Total	3,500.00	3,500.00	

*Instrument details are provided in Annexure-I

Description of material event

On February 6, 2025, Voltas Limited (Voltas) released an update on a pending material litigation pertaining to Sidra. The Main Contract of Sidra Project was entered between Main Client, and OHL & Contrack JV (OHL JV), the Main Contractor. OHL JV had subcontracted the MEP Works to Kentz – Voltas Consortium (KVC), through its branch in Qatar in the year 2010. The Main Contract between the Main Client and the Main Contractor was terminated closer to the completion of the contract in 2014 citing delays and defects in execution and non-compliance of contractual terms by the Main Client. In Q1 FY2024, the Bank received an invocation of bank guarantees (BG's) (given by Voltas) from the main contractor. Due to certain anomalies, the Bank did not accede to the request for liquidation of the BGs. OHL&C had filed a case against the Bank. Voltas and Qatar Kentz also filed cases against Main Contractor all three cases have been clubbed together. The Investment and Trade Court, Qatar has now passed an order and advised the Bank to pay QAR 167.7 million (~Rs. 402 crore) to OHL & Contrack towards the encashment of bank guarantees of Voltas, which will be challenged before the Court of Appeal in Qatar.

Impact of the Material Event

Based on Voltas' disclosure and discussions with the management, ICRA understands that the Bank has not called upon Voltas to pay the amount under the bank guarantee of Voltas, hence, Voltas is not liable to pay any amount as of now. Considering the aforementioned fact, it does not anticipate any cash outflow related to the above-mentioned material event. Voltas is in the process of filing an appeal in the Court of Appeal to challenge this decision. While the above matter has continuously been disclosed as part of contingent liabilities in Voltas' financial statements for the prior periods and also for period ended March 31, 2024, depending on the outcome of the appeal, Voltas will take appropriate action.

ICRA would continue to monitor closely for any such developments related to this event and take appropriate rating action, if necessary. ICRA takes comfort from the superior liquidity position of the Company with more than Rs. 2,500 crore of cash and liquid investments, as on date. In addition, the Company has sizeable fund-based facilities of Rs. 1,545 crore, which are sparingly utilised. Being a part of the Tata Group, Voltas continues to enjoy strong financial stability and is complemented by a professional management and strong financial policies.

Please refer to the following link for the previous detailed rationale that captures the key rating drivers and their description, liquidity position, rating sensitivities: [Click here](#).

Analytical approach

Analytical Approach	Comments
Applicable rating methodologies	Corporate Credit Rating Methodology
Parent/Group support	Not Applicable
Consolidation/Standalone	For arriving at the ratings, ICRA has considered the consolidated financials of Voltas. As on March 31, 2024, the company had ten subsidiaries, three joint ventures and two associate companies.

About the company

Voltas Limited is a part of the Tata Group, which holds a 30.30% stake in the company. Voltas operates in three main business segments—UPBG, EMPS and EPBG. The UPBG business markets RACs, air coolers, water coolers and other commercial refrigeration products and is also present in the market of centralised air-conditioning and refrigeration. The EMPS business provides engineering solutions for MEP projects, HVAC applications, water management services, electrification and solar jobs in domestic and overseas markets. The EPBG business markets and trades in mining and construction equipment as well as textile machinery, besides providing after-sales services.

Complexity level of the rated instruments

Instrument	Complexity Indicator
Long term / Short term, fund based and non fund based limits	Simple
Long term / Short term, Unallocated	Not Applicable
Long term- Fund based-Term loans	Simple

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click Here](#)
