rating drivers highlighted above

As on the revised cut-off date (November 14, 2023), the aggregate receivables stood at Rs. 16.44 crore with an underlying pool principal of Rs. 14.98 crore. The Trust will issue a single series of PTCs (PTC Series A1 of Rs. 15.05 crore) backed by the NCD receivables. As per the transaction structure, the monthly cash flow schedule comprises the expected principal and interest payment to PTC Series A1, while the interest and the principal are promised to PTC Series A1 on the final maturity date (May 01, 2025) of the transaction. All the rights of the NCD holders will be exercised by the Trustee on behalf of the PTC investors.

No external credit enhancement is available in the structure. The entities, the NCDs of which would be assigned to the Trust, have standalone/shadow ratings in the BBB and A categories. They are non-banking financial companies (NBFCs) involved in the lending business across different product classes and end use, thereby providing a diverse portfolio mix to the pool.

¹ Also referred to as securitised debt instruments (SDI)

However, the concentration risk is high since the transaction comprises NCD contracts issued by only seven entities; the top obligor in the pool constitutes ~17% of the pool principal. Hence, any deterioration in the credit quality of the individual entities in the pool to a rating level below the rating assigned to the PTCs would have a bearing on the credit quality of the rated PTCs.

Past rated pools: This is the second NCD receivables-backed PTC transaction (originated by Fourdegreewater) to be rated by ICRA.

Key rating assumptions

ICRA's rating (or shadow rating) on the entities in the pool has been taken into account while assigning the rating to the PTCs. There is no external credit enhancement in the structure; hence, the default probability on the PTC payout is considered to be in line with the default probability of the lowest-rated entity in the pool.

Liquidity position: Adequate

Considering the liquidity profiles of the underlying entities, the liquidity position for PTC Series A1 is considered to be adequate to meet the promised investor payouts.

Rating sensitivities

Positive factors – Improvement in the credit profiles of the underlying entities could lead to upgrade in PTC rating.

Negative factors – The rating could be downgraded due to weakening of credit profile of entities which are a part of the pool or non-adherence to the material terms of the transaction.

Analytical approach

The rating action is based on the trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

Complexity level of the rated instrument

Instrument	Complexity Indicator
PTC Series A1	Moderately Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
